Subject: Stibnite Mine EIS scoping comment
Date: Saturday, July 08, 2017 5:05:56 PM

Please consider the short & long term impact of the Stibnite Mine project to Warm Lake recreation area & surrounding areas. This project will increase construction noise, traffic, environmental impact for Warm Lake recreation area & surrounding camp grounds/public use areas for years to come.

If you proceed there needs to be noise & traffic controls, timeframes and work restrictions put in place such as no work before 8 am or after 6 pm or weekends, etc. to be considerate of all who live in & use the affected areas.

Thank you,
Sarah Taylor
