Rob Robertson - Shoshone National Forest Planning Team
333 E Main Street
Lander, WY 82520

Dear Robertson - Shoshone National Forest Planning Team,

As an American citizen and owner of the Shoshone National Forest,and resident living next to the boundary on the North Fork, I would like to see the wild backcountry legacy of America's first national forest preserved for future generations.

The fact is that this forest already has one of the largest designated Wilderness areas in any forest so I support your efforts to consider increased motorized use and access in the non-wilderness portions during the Forest Plan process. Those that want to have more restrictions claim to be the majority but just because they make more comments does not translate to their greater use of the area. Greater reasonable access will ensure better support for the overall goals of sustained use and conservation of the entire area.

Sincerely,

Mr. Richard Jones
