---

Dear Sirs     Do the groups and people who object to the Stibnite Gold Project, a brown site that has been partially mined before, make any alternative proposals at all for new, well paying jobs that would be an economic boon to both the local communities and the State, or offer to provide or raise the funds that Midas Gold is willing to provide to help clean up the site. I'm sure not. However, if clear environmental and operating guidelines are in place and enforced, resource development can be a very positive and beneficial undertaking. If Midas Gold meets all the State and local requirements, I fully support the Stibnite Gold Project,

Yours truly

Bob Hunchak
