I believe allowing Midas gold to proceed with plans to mine and reclaim lands at the Stibnite Mine site is the correct course of action for the US Forest Service.

I have visited the site and met with the Midas Gold Personnel. Although I am a professional Engineer, I have not done any work at the site. I believe their plan is the best scenario for returning the east fork to a natural stream at least cost to taxpayers. I also believe the resources and economic benefit outweigh the risks.

Thank you for your consideration, Adam Lyman, PE, CPESC
