

## Proposed G.M.U.G.'s Forest Plan.

I particularly support the Lizard Head Wilderness Additions proposal because it will connect some existing Wilderness Trails including the Highline Trail with Mill Creek. The Mill Creek Basin is quite incredible & not readily accessible, and should be part of the Wilderness area.

I also support the Lizard Head Wilderness Additions. These additions will provide some additional protection to the Lizard Head Wilderness & lands close to Wilson Peak, Mt Wilson and El Diente.

The Silver Pick Basin provide good access to hikers who want to climb Wilson Peak and some of the other interstitial drainages in this area of 14 sq.

I have also seen lynx in this area and a few years ago Moose at the top of Lizard Head Pass! The moose was photographed and reported in the Daily Planet. They must have traveled a great distance & I heard later that the Moose also appeared in the Wenimuch Wilderness. I think it is important to connect all of these Wilderness areas whenever possible.

Thank you for your consideration
