## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lori Stoner

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Maria Grazia Gismondi

, 3015"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

becky moroney

Freeport, NY 115205251"

Phyllis A Applegate

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Phyllis Applegate

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Donna Plummer

Harrisburg, PA 171114679"

## Protect Tongass National Forest

"Please oppose opening 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. It would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, bald eagles, southern resident orcas, and even a 1000-year-old tree! It also is the traditional homeland of the Tlingit, Haida, and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands need to be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jean Eunson

Senoia, GA 302766706"

The Greed of this Administration and the total lack of respect for OUR Wildlife and Environment is astounding. The Arctic Refuge, ALL Waterways, National Parks, National Monuments and Public Lands are part of OUR heritage.

American Citizens deserve better and OUR voices need to be heard above the destructive nature of Greedy Corporations.

We ALL need to protect these extraordinary places and ALL Wildlife and Flora that live or thrives there, to remain connected to this earth, it is not only about the salvation of the planet but it is also about the salvation of ourselves.

SAVE the Endangered Species Act, NOW!!!

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Becky Percynski

Washington, DC 200026154"

Dear God has this country not raped the earth enough, mowed down enough of God's trees, poured enough asphalt built enough subdivisions strip malls and high rises? talk about global warming well here is your answer. furious. tears. take responsibility and stop this. now.

Thank you,

Carol Howard

Savannah, GA 314101035"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Marie DAnna

Ridgefield, NJ 07657"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Duane Gifford

New Hartford, IA 506608564"

Please Protect Tongass National Forest

"To whom it may concern,

We cannot sell out this majestic forest that protects us from climate change just to make a few jobs and a few wealthy people more wealthy. I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! "To the deciders of concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples. Much of the Tongass is fragile terrain, including many areas of karst topography,

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lynne Lauritson

Salinas, CA 939011632"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Karen Johnson

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Katherine Werner

Waitsfield, VT 05673"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lisa Mell

These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Andrea Brown

Wilmington, DE 19810"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

James Brady

Cambridge, MD 216131623"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Mariana Haynes

Bonney Lake, WA 983916164"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a massive blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

I BEG OF you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects!! There are SO FEW WILD PLACES LEFT. Leave what little is left pristine for our future generations. THIS LAND WAS PROTECTED FOR A REASON! NOT FOR SOME EGO MANIACAL DUNDERHEDED GREEDY BUSINESSMAN TO SELL OFF TO THE HIGHEST BIDDER! This land is your land AND MY land. Everybodys' land. Protect it! Prove your one of the 'intelligent' species & concentrate on renewable energy, not strip mining our one & only viable planet!

This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! ## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kristin Green

Sault Sainte Marie, MI 49783"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Mark Soenksen

De Witt, IA 52742"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

John Colarulli

Lake Worth, FL 33467"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Brandie Deal

Bothell, WA 980218353"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Robert Sessions

Iowa City, IA 52245"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Bill Purdue

Nyack, NY 109601615"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Herb Herschlag

Danbury, CT 068113512"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Danielle Simms

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Robin Cordova

Portland, OR 972125357"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

candace l

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

James Mather

Lorton, VA 22079"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Judith Casale

Coram, NY 117271609"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Suzanne Miller

Longmont, CO 80501"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Patrick Merritt

Statham, GA 306662044"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Judith Garson

Albany, NY 122031803"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Mark Trumbull

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Frances Dickens

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Darlene Manning

Durham, NC 277073929"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Sean Kelleher

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Carol Steinhart

Madison, WI 53705"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Vaishali Vaishali

Naples, FL 341092654"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

elliott blumberg

Durham, NC 277014074"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Hannah Osborne

Freeport, ME 040321132"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Nicole Waldron

Hamden, OH 45634"

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Shelah Lehrer-Graiwer

Los Angeles, CA 900271219"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Christa Brown

Burlington, MA 018034726"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

brit olis

Chicago, IL 606471403"

Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. Do not let the idiot ruin and destroy more environment than he already has

Pat Doherty

Cherry Valley, CA 922234124"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jackie Tryggeseth

North Freedom, WI 539519799"

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Laura J. Peskin

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Ann DeMerlis

Ambler, PA 190021316"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Stasia Vercos

Colorado Springs, CO 809235210"

Needham, MA 02492"

## Protect Tongass National Forest

"To all of you concerned,

NOW IS THE TIME for you to oppose the self-serving, foolish, ill-fated opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This measure would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity in addition to demonstrating that there is no leadership based on science, or respect for others whose cultures have been there longer than you, only on self-interests. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis that exists, despite mere "beliefs" by ignorant stooges unwilling to become educated.

These lands must be protected. The agency needs to take action to block this destructive proposal.

Thank you,

Linda Reilly

Golden, CO 80401"

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

David Nash

Greenville, TX 754048003"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

L Dennis

Independence, MO 64055"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Constance Bardin

Westerville, OH 430817903"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Janice Casarsa

Tonawanda, NY 141502920"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Gary Briddick

Crest Hill, IL 604031982"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Valerie Campbell

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kerrie Pons

Brooklyn, NY 112094232"

Donna Grace

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Donna Grace

Gulfport, FL 33707"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Joan M Oliver

Saint Louis, MO 63146"
