

96, 247 Greenpeace supporters have signed onto the following statement:

Dear Secretary of Agriculture Sonny Perdue

Protect the Tongass National Forest! (Alaska Roadless Rulemaking #54511)

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences.

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.
