Comments: I support the Plan that supports the most Designated Wilderness, wildlife protection, watershed protection, and sustainable non-motorized recreation! In today's world every bit of open space needs to be protected! The extractive industries have done too much harm already and we need an alternative future where we value the ecosystem and wildlife more than money and greed. Millions of people look to what's left of the wild places around the globe and our future in the GMUG is about sustainable recreation and visitation. I don't like the entitled tone of the motorized groups who push for more motorized use. They have enough and we need CONNECTIVITY for wildlife herds and for the preservation of intact ecosystems and watersheds! I feel looking back at this juncture or decision from 50 years from now it would be very obvious the plan with the most protective measures would be the best choice. I have a 4 year old boy and 4 month year old girl, and I really hope in 20,30, or 50 years from now they have beautiful protected lands to still recreate in the GMUG. I hope they look back and are proud of the decisions we made for their future. Thanks for listening to the public and supporting the best alternative for the land itself more than humans gain and prosperity from it.
