---

To whom it may concern, I am in favor of the Darby trails two project moving forward. I do have one concern and that is where the trail coming off cold springs hill to the south has been removed because it's too steep according to the analysis. The objection is that it's too steep. I feel that is an erroneous point because according to agency guidelines there can be up to 30 percent grade as long as the distance is not too great. I feel that this needs to be re-evaluated and make this available to be used as a connector to help create a loop system.

Thank you for your consideration,  
Sincerely, Mike Jeffords.
