Comments: I have been using the trails in the GMUG for 20 years, I would like to be able to continue jeeping these trails. Of the options presented, Alternative C is the closest to what I'd like to see. I would additionally like to see motorized use on the Continental Divide trail protected. Protection of ALL existing approved motorized routes should be added as well. I would actually prefer to see MORE motorized trails, especially ones that are more technical/difficult. These lands belong to all of us and simply put there are FAR more people who can and will enjoy them via motorized travel.
