Comments:

I support Option A for the Hoodoo Pass Roadless Area. Motorized recreation in this area will detract greatly from a true back country experience.

Option B will be a detriment to winter habitat for many species of wildlife.

This should be a difficult area to manage. Snowmobiles in winter + 4 wheelers, etc. in summer would most likely be "spilling over" into other non-motorized areas.

We have been into much of the area on foot + horseback. It is a beautiful area that should be preserved as true back country - wilderness.
