Not sure how we use this other than to add it to the record as future justification for the proposed action. Thx!

Oscar,

I'm writing directly to you with this information to add to the public comment for Integrated Management of Target Shooting because the web page does not allow this type of attachment/link.

My husband, Alan Dewey, recorded this after we read in the evening listening to gunfire, went to bed listening to gunfire, woke up listening to gun fire, and listened to gunfire

throughout the day. The volume is more accurate if you listen to the clip with earbuds.

Please add this to the public record for project #57807.

Turkey Tracks gun fire audio taken from Trout Creek Ranches

A neighbor who suffers from PTSD as a result of military service wrote the following to me, "*this constant gunfire really has caused me a lot of issues. I'm trying to keep my anxiety and PTSD under control but I can't be on meds all the time*."

We certainly expect that individual's recreation in the national forest does not cause other people's mental health issues at home.

Sincerely,

Linda Dewey
