**Subject:** public comment on attack on nature in Fayette natl forest deis middle fork weiser river landscape "restoration"  
**Date:** Sunday, February 21, 2016 11:38:59 AM

---

I have received your communication dated February 11, 2016 re weiser project. I have comments on page 1 as follows:

I want natural nature trees living there not fake lumberyard species that the fs wants to make money on logging and selling to china. fs is evil in its manipulation and attacks on nature. the alleged "desired conditions" are not natural. they are manmade and certainly not natural at all. I reject them and consider them as moneymaking greed plans.

I note your plan to burn 24,000 acres. what a load of air pollution that is. you will cause endless human suffering with the results of burning being lung cancer, asthma, allergies, pneumonia, strokes and heart attacks. you pollute the air with fine particulate matter and cause deaths and hospitalizations. you are stupid in this planned air pollution and menacing to American people, since it goes east across this country.

I reject thinning. nature knows how it needs to grow. the fact is much recent research shows trees talk to each other and reach out to each other. we don't want this manmade artificial evil thinning. you are menacing and attacking the natural growth of trees. you need to educate yourself on recent research.

I reject 10 acres size openings, you are evidently trying to encourage the growth of deer which love such openings. you are deliberately attacking nature to grow deer populations. stop this assault on the nature of growth. all u.s. values are harmed by this stupid plan.

as to page 2:

I reject improvement of cabin creek campground facilities. no need for this out of control spending. no need for any of this out of control spending. this is a rip off of general taxpayers. there is too much wasteful spending and attack on nature in this plan. this appears to be a make work project so that local employees can make overtime and higher salaries and monies, as well as givebacks to locals at the expense of the national owners of this land. this comment is for the public record. please receipt. jean publiee [REDACTED]
