

Our Idaho Native Family has owned a Cabin in the precious area of Warm Lake since 1938. I am extremely concerned with the impact this project will have on the Warm Lake area. This project means a substantial devastation to our serene beautiful haven and an increase in pollution, heavy traffic, eroded roadways, turned up soil, damaged countryside and noise for the area.

Warm Lake is our quiet, safe, escape from the noise and pollution of the World and I can speak for all of my Family, when I say that we are NOT supportive of projects that will detour from what we have known all of our lives. We need wild places, places unadulterated by the hand of man. Our world is changing enough as it is. Areas such as Warm Lake free our souls unlike anything else can. Unfortunately Safe Havens and Beautiful Places are disappearing. Please don't let our legacy become lost forever. We must stand together and please preserve it, as it is. For generations to come.

I oppose any project that threatens this amazing place including water quality, forest habitat, wild animals, fish habitat and our beautiful landscape. Furthermore, if something should happen we, as taxpayers cannot afford to fund another toxic cleanup for something that could be avoided all together. We have a responsibility to be good citizens of this Beautiful land and I strongly agree this project doesn't fit the bill. I feel that this mine would make the cleanup and conservation efforts of the past null and void and go against the grain of all we have been taught. We have worked too hard to save this majestic river from human made mistakes in the past, why put it in jeopardy again?

I strongly oppose the Stibnite Gold Project. I believe the river system and beautiful land is worth More than all the Gold and Silver that could be extracted from it.

Very Truly Yours,

Jasmine Gordon
