Full Address: <u>P.O. Box 1648</u>	
<u>Town, NM 87901</u>	
(Street/PO Box, City, State, Zip)	
Preferred Contact Method: ☒ Mail ☐ Email ☐ None	Comments: _____

We would like your assistance in helping us identify lands to evaluate for potential wilderness areas. This is an important process because you have a voice in shaping future recommendations for wilderness designation. The maps provided show areas currently included in the draft Cibola NF inventory of lands based on size (greater than 5,000 acres) or adjacency to existing wilderness lands and that do not have authorized roads. On the web-based Collaborative Mapping Tool (encouraged) or on this comment form, tell us: Should the identified, potentially suitable wilderness areas on this ranger district be included or removed from the inventory for wilderness evaluation? Why or why not? What do you value most about each area? What types of activities do you enjoy/pursue in each area? Do roads, structures, treatments, developments, or activities occur within these areas that reduce their wilderness qualities? Would you change the boundary of any area? How and why?

When commenting, please identify the area by the ID number shown on the map. Additional areas can be suggested to be included in the inventory if of sufficient size to make practicable its preservation and use in an unimpaired condition.

Polygon ID (Area)	Keep, Remove, Add or Modify	Comment
HL2	Proposed	HL1 of proposed area should be removed from the inventory for wilderness evaluation.
HL3145		Front lands as defined as multiple use and are important to the the history and culture of our western way of life.

Wilderness designations would restrict access to hunting, weed control, mining, and grazing.
