Comments: I am in favor of leaving the plan the way it is so all can have shared access to this beautiful area. Creating wilderness area only appeases one side and limits access to people who aren't able to get out and enjoy the land. Motorized usage allows all people, elderly, handicap, young etc to enjoy the creations. The motorized community is working hard to do our part to protect and care for the outdoors. The community depends on this outdoor recreation to relieve stress and renew and refresh mental health. Recreation and the outdoors is essential and needs to be accessible for all.
