Hello, I'd like to submit a public comment regarding the Tongass development proposal. I am against any development of pristine forest, no roads, cabins should be built. There should not be any timber harvest. Projects such as this one benefit only a few developers on the top and hurt the local communities and the future generations. Those lands should not be developed - they are developed enough for all of human benefit. Development in this case means destruction for the benefit of a few and any reasonable person would be against it.

Kiril Kalinichenko
