RAYMOND MENDEZ

Dear Mr. Francese,

Regarding the ESHC Project, I support
R&S of the New Environmental Foundation's
efforts with the Green Mountain Forest habitat
project. Successful habitat projects so
much benefit to so many different
natural constituents, grouse to passerines,
micro-ecosystems to forest based economies,
it demonstrates thoughtful leadership to
all who care about the environment. Get the
good publicity and lead the way.
Yours sincerely, Ray Mendez
