---

Mr. Lannom

After reading through Midas Golds Stibnite Project's plan of restoration and operations summary. I would like to voice my support in favor on Midas Gold to precede with cleaning up the existing site and building a world class operation that would be a great economic boost for the local and state community.

I believe this operation has a great opportunity to work with the forest service, local and state communities to not only restore the site but to also create a world class mining operation in the state of Idaho.

Sincerely,

Johnathan Hoover
