Comments:  I have visited Lake Tarleton for many years. I think the views are among the most beautiful in the WMNF. I understood that when the area was given over to the WMNF the unique wilderness character and recreational opportunities of this lake would be protected and I think this should be designated as a scenic area in order not to betray the trust of those who worked so hard to preserve Lake Tarleton.  This area is a regional and national treasure - to deforest this area would forever scar such a delicate and beautiful resource to the region
