---

Good afternoon, Mike –

We are implementing the Westside Elk Modeling Tools written by Rowland et al as a part of our proposed action. More information will be available on wildlife issues once the environmental assessment is released.

Thank you for your question.

Hello Hilary;

Just started looking at the Upper Canyon project scoping information. I was curious if the forest is using/implementing the "Westside Elk Modeling Tools" (Rowland, et al) as part of the proposed thinning prescriptions and road closure proposals with this project.

Thanks for the opportunity to look at this project.
