Subject: Concerns about Midas Gold at Stibnite
Date: Wednesday, July 12, 2017 7:16:16 AM

July. 12, 2017
Susan Bloomberg

Concerns:

Traffic on warm lake highway will be at a standstill between trucks and campers causing traffic hazardous conditions.

Those trucks will tear up the highway, was never constructed for that amount of traffic .
Noise level of trucks especially on landmark grade will be constant.
Even more dangerous going down highway 55, which is already dangerous.

This will change the amount of growth of visitors around the lake, that has always been controlled to be less by forest service because of the smallness of warm lake. This brings crime of all kinds.

Most jobs will not be given to locals but from outsiders that are trained in mining.
I see it building up infrastructure in cascade and surrounding areas, what happens when they are finished? Same as when saw mills has closed and hurt the town.

I have had my cabin for 40 years I believe personally that this will devastate the entire area, it will never be the same and hope it's not all about money and politics.
