Comments: I am in favor of Alternative C. This alternative will allow future development for trails in appropriate areas surrounding Ouray County. I believe it is in the Forest's best interest to address overcrowding and user conflit issues that are sure to present themselves in the future in all areas in the Forest and not only the areas where there are currently issues. Allowing of future development of trails and other user amenities in focused/concentrated areas is the best path forward to satisfy both silent sport user needs and wildlife concerns.
