

# Four Forest Restoration Initiative

## Rim Country Project

### Scoping Proposed Action

#### Comment Form

Please use the following questions to guide your comments on the proposed action for the Rim Country Project. Your comments will help us determine issues, concerns, and opportunities for the project and develop alternatives to the proposed action.

**Are there other opportunities or additional activities that could be considered in the project?**

*The project needs to increase the acres of treatment in the juniper vegetation. Treatment options have to include fuel wood harvest and pushing with dozers.*

**What issues or concerns do you have related to the effects of the proposed activities?**

*There should not be any decommissioning of Forest Roads in this project, all the roads are covered under travel mgmt. There should not be any fencing done around springs, etc. This affects cattle grazing and our wildlife. The 4 Fri project needs to be awarded to a U.S. Company, not one from outside U.S. The proposed action has to be more specific on roads to be closed, enclosures around streams & meadows etc. Project needs to disclose Road numbers, stream and spring locations and meadow locations. Affected permittees have to be involved in this process.*
