

**Bordertown to California
120 kV Transmission Line Project
Draft Environmental Impact Statement**

PUBLIC COMMENT SHEET

Informed decisions are better decisions: The United States Forest Service believes that public involvement will serve to improve communication, develop enhanced understanding of different perspectives, and identify solutions to issues and problems. We look forward to hearing from you!

☒ Yes, I want to receive a notice when the Final Environmental Impact Statement and Draft Record of Decision are available for public review.

COMMENT

Of the four proposed alternatives, the one
furthest east is the least objectionable to me.
While the power company's reason to build is
to increase reliability, it is clear to most that
"potential future growth" is the main reason.
And, if future growth in West Reno is desired,
let the developers pay for it and try to sell
it the residents of West Reno. And, of course,
since the annexation, West Reno now goes to
the California state line.

Comments, including names, street addresses, e-mail addresses, and phone numbers (if provided) of respondents will become a part of the project record.
