

Dear Forest Service,

I would like to express my support for Alternative B. I would also ask that you consider use of motorized snowmobiles/ snow machines as “traditional land use” in this area.

I live in this area and have two boys who love to snowmachine and having the ability to do this as a family, locally, has been a wonderful opportunity to teach them winter skills and build family bonds. By closing this area off to motorized activities, it would deny my family and many others who have found this an outlet for their children and families valuable experiences.

Please don't limit our use of the land. I ask that you consider Alternative B as the most supportive of ALL Alaskans.

Thank you for your time.
