To Whom it may Concern:

If the Stibnite Gold Project goes into production, Valley County would see an economic benefit. Midas Gold would contribute millions in state and local taxes and make improvements to our roads and power infrastructure. The company has also made a pledge to hire locally whenever possible and plans to provide hundreds of jobs for Idahoans throughout the life of the project. I understand that salaries will be substantially greater than the current local wages. Also the impact on local businesses that will no doubt benefit from higher disposable incomes and the trickledown effect an investment of this size would have on our community, economy and citizens. I believe this projects' benefits outweigh the potential environmental impact. But I also believe that Midas Gold will follow through with it's promise to restore the site and leave it better than what they found it.
