

May 28 2014

Dear Jonathan Schwartz

I am a Seneca Resources employee and work in sespe oil lease's. I would the USFS to strongly consider Our proposal to allow to move forward with providing production out of sespe field. In the passed we have drill for oil and gas and use hydraulic fracturing provide production safely and Environmental Friendly way. As well as maintaining roads for fish and wildlife who take care of the condor population. Also we have a lot of people working and contract work on the lease's safely. Seneca employs a lot of Young people to support there family's in the local community. As well as Ventura County . please Consider the proposal. Thanks

Sincerely

Darrell Reese
Seneca resources employee
