

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Nicolas Ramos Alvarez

CALDWELL, NJ 7007"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Nick Fleming

Nashville, TN 372164213"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

ANDREW ROSALSKY

Gainesville, FL 326052682"

Jeanne Cunningham

Pine Bluff, AR 716038537"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

MICHELLE MOREHOUSE

, 77505"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Augustus Hawkins

Fairburn, GA 302134229"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Maxwell Toshach

Fletcher, NC 28732"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Patricia Bocanegra

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Michael Betz

Bellingham, WA 982253505"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Gillian Anderson

Santa Rosa, CA 954075818"

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

mary langlais

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lynn Michaelson

Lenexa, KS 662152486"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kathryn Wirth

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Christine Gartler

Madison, WI 537111959"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

James Little

Palo Alto, CA 943013224"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

**STOP THE MADNESS!**

I strongly urge you to **OPPOSE** the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be **PROTECTED** and I urge the agency to take action to block this destructive proposal.  
**DO YOUR RIGHTFUL JOB!**

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lynne Tracy

Delray Beach, FL 33446"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Peggy Meyers Meyers

## Protect Tongass National Forest

"To whom it may concern,

I demand you oppose the opening of 10 million acres of land in Alaska's Tongass National Forest to the destruction of mining and logging.

This would severely damage our last remaining truly wild forest and destroy its complex ecological balance and its unique biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best defenses against a possible runaway climate catastrophe. The old-growth trees store nearly 10-12 percent of all the carbon sequestered in America's national forests -- and it's Alaska's first best defense against a rapidly worsening climate crisis.

These lands belong to each and every American! AND you must protect them from exploitation and destruction!

We will hold you responsible for the damage you allow!

I demand your agency act to block this idiotic and destructive proposal.

Thank you,

Bruce Hlodnicki

Indianapolis, IN 462261030"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Daniel Kurz

Monroe, NJ 088316682"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Susan Guild

Sherman Oaks, CA 91411"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Charles Baumann

Geneva, IL 60134"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jeff McDonald

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Heather Wilson

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Susan Stone

, Texas 79925"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

sharon coughlin

Boonton, NJ 07005"

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Angela Lucido

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Evert Ploeg

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Sandra Taggart

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Francisco Arroyo

## Protect Tongass National Forest

"To whom it may concern,

I am vehemently opposed to the opening of land in Alaska's Tongass National Forest for mining and logging projects. This forest is an important carbon sink and home to incredible biodiversity. Logging or mining operations would also destroy the homelands of the native Tlingit, Haida and Tsimshian Peoples.

Keeping the carbon stored in these trees locked up is critical to reducing climate change which is the greatest threat our nation faces.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

PROTECT THE TONGASS NATIONAL FOREST!!

"To whom it may concern,

I STRONGLY URGE you to OPPOSE the opening of 10 MILLION ACRES of land in Alaska's Tongass National Forest for mining AND logging projects!! This would SEVERELY compromise our LAST remaining truly wild forest AND be a HUGE blow to biodiversity!!

These lands are HOME to pacific salmon, iconic bald eagles, southern resident orcas, AND even a 1000-YEAR-OLD tree! It ALSO contains the traditional homelands of the Tlingit, Haida AND Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is ONE of the WORLD'S BEST climate defenses. The old trees store nearly 10-12 percent of ALL carbon consumed by America's national forests -- AND it's Alaska's FIRST defense against the WORSENING CLIMATE CRISIS.

These lands MUST be PROTECTED and I URGE the agency to do what's RIGHT and take action to BLOCK this DESTRUCTIVE proposal. Our PLANET depends on it!

Thank you,

Mary K Deane

Moscow, ID 838439030"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Claire Mead

Haverhill, NH 037655117"

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Dayna Le Duc

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Evan Phillips

LINCOLN, NE 68510"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

P. Porter

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Gary Oakes

Hockessin, DE 197079233"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Linda Bassett

Buckley, WA 983217509"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Bruce Simmeth

Monaca, PA 150612540"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Greg Destro

Independence, OR 973511663"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Anne Schwanke

PLYMOUTH, Wisconsin 53073"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Barbara Clewett

Lexington, KY 40517"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Pat Huey

Tampa, FL 336251551"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Ann-Marie Olsson

San Francisco, CA 941172387"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Andrew Russell

Loma Linda, CA 92354"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Joe Catania

Fresno, CA 93728"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Zara Ivanova

Anchorage, AK 99501"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Megan Ruff

, Iowa 52314"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Elizabeth Daniels

Santa Rosa, CA 954015355"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Ellie Maldonado

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Betty Demers

Benzonia, MI 496168636"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Paul Carrillo

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Kathy Cheer

, 95060"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Robert Goldhamer

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

david chapman

malaga, AL 29197"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

daniel dayton

Bensalem, PA 190203712"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

A Martin

Garland, TX 750447554"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

p. Berthoin

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Stephen Hirsch

Spring Lake, NJ 077621927"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Frances Marzocchi

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

R. Stevens

, Massachusetts 1450"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jamie Kurnik

Vail, CO 816575829"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Paul Snyder

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Leslie Kane

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Arnold Bailey

Murchison, TX 75778-4598"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Billie Traynor

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Magda Santiago

Davenport, FL 338975946"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Keith Everton

Midlothian, VA 231132714"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Leslie Myles-Sanders

Bay City, MI 487068317"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Rina Margolin

Berkeley, CA 947021619"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Patrick Henry"

Protect : Tongass National Forest

"Dear USDA and to whom it may concern -

As a lifelong coastal resident and an over four decade working, taxpaying, voting Rural Americanâ€”one of 330,000,000 of your employersâ€”I oppose opening up ten million acres of land in Alaska's Tongass National Forest for the purpose of mining and logging projects. Confirming this cavalier and unilateral action would severely compromise and impact our last remaining and truly wild forest. The result would leave a tremendous disaster to this region's collective biodiversity in its wake.

As our present elected or appointed public-servant-employees, it is within your duties and responsibilities to be made aware, uphold and protect Alaska's Tongass National Forest. This is the home of diverse wildlife and marine life including our National birdâ€”bald eagles, salmon, southern resident orcas, to name only a fraction of animal inhabitants. As far as botanical specimens, documented are one thousand year old trees. Residing within this grand region are the traditional homelands of the Tlingit, Haida and Tsimshian people, along with their unique cultures and livelihoods.

To quote the Friend of the Earth:

â€œBeyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis. These lands must be protected...â€

Please honor your job description, and block this counterproductive destructive proposal.

With appreciation for your time and thoughtful consideration of this far reaching concern.

Every good intention.

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

John Slauson

La Grange, IL 60525"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for random mining and logging projects. This wanton destruction would severely compromise America's last remaining truly wild forest, reduce the natural climate and environmental buffers, and be a gratuitous blow to biodiversity.

These lands are home to Pacific salmon, iconic bald eagles, southern resident orcas, and at least one 1000-year-old tree. It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples. It is an icon to our heritage, and a symbol of the power of preservation.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

Our lands are held in trust, for us and for future generations; our lands must be protected from kleptocrats and greed, and I urge the agency to take action to block this destructive proposal.

This trashing of earth must stop. This is a matter of species survival, the Human Species is in grave danger due to ignorance of the natural world.

To quote an Andean shaman, she said "The world doesn't need to be saved, the world is not in danger. We are. We humans. If we don't change our ways, Mother Earth will shake us off like so many fleas."

The "shaking" has begun in earnest, just look around.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Robert Kline

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Margaret Garr

Providence, UT 84332"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Lauren Walters

Decatur, GA 300342735"

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

michael sullivan

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Russell Hollenbeck

Please take a close look at independent, peer-reviewed science. Allowing the fox to tell you it isn't eating the chickens usually results in more dead chickens.

Every day the criminal in the White House, along with Moscow Mitch, Billie (must be) (de)Barr(ed) and their cronies destroy more of our Democracy. This must be stopped now.

No more national socialist inspired appointees. No more appointees from the Criminal in the White House.

This is a Time for Progress not a continuation of the same or regression.

Time to impeach and fire d. trump. The creature is obviously unfit for the job. Then lock him up or send him to live in Russia.

This is 2000s America not 1930s Germany.

Stop the attempted fascist takeover of America. Impeach, Charge, Convict and Imprison d trump and his cohorts.

Regards,

James K Hadcroft

Casey Fergeson

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Casey Fergeson

Portland, OR 972196623"

"To whom it may concern,

You really should go there.... and THEN rethink opening this unspoiled land to industry!

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

BEV MCDANIEL

Leawood, KS 662112004"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Heberth Cuervo

Lodi, NJ 076441801"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Cory Tout

, V4T2W7"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Ellen Jesse

Tucson, AZ 857399413"

## Protect Tongass National Forest

"To Whom it may Concern:

I am deeply opposed to any use of the Tongass National Forest for logging or mining. This forest is a true wonder, unique to our continent, and is home to salmon and highly endangered southern orcas and is a needed sanctuary for all wildlife due to its size and type of growth. It would be worse than folly to use this forest with all its life-giving trees to feed human greed. This forest is the homeland of several First Nation peoples: the Tlingit, Tsimshian and Haida Peoples. They are the ones who should be in charge of the fate of the Tongass Forest. Since that is not how things stand, we must defend the forest.

This destructive proposal must be blocked. Look at this forest, knowing that climate change is real, that the forest helps buffer the effects of climate change and protects the a vast array of animals and plants, and take actions to protect the Tongass National Forest from mining and logging. Block this destructive proposal.

Thank you,

Rebecca Clark

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Revel Paul

San Francisco, CA 941162510"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

"To whom it may concern,

Wake up folks, this logging is ridiculous and I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Hurd Hess

Fairfield, IA 525563628"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Beverly Burns

Vienna, VA 22180"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Jeffrey Pekrul

San Francisco, CA 941141897"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Abdallah Isa

NASHVILLE, TN 37205"

## Protect Tongass National Forest

"To whom it may concern,

I strongly urge you to oppose the opening of 10 million acres of land in Alaska's Tongass National Forest for mining and logging projects. This would severely compromise our last remaining truly wild forest and be a huge blow to biodiversity. These lands are home to pacific salmon, iconic bald eagles, southern resident orcas, and even a 1000-year-old tree! It also contains the traditional homelands of the Tlingit, Haida and Tsimshian Peoples.

Beyond its natural beauty and cultural importance, the Tongass Forest is one of the world's best climate defenses. The old trees store nearly 10-12 percent of all carbon consumed by America's national forests -- and it's Alaska's first defense against the worsening climate crisis.

These lands must be protected and I urge the agency to take action to block this destructive proposal.

Thank you,

Shanna Shearer
