

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jonathan Eden

Berkeley, CA 947071520"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

James Wallhermfechtel

Saint Louis, MO 631194733"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Denise Yesland

Post Falls, ID 838548193"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

J. Ross MacLean

Ocala, FL 344815310"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

BC Macdonald

Albion, CA 95410"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Janet Chapel

Grand Blanc, MI 484392309"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Pam Anderson

Walkerton, IN 465748194"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

William Headley

Lansing, MI 489061072"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Beth Prudden

Grosse Pointe Woods, MI 482361008"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Anne Swanson

Campbell, CA 950080706"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Do the right thing. We the people demand that our wild places are preserved.

Thank you,

Meggen Connolley

Bisbee, AZ 856031904"

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Marcus Gottlieb

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Christopher Koslovsky

Huntington, NY 117433874"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

R Star

Minneapolis, MN 98108"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Cathy Globber

Wilmington, DE 19806"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Misti Reif

San Francisco, CA 941182269"

## Protect Tongass National Forest

"I strongly oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects, because it would severely compromise our last remaining truly Wild Forest and be a huge blow to biodiversity.

These lands are home to Pacific Salmon, Bald Eagles, Southern Resident Orcas and even a 1000-year-old Tree - to name a few of the Tongass National Forest's many non-human resident Species along with being the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass National Forest is one of the world's best climate defenses, whose Historic Trees store nearly 10-12 percent of all carbon consumed by U.S. National Forests and it's Alaska's first defense against the worsening climate crisis.

Instead of taking its usual destructive approach, the U.S. Department of Agriculture needs to block this proposal and protect these lands.

Sincerely,

Karen Naiman

Denver, CO 802473020"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Justin Hotovy

BIG SKY, MT 59716"

Margaret Mitchell

"To whom it may concern,

We must preserve the vestiges of our forests. That is why I oppose the opening of Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

The Tongass Forest is crucial to fighting climate Change, I know you know that. Say no to this assault on the Tongass.

Do not sell out my grandchildren's future: these ancient trees store over ten percent of the carbon consumed by America's national forests.

These lands must be protected.

Please do the right thing, Save the Tongass,

Thank you,

Margaret Mitchell

Houston, TX 77096-5804"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Mike Larkin

Schnecksville, PA 180782918"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Linda Drescher

Golden, CO 80401-5108"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Raina Mendez

Union, KY 410919086"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Anne Curtis

Chattanooga, TN TN"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Alyssa Melton

Arlington, TX 760125371"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jeanne Thomson

Hemet, CA 925446723"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Patricia Reed

Morro Bay, CA 934422823"

## Protect Tongass National Forest

"To whom it may concern,

Please, please, I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal. It is so important. we must stop destroying our forests!

Thank you,

Clare Bear

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Judy Williams

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Venessa Ramos

Sevilla, AL 41807"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Save Tongass National Forest, Again

"To whom it may concern,

Americans should not have to save Tongass over and over. Set this irreplaceable natural resource aside and preserve it for future generations. The value of Tongass as-is far exceeds the one-time profit from turning it into a commodity.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Richard Boyer

San Clemente, CA 926733242"

Sherry Clark

Indianapolis, IN 462342561"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kerry Krebill

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Melissa Fleming

Danvers, MA 019233228"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Shoshanah Stone

Anchorage, AK 995153112"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Wayne Langley

Grand Prairie, TX 750503424"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Linda Favre

Salina, KS 674018536"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

LISA PATTON

San Francisco, CA 94115"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

We strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and we urge the agency to take action to block this destructive proposal.

Thank you,

WILLIAM&ELLEN KURTZ

Amado, AZ 85645-9645"

## Protect Tongass National Forest

"To whom it may concern,

I VERY STRONGLY REQUEST you oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. THIS LAND BELONGS TO ALL OF US, not the mining and logging industry. THIS LAND ALSO BELONGS TO THE PEOPLE WHO HAVE LIVED THERE FOR CENTURIES. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to Pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis. REMEMBER THAT CLIMATE CHANGE IS REAL AND WILL AFFECT ALL PEOPLES ON THIS EARTH -INCLUDING YOUR OWN CHILDREN.

These lands MUST BE PROTECTED SO THAT LIFE ON THIS PLANET CAN SURVIVE and I urge the agency to take action to block this destructive proposal, otherwise you too will be responsible for perhaps the extinction of we humans. Think on this.

Thank you,

Deborah Bradford

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Sarah Wallingford

Frederick, CO 80530"

## Protect OUR Tongass National Forest

"To whom it may concern,

We expect opposition by any/all means necessary to the greed-and-ignorance-fueled opening of 10 million acres of OUR land in Alaska's Tongass National Forest for greedy, unethical corporofascist mining and logging.

This action AGAINST our country would severely compromise and destroy our last remaining truly wild forest ecosystem and a huge blow to biodiversity. These lands are home to pacific salmon, bald eagles, southern resident orcas, and even 1000-year-old trees! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its valuable (actually immeasurable at current knowledge, ecosystems), natural beauty and cultural importance, the Tongass Forest is one of the world's best climate DEFENSES! The precious trees store 10-12% of all the carbon consumed by America's national forests. It is Alaska's first defense against the worsening climate crisis.

These of our lands which we and our ancestors have wisely conserved must be protected for multiple reasons--ecosystems attributes which have far-reaching positive returns up and down the North American Pacific coast, research, cultural values, education, peaceful escape. (especially valuable in treatment of PTSD and other mental health issues.

We expect the agency to take action to block this destructive proposal.

Thank you,

Janet Fiore

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kenna Stout

Edwards, MO 653263684"

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

robert johansson

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Eva Cernik

Denver, CO 802231114"

It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

BC Shelby

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.
