

To whom it may concern,

In response to Chugach Forest Plan Revision # 40816, I am opposed to options C and D. I fully support motorized access and chainsaw use in the national forest. As an older individual snowmachine access allows me, friends and family members to see areas we could never get to otherwise.

I am an Alaskan resident since 1979 and want to continue to snowmachine, camp, cut firewood, bike and hike in the National Forest as I grow older. Motorized use in the winter allows access for many other sports like cross country skis, snowshoes and hiking.

Thank you

John Russell
