Mr. Lombardo

I appreciate getting the information about your project on the oater courses in our area. I would like to make you aware of the lower 15 mile creek history of the military use, there is a road called company hollow that from what I understand is where the military kept their horses during the Indian wars. I think Phil Kaser owns property in the area and may have more information on the use of the creek and military presence.

Thank you for your concern
