If you are tracking herbicide use:

09/23/15 Location: BSG end of Wallen Ridge Road to .3 miles short of road up from 23 near Baxley Lane.

Target species: Multiflora rose, also sprayed a few Mimosa and autumn olive

Herbicide: 2% Arsenal with Cidekick, ~20 gallons

There is a patch of Ailanthus mixed with bittersweet (oriental?) in this stretch that was untreated. Too tall for foliar spray and most smaller saplings had lost leaves.

I felt silly spraying rose patches surrounded by stiltgrass and or lespedeza.

Jessica
