What issues or changes have you noticed regarding this resource? I am concerned that

there is no assessment for the conduct of science in the GMUG. The scientific study of the forest benefits the forest directly and provides guidance locally and globally for best management practices.

What is or isn't working regarding this resource and current management? Science is not

in the current forest plan and is not being assessed (based on posters) for the next plan. as a use of the forest

What suggestions do you have to improve management of this resource through the revised Forest Plan?

Perform a formal assessment of how the forest is being used for science, include this as a use in the new plan.
