Subject: South Fork Restoration

Regarding the South Fork Restoration and Access Management Plan, I am in support of the plan's objectives, with one exception. I object to converting the Martin Ridge Trail from non-motorized to motorized use. I understand this trail runs through country designated as Wilderness Study land, and it is in fact de-facto wilderness. Motorizing this trail would essentially bisect that wilderness. I have spent time in the Rapid Lake/Rapid Creek area, and value it greatly for its wild, quiet beauty.

Thank you.
