Comments: to whom it may concern,

I am a recreational rider and enjoy spending my time in our national forest camping and riding ATV/UTV's. This is time well spent with my kids away from electronic devices. I am seeing a trend where more and more of these EIS statements are forcing me out of the forests that I love so much. Restricting my time in the outdoors gives my kids and I less places to recreate and I see them have more screen time with personal media devices like tablets and phones.

I see plan after plan various conservation alternatives that provide varying levels of restrictions rather than real solutions to offer more recreation access. This is how the 30X30 agenda will be achieved. Alternative D is the most recreation friendly to me but still doesn't go far enough to get us further into the outdoors. I would like to see more trails opened up to off highway vehicles. Lets open up more opportunities for kids and my family to put down the screen time and see the wild life. Restricting the forest and public lands only pushes us to stay indoors and do nothing.

Please considered my comments.

Respectfully Kirk Hansen
