Central Tongass public input:

I am opposed to the "Forest Plan Amendment" that would remove forest plan SIO's (scenic integrity objectives). Specifically the Zarembo + Wrangell Island areas.

Additional analysis + disclosure for the FEIS should include updated Water Quality discussion about stream temperature using recent references.

Create alternative(s) that show benefit of forest plan amendment - to include ^{habitat} Conservation Strategy. Discuss harvest in/of non commercial harvest areas eg. beach fringe harvest for log stringer bridges.

Thank you.

Jacqueline de Montigny
