**I would like the Forest Planning Team to consider the following when revising the Draft Wild & Scenic Eligibility Report:**

~~OBS~~ OBS was one of the first waterfalls my wife and I explored when we moved to the Crested Butte area. The two were there in the autumn and the fall colors combined with cascading water all dropping down from the Ruggells wilderness was incredible. I've since been back many times and in many seasons. The beauty, diversity and serenity certainly warrant wild & scenic designation in my opinion.
