

RE: Youngs rock rigdon
Public comment.

Johannes Pedersen

To whom it may concern,

On the days of July 6-7, 2019 I visited the Youngs Rock Rigdon Sale. In particular I walked through units 2910 and 2656 and M2. Without exception, all of these units contained many large legacy trees. These units were very biodiverse and did NOT have many ladder fuels.

I urge you to remove units 2910 and 2656 from consideration for active treatment and adopt a more passive framework of stewardship, rather than management and control.
