Organization:

Title:

Comments: 1. ban all hunting and trapping on these national lands, owned by 335,000,000 citizens.

2. ban all wild horse roundups on this national land owned by 335,000,000

3. ban all new roads through this national site

4. stop using toxic chemicals for weed control and to control insects such products kill life on earth - all life on earth. no natural area can be sustained with such products used.

5. no grazing, drilling, etc should be permitted on the lands get all cattle growers off this national land. they pay cheap rates and destroy our national land as they want all wildlife killed. don't let that happen. we want preservation and protection.

stop using these lands as profit center. stop the logging of these lands and let nature take over. stop catering to greed and mendacity as you have been doing.

stop prescribed burning. it alters habitat and takes away home and food from species that need that area to be left alone. i want preservation and protection to be the primary actions on this site, not conservation, which we all know is a code word to allow killing and murder and mendacity to go on. save the bears, the mountain lion, the deer, all the creatures that need a home. let them have a home.
