What studies have been done to address the issues below.
1. Traffic issues for highway 67 range shooters. No turning lane and multiple accidents now so with increased traffic no design has been proposed to address this issue
2.Law enforcement staffing and response. DCSO has only 2 deputies for 500 square miles.
3. Wild Fire and medical response and staffing. MCvfd is all volunteer team with limited responders for 7 day a week range. UPRAD ALS has one crew 15 miles from location.
4. Night shooting and reckless shooters. The site has been open at night and without supervision citizens and traffic on Hwy 67 are at risk.
5. EPA issues, trash and live rounds left on site.
6. Noise and safety issue for homes affected worth 25 Million within 1 mile of location.
