Comments: I grew up in the Gunnison area, went to school in Whitepine in the early 50s and Gunnison through early 60s. Currently age 76 and as part of an aging demographic it is important to expand motorized capability for us and other less physically capable people to be able to visit all the historic sites currently accessible by motorized high clearance vehicles, and to expand that capability to the areas that have been closed to us. I return to Colorado frequently to enjoy camping "disbursed", and touring the many historical sites "old mines & towns/camps" that made Colorado what it is. We old folks patronize most of the local establishments thus providing jobs to the local communities. Thank you
