Title:

Comments: Alternative C is biased towards wilderness and non-motorized use and does not address the need to address multiple use opportunities. It also goes beyond the goal on how much wilderness off road area is needed.

Alternative D is the only plan that appears to address the need to:

1. Provide flexibility and multiple use opportunities for recreational activities, wilderness activities, and commercial activities while preserving the overall forest values
2. Provides for the access to public lands while also protecting them
3. Is based on sustainability and maintenance and the value of volunteer groups to assist in preserving the facilities and forest
4. Improves access to recreational and revitalizing the economic effects of recreational opportunities within the forest
5. Fits with the National Trails Strategy
6. Complies most closely with Executive Order #14008
