In a time of climate crisis, we need more trees, not less. If you authorize the destruction of this forest, you must own the consequences. You will have to live with the guilt of destroying all this life and hurtling us further towards climate chaos. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Chelsea Lynn

PLEASE DONT DESTROY OUR PLANET The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Austin

Walker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to protect our world in order to protect our species. This does not mean our way of life it means our way of survival.

Katrina Strawn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to stop destroying our planet for the future of our children. If we don't doesn't matter if you are rich or poor, we will all perish. We only have this planet we must protect it.

Alma

Sanchez

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This must be stopped!

Eileen

Martinez

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do you realize, when you cut down a forest, it takes over 100 years to get back to the same type of forest it was in the first place. I think that people should take conservation a little more seriously.

Laurie Knight

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't do it.

Asia

Chase

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This President and the republican party don't care about nothing; Just follow the money. Make me sick.

Kevin

ONeill

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Take a lesson from China dum dum. Plant trees

LORI BALLON

The Tongass National Forest is of global importance, and opening it to logging, is murder. Save the trees!

Krystle Scriven

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump has been allowed to throw out too many benefits passed because he doesn't like the senator. Our country is being sold off piece is that what will happen to the forest also.??

Jeraldine Anderson

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Also, fuck trump. And his kool-aid drinking followers.

Erion

Holliday

I understand that we all have jobs we need to do. We all need to make our money. Sometimes we do things we know are not great to keep ourselves going, but now it's not about us as people. It is about us as a species. Land will run out, food will run out, all resources will run dry if we continue to not think about humans. We need this forest to maintain a livable biosphere for humans. Please, create a national park, create jobs, create a better world for our own people to live in.

Julian

Luna

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Cole

We should be protecting this earth and harvesting its goods sustainably, by destroying the oceans, forests, and permafrost we are severely hurting this planet and our chance for survival (along with many other species). It is very clear that this government doesn't care about the future of this planet or the people on it, stop these atrocities or we will all suffer the consequences.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Suzanne English

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If Tongass National Forest is destroyed, you might as well be ripping out the whole pulmonary system within every one of us. We need to keep our trees alive and thriving or else there will be no "we". Please do not do this to us, at least do this for the world and everything on it.

Abigael Arredondo

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. That steaming pile of greasy, orange shit Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Katherine Simpson

Please don't open the Tongass National Forest to exploitation. We need our forests for enjoyment and recreation. Please continue to protect what God made. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Catherine de Neergaard

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Lets not let the people who make it a policy to put their Wallet First win.

David Hughes

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please save this national treasure and be remembered as a hero to the future generations, your grandchildren and mine.

Joy

Lee

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Enough is enough! You're destroying our future out of pure greed.

David

Duff

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Christopher Ferrier

Christopher Ferrier

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Old trees---the ones usually targeted by logging companies, help control the amount of carbon in our atmosphere; excess carbon is a major contributor to climate change. Once they are gone they cannot be replaced. Please consider the impact of this action for the sake of future generations. Sincerely,
Susan Carr

Susan Carr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Stacie Leigh

husband served in the US Coast Guard, for a total of four years. First as a helicopter pilot, protecting the fishermen and any citizen who needed assistance, the last two as Commander of Air Station Sitka. Sitka is on Baranof Island, in the middle of the Tongas National Forest. I had never before, (and never since), see a more beautiful country. To rip apart this National Treasure would be a travesty, all for the sake of increasing someone's fortune. It would take hundreds of years, if ever, to replace this forest. All the towns and roads on the coast would be destroyed by mud slides after the trees were removed. Wildlife would lose their home and the streams used for spawning salmon would be destroyed. All for Greed? The president has already destroyed many of our National Treasures for the sake of rewarding his cronies and financial supporters. His ignorance or select ignorance of Climate Change has already put our Planet on a crash course with destruction, destroying this environment will only hasten our Planet's destruction!

Gay

Preston

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Karen

Norton

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Tongass is both one of the world's few remaining temperate rainforests and an old-growth forest, meaning its trees have never been cut. This makes Tongass a valuable habitat for a number of species, many of them endangered -- for example, bald eagles, mountain goats, and black bears. Logging Tongass would destroy its ecosystem, putting its community of plants and animals at risk. This holds consequences for us as a human society as well: an ecosystem as large and diverse as Tongass, provides services such as naturally filtering water, producing oxygen, acting as erosion control, buffering against extreme weather, and maintaining genetic biodiversity (a necessity for any ecosystem to adapt and recover from disruptions). Further, its diversity of life offers untold opportunities for science. Fields such as robotics and medicine have already benefited from studying, mimicking, and/or synthesizing wildlife-

Holly

Stroschine

Perdue Please hear my deepest plea to protect The Tonga's Forest. If you want to protect our Children's Children then let things alone. What ever happened to the voice of the People?? Why do we who value ecosystems have to jump higher than the Trump's directive? Why are we not heard about having mercy on Mother Nature? Has man not created enough damage than to add to it by taking AWAY More of what is beautiful and natural? Not everyone agrees with the destruction and loosing the never to return wildlife and forestry beauty. Leave it be. Trump is a business man. I doubt he sits in the middle of nature and can become one with it. And, for of us who are disabled... it's our therapy. Gods going to prevail his wrath one of these days. I'd fear that a lot more than just a passing thought. respectfully, Rebecca?? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost

Rebecca Gerhardt

Baltierra

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. We don't need this short-sided government and corporate irresponsibility to become reality. We as a nation and world have technologies and real-time alternatives that can better serve our macro economic needs going forward without any additional damage to our planet and surroundings. The smart and better vision for a prosperous economy, a growing GNP, and improved qualities of lives for everyone can be achieved in short order if you follow a sound strategic vision and implementation of new technologies and alternative natural resource use in lieu of antiquated means and methods. We have the capabilities to this now. Growth in the economy and at the same time the opening on new product markets are and will be a far better choice on many fronts. If you want specifics on technological advancements and strategic vision that leads to new product markets and new industries both horizontally and

CONSTANCE D'ANGELIS

ARE YOU LISTENING???

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lynette Schweigert

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. In general I believe that Alaska should be protected above all else. Beautiful state.

Naylor

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. And fuck Donald Trump. Not in the fun way but like the he-is-a-asshole way. Sorry had a few beers afore typong tjid. Thaml ypy

Dezerae Bullard

1 million American 6 year old girls to sex slavery if it earned him a few bucks and a compliment with good ratings. He is the the most shameful embarrassment to America in its history. He makes me ashamed to be an American when I love this country so much. He needs to be stopped in every horrible thing he does, especially when it's something that will effect the future of humanity by destroying the forests and such a massive animal habitat. He is everything evil and wrong with this world. His brain never developed past a 4 year olds, but a super rich soulless evil greedy devil 4 year old who was never told no, and was always told he was right about anything he said, even if he lied and said the opposite 2 minutes later his rich father would still say he's correct and give him another million dollars to throw away. Now he is getting more senile by the day. A senile racist angry grandpa with a brain that's never developed past a 4 year old's with an a IQ of 45. It's destroying our country, making half the country believe in complete lies because the media takes

Daniel

Beadling

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Amanda Rowe

The more we take the more we devastate. I want my grandchildren to be able to see this place! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jessica Waymire

Dominick Haney

the worlds rainforests are our own planet
earths lungs, removing its lungs will only
kill our planet more than what humans
have already done, don't remove earths
lungs remove Trump.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott

Werly

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no dire need that would even begin to justify the extreme, disastrous consequences of opening the Tongass National Forest and the Arctic National Wildlife Refuge to the invasive soulless people of commerce.

Diana Stransky

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do what's right this time. We are going to need oxygen for a long time on this earth. Your great grandchildren will be in trouble as will ours if we lack oxygen. For once please listen to someone who REALLY DOES KNOW MORE THAN YOU DO. No one person can know everything. Trust someone else besides you this time.

Jean

Ham

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must stop this, before it gets worse. Please help save the planet, by saving this forest!

Thomas Hammontree

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Terry

Reneau

giving your position not to be the president's yes man or to be any person in power's lap dog. You are in that position for one main purpose, and that is to be the voice for the voiceless. To be the voice of not only the people, but also this beautiful country that many seem to have a desire to destroy. It is time for you to take a stand and do what is right. Will you do what needs to be done, be that voice, do what's right, and take that stand? I hope so. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth

Ernest Barrientes Jr.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, considerDi alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Diane

Martin

Trinity Zuniga

If you go forward with this mission you will be destroying someone's home and you will destroy mankind. The earth works in mysterious ways and will come back stroger and destroy us as mankind because of your selfish acts. Think before you proceed.

This is just another sign of greed and disregard for our wildlife and ecology... The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Susanna Hart

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Deforestation will decimate hundreds of natural ecosystems and cause many animals to go extinct. It is killing our planet that we should be striving to protect and care for.

Rowan Davidson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I work for the DNR. Quit hurting us and our parks.

Andrew Larion

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to start thinking green and cherish and protect what Mother Earth has provided us-mankind and animals alike to live a better life and for future generations to prosper in a way as well.

Juliana Rendon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Forests are burning around the world. Trump's assault on our wildlife and habitat has to stop.

Karen McIntyre

Karen McIntyre

wonderful place. The trees there are some of the oldest in the world. They are also the homes for plenty of our bald eagles. I will not scream in protest for the 70,000 people that live in and around that area. I won't raise money to save the endangered plants and animals that live in the Tongass. Nor will I chain myself to a tree where a bald eagle is nesting. Because there will be no need to do any of that. I will instead ask you to visit this place before deciding whether or not to have some or all of it logged. Because I know that if you spend even a day and a night in the ancient forest, you will understand why people live in Alaska. Once you touch the trunk of a tree that has been around for almost a millennia, nobody will have to raise their voice in protest or write angry emails filled with hate and finger pointing (because I'm sure you have received many of those). Once you make a visit, the bald eagles will be safe, the trees will continue to live and outlive us and tourists? will be forever grateful for the fresh Tongass air because that one visit from you is all it

Jordan Atkins

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. Try to remember: We only get one planet.

Harvey Halpern

the Alaska state government to nullify the vital protections for roadless areas in the Tongass National Forest. Eighteen years ago, the Forest Service came to the long-overdue but morally obvious conclusion that all remaining roadless forests are precious beyond economic measure, and that their highest and best use is to remain biologically intact. Since then, intact virgin forests have only become scarcer, both nationally and in the Tongass, and the moral case for their protection has only become stronger. For the Forest Service to even momentarily entertain this astoundingly selfish request from the Alaska state government is a gross abdication of your responsibility to the public interest. These roadless forests are national treasures, whose biological value vastly outweighs the value of any timber that will be extracted from it. This exchange of an immensely verdant, kaleidoscopic biological treasure for a low-value commodity of lumber pulp is the most lopsided, unholy transfiguration of treasure to commodity, that a myopic

Jim

Steitz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no need for this ill fated thought. This...is very important to save for the future generations and Mother Earth! Stop this madness!

John

Peterson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Let's take a lesson from Brazil; don't destroy our largest rainforest. The ecological value of the Tongass is worth far more than any temporary monetary gain.

Carol

Melton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PLEASE DON'T DESTROY OUR NATION'S LARGEST NATURAL FOREST!!!

Kathleen White

As a one-time Alaskan resident and concerned global citizen, I urge you to consider public opinion regarding the Tongass National Forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Damon Bishop

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump has the wrong mind set.

Frona

Vicksell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We desperately need the immense carbon sink that this forest represents. New growth forests would take decades to effectively re-sequester this amount of carbon. We need to be avoiding the use of fossil fuels if our country and the world is to minimize the effect of global warming. It makes no sense to go forward with allowing devastation of our forest for something we need to eliminate anyway!

Kathleen Braico Md

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect the environment not sell it off. It belongs to the people not the government and you are supposed to hold in in good condition for our use, all citizens not businesses.

George Bond

This is unacceptable on every level. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Beret

Amundson

the Alaska state government to nullify the vital protections for roadless areas in the Tongass National Forest. Eighteen years ago, the Forest Service came to the long-overdue but morally obvious conclusion that all remaining roadless forests are precious beyond economic measure, and that their highest and best use is to remain biologically intact. Since then, intact virgin forests have only become scarcer, both nationally and in the Tongass, and the moral case for their protection has only become stronger. For the Forest Service to even momentarily entertain this astoundingly selfish request from the Alaska state government is a gross abdication of your responsibility to the public interest. These roadless forests are national treasures, whose biological value vastly outweighs the value of any timber that will be extracted from it. This exchange of an immensely verdant, kaleidoscopic biological treasure for a low-value commodity of lumber pulp is the most lopsided, unholy transfiguration of treasure to commodity, that a myopic

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please save our rainforests!

Maia Justine Storm Esq

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please Mr. President. Im rooting for you. Don't let us down.

Briann Vasquez

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once it is destroyed it is gone. Please leave a good legacy for your children and future generations. Short term profit is never a good thing when the future of our planet is at stake!!

Kurt

Schultz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Furthermore, we need to be protecting our few wild spaces remaining. Gas and oil are on their way out, and we need to stop subsidizing these industries. As a taxpayer and concerned citizen, I request no extractive industries, including logging, be permitted in the Tongass National Forest.

Sandra VAUGHN

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's corrupt plan is to cash out on forest destruction. The 2001 Roadless Rule was put in place to ban all forms of development and destruction and protect the integrity of this unique critical ecosystem. The proposed rollback on the Roadless Rule would give way for destructive logging and mining, all part of a broad attack on ecosystems and the climate throughout the country. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We only have one planet and this is not the way to preserve it for our

Ellin

Stiteler

Once these rapidly disappearing areas are gone, they are gone forever, taking everything in them with them. Does anyone in this country think in terms of their actions causing such a profound change? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Leah

Boyd

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The President's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alec

McDougall

Robert Thornton

At this precarious time in history, ecosystems are much more valuable to humanity than the resources that they possess. If we kill an ecosystem, we are killing ourselves. Preserve the Tongass and we save humanity. Do not destroy that which can preserve our planet.

PROTECT OUR FOREST, KEEP THE TONGASS. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mh

Robertson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I'm sure you know about how man's intrusion into wilderness areas is detrimental to wildlife. The words seem bland, but the sentiment about how much we need the areas we shouldn't ruin and let live freely without destruction cannot be overstated.

Barbara Hartinger

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is shocking that you would even consider the destruction so that the logging industry can make money. Your abject disregard for the deleterious consequences of opening the Tongass National Forest to interests steeped in avarice is repugnant,

Michael Robinette

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There are NO NEW old-growth forests. The few remaining are IMPORTANT to the survival of a number of species and MUST BE PRESERVED and PROTECTED!

Bob

Miller

Leave something for the next generation. Destroying the Tongass is a crime against the Earth. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Daniel O'Keefe

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Say no to Trump's corrupt objectives and protect the Tongass Forest. Hold forest and wildlife protection above corporate greed...THIS IS THE RIGHT, FAIR, JUST, HUMANE AND HEALTHY ACTION TO TAKE!!!!!!!!!!!!!!

Dr.MaryAnn Graffagnino

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The the right thing for the people. We are watching

Maddy Defreest

Please protect the Tongass National Forest and do not open it to logging, mining or oil and gas extraction! It is too important and must not be damaged. . This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Old -growth forests must be protected.

Shirley Bond

this correspondence. I write to urge you to protect the Tongass National Forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. There is a movement to exempt Alaska's 16.7-million-acre Tongass National Forest from nearly 20-year-old logging restrictions, which would remove protections for Tongass National Forest. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Removal of protections for Tongass National Park would violate the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect the Tongass National Forest and maintain logging restrictions.

Susan Murray

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I find it sad that yet another crime is being committed against nature especially, being a vet, against the fauna.

Alan

Slater

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. President Trump please protect the Tongass. This could be a great part of your legacy.

Douglas Renick

It is completely irresponsible for the government to destroy the Tongass National Forest. The Tongass is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind and the Trump's directive violates the NEPA process. The loss of old-growth forest will intensify the effects of climate change. Do NOT destroy the Tongass!

Sarah

Sweeny

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for reading my comment.

Philipp Eixeres

To whom it may concern: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Leia

Cumberland

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. You, Mr. Perdue, do not understand your job. Just because our irresponsible president and greedy corporations are your friends and cronies, does not mean you can totally ignore the mandate of your position. Your job is to protect our public, wild lands not give them away causing untold destruction to precious forests that have been on earth for centuries. Please get a conscience and morals. Don't throw away our children's and grandchildren's future.

Cheryl Biale

This administration seems determined to commit planet suicide. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Louise

Simrell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need safe, sacred places protected forEVER from human encroachment and destruction. EVERYONE knows that roads begin the eventual and total destruction of environments.

Carole Scott

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not open this forest to logging, mining or oil and gas companies. It's too valuable and important to the local environment, local people and the amount it would contribute to the local economy is minuscule compared to the permanent damage it would do. Thank you.

Margaret Graham

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PROTECT THE TONGASS!

Craig

Scholz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is certainly not the time to give up on protecting any of our parks. Not when climate change seems to be gaining hold all over the world.

Linda

Weeks

I'm writing as an American who feels that intact forests are crucial to America's success. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for considering this comment.

Danielle Montague-Judd

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have visited the area twice in my lifetime. Not only is it beautiful, it is critical. We must stop this type of activity before it is too late. If it is not already so.

Lisa

Gottlieb-Cytron

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Any damage to such forest is speeding up our suicide.

Nili

Phillis

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Mr Perdue, you should be ashamed of yourself for even considering denigrating the phenomenal beauty and habitat that is the TONGASS. The place is breathtakingly gorgeous and home to so many struggling species! PLEASE PLEASE DO NOT OPEN THE TONGASS TO ANY TYPE OF DEVELOPMENT. A move like that would reap FAR MORE DAMAGE THAN GOOD. You must think in the long term- think of your grand and great grand kids world. NO NO NO NO NO.

Merriann Bell

America must lead the way in Environmental protections. We can't expect poorer countries to protect their rainforests then exploit and destroy ours. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kelley

Giddings

Our forests are not for sale. Period. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Abigail

Fanestil

Opening The Tongass to resource exploitation, in the few years we have left to ameliorate the worst effects of global warming, would be an act of aggression against humanity. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not contribute to what amounts to a devastating war on the environment, the people of our country, those of the world, and future generations.

Maureen Crowley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Dr. Tammy King

Dr. Tammy King

cannot create nor recreate; planet is one of those things. The planet, Our Mother Earth, is designed to sustain all life, not just that of humans. Yet, because of greed and short sightedness, the Earth is being ravaged and is crying out to us humans. When will we listen? Why are we destroying the Earth with the eminent threat to survival of our progeny? My ancestors and yours knew the value of Our Mother Earth. Here are a few reminders: "The Great Spirit is in all things. He is in the air we breathe. The Great Spirit is our Father, but the Earth is our Mother. She nourishes us. That which we put into the ground she returns to us." —Big Thunder (Bedagi) Wabanaki, Algonquin When all the trees have been cut down, when all the animals have been hunted, when all the waters are polluted, when all the air is unsafe to breathe, only then will you discover you cannot eat money. —Cree Prophecy Treat the earth well: it was not given to you by your parents, it was loaned to you by your children. We do not inherit the Earth from our Ancestors, we borrow it

Pheobe Malloy

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Sernaker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We can not recreate this pristine ecosystem, this forest...it will be lost forever for the profit of a private company. Your job is not to sell our national treasures and future health of our country and planet.

Karen Berger

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. TRUMP,, LEAVE THE RAIN FOREST ALONE, Stop Building Everywhere & Causing All These Fires That Destory The Forest & Kill All The Animals,, Go Play In Your Own Back Yard! Leave Us Alone!

Debbie Wagner

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to keep this National Forest intact for the sake of our planet. The gains from opening it to logging, mining, etc. are short sighted and will be ill-gotten gains. Please hold the line here!

Colleen Goodrich

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. No one needs boards so badly as to justify damaging the Tongass Forest, which cannot and should not be sacrificed to for dubious and superficial economic ends. The economy is doing fine without extra lumber - much of which would have gone to China and Japan, in any case. Maintaining forests is of great agricultural value - and old growth forests are not easily replaced once we see the dire consequences of cutting them down.

J. Melvin Woody

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have a president who does not understand why we must keep our natural preserves in their natural state. He thinks only about how to make money now and does not understand how doing so can destroy our world for the rest of time. He thinks he is building his empire, when in fact, he has gone bankrupt many times. If he had to pay for running his companies amuck, in stead of walking away, then he would indeed be a penniless soul. We don't want our

Karen Ferren

I.J.

Dubois

Opening the Tongass National Forest to logging, mining, and drilling will destroy it and the creatures that live within. This will only add to the ongoing crisis of climate change. DON'T DO IT.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This forest is key to healing the planet. Do NOT allow industry to harm it. We have many many alternatives and we do not need more fossil fuel exploration or environmental damage. PROTECT the Tongass from any industrial applications. Keeping the Tongass whole will prove better for Alaska than the pittance of revenues derived from industry.

Constance Bevitt

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If the Tongass is destroyed it would be a permanent and costly loss that we all would regret. Leave the protections in place.

Daniel Jones

To borrow from Mark Twain: Guard and protect our National Parks, Forests, Monuments and ALL wild lands, lakes, oceans and waterways. They are not being made anymore... The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Harry

Freiberg

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The earth cannot afford to lose more forest. It is absolutely essential for carbon sequestration. If we continue down the path of mindless profit we will be on a suicide mission that will unfold over the next century. Sincerely,
Elizabeth MacFarland, MM

Elizabeth MacFarland

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Whether you believe in climate change or not is irrelevant. Destroying the habitat of multiple species of animals, and destroying a forest which provides this planet with oxygen to keep us all alive, is shortsighted and driven by greed. Destroying the planet so you can get rich won't help if you die because you've killed the planet - something that actually exists - for money - something which doesn't actually exist.

Christine Rose

So precious our resources. Why would we not protect? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Katherine Stewart

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do not destroy an unique natural area for greedy exploitation.

D. Putnam

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Must stop destroying and start protecting earth and wildlife over logging, mining, oil. If not we all go down. Life over money.

Donna Dorsett

Our National Forests and Wild Spaces are the jewels of our national heritage as well as major regulators of climate change. The vast wilderness of the Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The rationale behind opening Tongass is that it will boost Alaska's economy, but only 1% comes from the logging industry, and isn't worth permanent consequences. Approving this directive will violate the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Debra Lono

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We can't undo the damage this will unleash on Tongass. We need to save these pristine lands for future generations. Thank you, Nancy King
Santa Rosa, Ca.

Nancy King

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change.

True 3rd party verified log management would be ok, under public opinion.

John

Weaver

I personally visited the Tongass Forest this past summer. The ecology and trees in the forest were beautiful and should be protected in the same preservation as redwood forests. Amazing ecology there you should visit first! It is very unspoiled there and imperative in the time of melting ice in the North to have these trees available in a large scale to sequestration of carbon for the entire earth. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is a very personal request for the preservation of our national treasures. This is the only rainforest in America. My feeling is that it must remain preserved for present and future generations. Ron Rose Napa CA

Ron

Rose

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Opening this national heritage and treasure to commercial exploitation and destruction means to take away from our children and grandchildren what belongs to them and future generations. We are betraying them! Shame on us if we are shirking our responsibility to be good stewards of the land and natural beauty that has been passed on to us by our forefathers!

Helmut Albrecht

Please *STOP* destroying
*EVERYTHING!!!! We need our forest,
our trees our clean environment, say
NO to *TRUMP* & his *MADNESS*!
Shame on all of you for what you are
doing! Tell the children of the *WORLD*
why you are doing this??? The
Tongass National Forest is of global
importance, and opening it to logging,
mining, or oil and gas has permanent,
detrimental consequences. This latest
attack on wildlife and forests has been
made under the guise that this will boost
Alaska's economy, when only 1% comes
from the logging industry, and isn't worth
permanent consequences. Trump's
directive violates the process of the
National Environmental Policy Act. NEPA
ensures that major decisions affecting
the environment are fact-based, consider
alternatives, and are made with public
opinion in mind. The loss of old-growth
forest will intensify the effects of climate
change.

Susanne Kiriaty

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is only one Tongass National Forest. Once it is gone or mutilated for fleeting profit, it can't be replaced. Please protect this national and global treasure for the future.

Dennis Koski

This current President has no respect for ANYTHING that will not bring him personal financial gain. The Tongass National Forest means NOTHING to him but profit for cronies. He cares NOTHING about the health of our planet. This Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Emily

Tracy-Haas

The latest attack on the Tongass National Forest by opening it to logging, mining, or oil and gas has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Allen

Hengst

TONGASS NATIONAL FOREST is beautiful and should be protected for future generations, not destroyed for dollars. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Karen

Harbour

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Whether you believe this wild world was created by god(s) or is the process of miraculous chance and billions of years of evolution, there is no thing humankind can create that is more beautiful, precious, perfect or worth protecting than this planet's diminishing wild lands. Please approach development with the utmost foresight and caution. We only get to do this once.

Patrick Robinson

The proposal to open the Tongass National Forest to resource extraction is ill-advised and outrageous. Tongass NF is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is of critical importance that this unethical proposal not go forward.

Hal

Enerson

Please protect the Tongass National Forest by continuing to prevent logging, mining, and oil and gas exploration and extraction. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Eve

Willhite

Timber harvested here is likely to go overseas, with no value added. You'd sacrifice an absolutely pristine outdoor lab for a little more corporate profiteering. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Paul

Franzmann

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As a part-owner of the Tongass National Forest I am entirely opposed to opening it for commercial exploitation and the attendant environmental destruction that will ensue. Leave this national treasure alone for the good of the planet and future generations! To do any less is unconscionable and a violation of natural law. David A. Lipstreu, AICP
Newar, Ohio

David Lipstreu

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you.

Eugene Gorrin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump doesn't care about the environment. He probably feels that he can just buy his way out of whatever environmental havoc he wreaks and to hades with those that can't. Time to stop him and those that consider the world being here for themselves to pillage for self centered greed.

Bob Hodge

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. It is unconscionable that you would even contemplate destroying the Tongass National Forest for the short term gain of a small group of private investors over the interests of the people of this nation. Such a move by your department, as directed by you, will not be allowed to go unpunished when this administration is over. Make no mistake, you will not get away with this. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Alaska is already being devastated by the effects of climate

Douglas Orians

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We just were in Alaska in August, and it really made an impact on us. Please do not let them touch the Tongass, nor any other National Forest. We need the trees more than the \$. Not to mention the animals. They were there first!

Edwin Gross

Judith

Arcana

Surely by now you understand how dangerous this is, and will consider your own life along with those of us who write to you. Opening the Tongass to logging, mining, or oil and gas extraction is a terrible idea; even those who only care about money will soon lose whatever their short-term profit appears to be. Trump's directive violates the processes of NEPA, and - so very obviously now - increases the terribleness of climate change.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is difficult for me accept that anyone acting in good faith could be so short sighted as to take this step.

David

Rabb

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I had the privilege and pleasure of walking through the Tongass National Forest last summer while on a Oceana Cruiseline trip to Alaska. The Tongass was beautiful the morning I walked through it with others on the cruise. We were led by a knowledgeable guide employed by the Forest Service. I want to see the Tongass National Forest preserved so other people can enjoy the same pleasures that I did. The forest is of global importance and I don't want to see

Richard Weingarten

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have a lot of nerve telling poor South American nations not to exploit their rainforests when we are doing the very same thing. Since you have taken over a position of the utmost importance concerning our environment, it would be a huge surprise if you actually worked to protect the Tongass National Forest. Your record to date has been one of support of using and abusing our natural resources. It's never too late to change your ways. Do the right thing and

Catherine Blackburn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change. Once you destroy this national resource we can never get it back.

Jeremy Seeger

Please remember, the present president, Donald Trump will not be in office in 2020. If you want to continue in public service please note the following. This is not a threat, it's fact. You will be wise to choose wisely. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. You have it in you to do the right thing.

Ronald Anderson

Keep the old growth forests like Tongass so that our progeny will FEEL the benefits over their lifetimes...thanks! Bernie

Bernie Byrne

importance. It is already working in its highest and best use and opening it to logging, mining, or oil exploitation is unacceptable. This is one of our largest "carbon catchers" and it provides free and important long term carbon storage. Exploiting this protected natural reserve in the name of improving Alaska's economy, when only 1% comes from the logging industry, isn't proper or in any way worth the permanent consequences. We need to plant more trees and permanently preserve more carbon sequestration zones, not harm them for ill-advised short term profit. Please act professionally and ethically, for the good of All the people, not for short term political purposes. Do your sworn job on behalf of the American people to uphold the process and intent of the National Environmental Policy Act. Disrupting old-growth forests would unnecessarily intensify the effects of climate change. It's time the EPA stood up to the President and his business backers. Here is an important opportunity and your perfect timing to do so.

Julie Carpenter

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I cannot imagine logging a forest of such importance, our legacy to those who come after us. Nothing is worth cutting down this forest and decimating the plant and animal life that flourish there. Do the right thing and preserve Tongass!

Gayla

Jamison

Mining and logging destroy forest ecosystems. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Instead of spending 60 billion on arms, let's spend a few million to protect and enhance not only the Tongass Forest but all our national parks and forests.

Dr. Edwin E. Daniel

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongass rainforest supplies a large part of the air we breathe. The rainforest is home to literally hundreds of species of plants and animals that exist nowhere else on this planet and the rainforest is the largest natural carbon sink in North America. None of these things would continue if there were roads paved into it and if there were logging permitted there. Its time to set aside greed and politics and leave the rainforest for future generations to

Tracey Loyd

For once, act in the best interests of the planet, not your bank account! This baseless destruction of an irreplaceable resource just to line the pockets of Trump and his cronies will contribute to climate change (YES it is real!) and threaten the very survival of humanity. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Donna Cassidy-Hanley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Pristine wilderness cannot be re-created once it has been sullied, and tracts of wilderness like Tongass are an integral part of our attempts to mitigate the climate change taking place worldwide. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dolores Reynolds

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Is Trump trying to exacerbate the climate crisis? Is he so selfish that he doesn't care if his own grandchildren grow up in a wrecked world without clean air or water? If we won't protect the Tongass for its animals residents and itself, we should at least protect it for our own selfish reasons. We need it to help us survive.

Judith Gallagher

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. WE ALSO NEED TO PROTECT THESE SENSITIVE AREAS FOR FUTURE GENERATIONS.

Brenda Hill

It is past time to reconsider practices that contribute to Global Warming. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. David

Bryan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Old growth forests are increasingly threatened and it is vital to protect the remaining stands. Thank you. John Herman

John

Herman

The government needs to protect our National Forests--not create situations whereby they will be negatively affected by logging or oil and gas drilling or mining. These activities don't belong in our forests because they specifically HARM wildlife. The Tongass National Forest is no exception. It deserves our protection. Alaska's economy will survive very well without the logging industry's or the oil and gas industry's or the mining industry's destructive actions. Especially since they only account for 1% of the Alaskan economy--and it isn't worth the disastrous consequence that would ensue once these industries actually are introduced and allowed to get a foothold on our forests. Trump's has no clue about the National Environmental Policy Act, which strives to make its environmental decisions based on fact. Plus, the loss of old-growth forest will have horrific effects on climate change to boot! Sincerely,
Sherry Kessel 6874 Treves Way, Boynton Beach, FL 33437

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Eco-Mobilize! .

Nate DeVon Sanford

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. There is more for Alaska in tourism and fishing in this forest. The United States needs to be a leader in forest protection, and we have the Tongass as our jewel of a forest, a temperate rain forest, and we need to protect it from senseless destruction. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sharon Wilson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mary Ellen Copeland

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The damage that will ensue for generations to come if loggers are allowed into this forest will be indescribable! There is no way that Tongass should be destroyed! It's a disgrace that they're even thinking about this!!

Kathy Brensinger

Global deforestation, whether by fire or human actions, can cause irreversible damage to our planet and the life it harbors. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David

Wasley

destruction of this vast forest, which, like all forests, is a major, eons long contributor to the health and well-being of the whole planet, for the very short-term benefit of a relatively few people and companies. It is YOUR responsibility to take the long view and consider the long-term effects for American citizens and the eco-systems we depend on. Please do not open the Tongass National Forest to logging, mining, or oil and gas extraction. Mary Mayer The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth

Mary W. Mayer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Keep as many trees as possible to help absorb atmospheric carbon and thus limit the damage of climate change. We especially need the Tongass National Forest for tourism. It is also home for many creatures. Would you be willing to tear down your own home for the sake of the economy and the greed that unfortunately comes with it.

Barry

Klein

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Destruction of this area by logging and by pollutants common with mining, drilling and fracking endangers the lives of the fauna and flora of the region. We strongly object to the further ruination of our world's fragile environment.

Jane Frey

The Tongass National Forest is of global importance, and opening it again to logging, mining, or oil and gas will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent consequences it will cause. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change at a time when our tree canopy needs to be increasing, not decreasing to combat those effects.

David

Bluhm

How can you live with yourself? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alison

Munday

Does no one else have children that we are so wantonly destroying the few natural resources we have left? Trump is not a trustworthy individual, and I'm working hard to say that in a decent way. Does it not bother you that this violates current environmental policy? Does no one else find solace in the few wild places we have left? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

N. DeNazario

I am tired of Trump spitting at our laws of DEMOCRACY. He has been fought in court and chastised by Judges. I will not elect TRUMP . He is the worst PRESIDENT for all sectors of our environment. In the pocket of oil, gas, chemical and elite extremists. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kim

Perreault

country's largest forest. The carbon it stores in its centuries-old trees and soil, and the habitat it provides to countless species, makes it of critical importance not just to our national heritage, but to the entire world. Opening this treasure to logging, mining, or oil and gas development will result in permanent and damaging consequences. This latest attack on wildlife and forests has been made under the guise that it will boost Alaska's economy, when only 1% comes from the logging industry. Our ecosystems cannot sustain the irreversible harm we keep perpetuating in the name of extractive industries. Further, this directive violates National Environmental Policy Act (NEPA) process. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Any loss of old-growth forest will only intensify the effects of climate change. I know this, and you know this. Please, see the forest for the trees, and steward the Tongass National Forest responsibly. In the name

Brian

Mickelson

mentality? You are taking one chocolate for yourself now, without making sure that there will be any chocolates for future generations. Does it make you feel good to steal from future generations? Are you laughing about the misfortunes of others that happen entirely because of your GREED? If so, you are the archetypal bad guy from every movie ever made. Try being good instead of evil! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate

Michael Neale

In view of what is happening in the rest of the world, we have to protect all forests over which we have control, especially the Tongass National Forest. Please act to ensure that logging and mining restrictions are maintained so that the forest's biodiversity is not endangered. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Rosenberg

I cannot believe this is even a question in 2019. Ducking the duty to protect OUR lands is obscene. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Christina Wilgren

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have been in this forest. National Treasure, Climate Regulator, Historical Icon...ALL of these matter and that's what Tongass is! Replant elsewhere instead of the lazy man's way out. potus doesn't give a damn about anything in Nature. he'd pave the world if it meant more money for him. Do you think he's going to take all of his money with him when he dies? He'll leave us like the world in The Lorax is all...

Denise Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our national parks and forests are a precious heritage which we should be able to preserve intact for future generations to enjoy.

Lore

Weber

The Tongass National Forest is globally important. Opening our greatest forest to logging and mining and fossil fuel development has permanent and destructive consequences. And these consequences are not limited to Alaska. The entire world will feel the detrimental consequences. This latest attack on wildlife and forests has been made under the guise of boosting the Alaska's economy. But this is "The Big Lie" because only 1% of Alaska's economy is from the logging industry. Even doubling that to 2% isn't worth all the required destruction! Trump's directive violates the law. He is ignoring the required process of the National Environmental Policy Act. NEPA guarantees that major decisions affecting the environment must be fact-based, consider alternatives, and are made with the real owners, the American public, in mind. The loss of old-growth forest will magnify the climate crisis.

Bruce Hlodnicki

Earth was created by God; protect it. Do you think God's going to be impressed with your credit scores when you stand before Him? Stop killing God's creations for profits! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump is a traitor and you know it. If you support him, you are a traitor also, and that's how you'll be remembered. For the love of God, put your country and the environment first, instead of profits.

Timothy Gilmore

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For the sake of my children & future generations, do not allow decisions with devastating environmental consequences that that cannot be undone.

Meghan Underhill

Please do not touch this forest. Our national parks are a national treasure to be protected. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Tracy

Ball

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. TRY HELPING SOME TRUE NATIVE AMERICANS....YOU KNOW THE ONES THAT REPUBLICANS GO ON AND ON ABOUT!!!!!!!!!!!!!!!!!!!!!!

Cindy

Janac

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. How tragic to earth history and our national history of caring for the earth to allow its destruction. We need the forests and wildlife. They are an essential part of us - humankind.

William Edwards

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. You must stop the destruction and save our Forest!

Fay

Murphy

I am deeply concerned by the actions of this administration and the lack of foresight for future generations. THIS IS ABHORRENT, enough of the degradation of our countrys most valuable assests. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Catherine Balan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do all you can to protect and preserve the Tongass National Forest.

Gary

Albright

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is an urgent need to protect all of our natural landscapes, but especially forests like the Tongass.

Mary

Turgi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Tiffany Veit

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do not let this destructive action occur. Greed cannot be the overriding factor here.

Krista

English

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, disastrous, short-sighted, and totally counter-productive consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is a climate emergency people. WAKE UP!!

Erica

Crytzer

THE SIGNIFICANT IMPORTANCE OF THIS FOREST IS SO GREAT TO THE HEALTH OF ALL PEOPLE ALIVE NOW AND IN THE FUTURE IS THE MOST IMPORTANT THING FOR THE ABILITY OF ALL OF US TO BREATHE. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences.

POISONING ALASKA WILL NOT ENRICH ANYTHING!!
!!
!!!!!!!!!!!!!!!!!!!!!! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Maureen Allen

It is a complicated world, but some things are very simple (although perhaps not easy). In a world with a rapidly warming climate due to the accumulation of greenhouse gases, the Tongass National Forest simply must remain roadless and intact. Any other outcome simply make no sense when you look at what will benefit the greatest number of people. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Charles Tazzia

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. also, look at the lost revenue that opening up the TAongass would make possible. Lost hunting, fishing, hiking, canoeing and bird watching dollars forever. Millions of tax dollars spent cleaning up oil spills and repairing damage to the environment. In addition this is an illegal action. It is one that specifically goes against the act the esgta blished the EPA. Trump's directive violates the prf the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

John

Colgan-Davis

Please stop the opening of The Tongass National Forest, which is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Please. Please. Please! Amy Hines

Amy

Hines

The Tongass National Forest is of global importance, thus opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, the economic boost to Alaska is a shameful sham. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment - the place where everyone lives every day - are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Yvonne Hansen

We cannot claim to love our country and not cherish, preserve, and protect American lands in all their unique beauty and diversity of life. This land is our temple, and we must keep it from being overrun by the money changers. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Andrew Pudzianowski

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. No one can undo permanent consequences. Are you thinking long term? Are you thinking how this will affect our great-great-great grandchildren? Please don't make your decision based on how much a few industries will make over the next twenty or thirty years. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Russell Jenkins

Please please think of how beautiful this earth is . Please think of your children’s future. Please research other sustainable substitutes that don’t destroy eco systems. Please know that it took earth millions of years to create this type of beauty. Please respect this beautiful earth. We are human. Part of nature, but not above it . Please do what is within your power to protect it . The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska’s economy, when only 1% comes from the logging industry, and isn’t worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ginge

Bynum

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is time for humans to start being responsible. Our quality of life is dependent upon the health of the global environment. Greed has never produced a happy ending.

Averil

Loague

The Tongass National Forest should NOT be opened to logging, mining, and oil or gas exploration. That would have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the pretense that this will boost Alaska's economy, when only 1% comes from the logging industry in the first place. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mary

Stock

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to fight greenhouse gases and not build for more by the use and mining of more fossil fuels. Stop this madness and start fighting climate change by using green energy, not destroying the forests and wildlife for products we are getting away from and will not need in 10 years. Sincerely,
Roberta Meserve

Roberta Meserve

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an unpopular, shortsighted plan that will do more long-lasting harm economically and environmentally than you are willing to acknowledge. You will be accountable for your actions to history and to God. We will not forget. The results of your actions will be scarred on over these lands in Alaska as a result. Think of these consequences and then choose to continue protecting the Tongas National Forest.

Carolyn Rhazi

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lynda Johnson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. YOU ARE A WORTHLESS PILE OF SHIT THAT BELONGS IN THE SEWAGE OF LIFE!!!!!!!!!!!!!!!!!!!!BOTH YOU AND YOUR COCKSUCA!!!!!!!!!!!!!!!!!!!!

Miriam Baum

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Help us all breathe. We need to cut back on exhaust emissions. Trump continues to devastate our country. Unacceptable.

Linda Smith

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. _____ save our priceless and irreplaceable spark lands

Ruth

Kram

The United States has been blessed with the natural beauty of its National Forest system for all to enjoy. The Tongass National Forest, in particular, is a national treasure and of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Neeloo Bhatti

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I remember fighting to protect the Tongass, fifty years ago. It is more precious today than it ever was. This is God' Forest. For God's sake, save it!

Sibyll

Gilbert

This matters! We do not want roads into what remains of our wilderness. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must guard our last remaining wilderness from exploitation of this kind. Roads must be kept out of the Tongass National Forest,

Mary Sherw Brock

environmental scientist and a citizen, and I am writing to urge you to maintain protections of Tongass National Forest. There is substantial evidence that even selective logging (as opposed to clear-cutting) reduces biodiversity and degrades habitat. There is further evidence that intact forests protect watersheds, maintain hydrological functions in ecosystems, maintain aquifer functions, and are responsible for water quality. Permitting ecologically dangerous activities like logging, mining, and fossil-fuel transport in a sensitive forest ecosystem is wrong, and is bad for the ecology and bad for the people and species living in the region- and the watershed! These are PUBLIC forests that belong to the American people, and selling access to private industry is not in the best interest of pur country. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost

Serenity Montaña

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop turning the EPA into the EDA (Environmental Destruction Agency)!

Francesca Nichols

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Any actions such as this will lead to the extinction a great many species, which may include human beings.

Bill

McNally

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy when only 1% comes from the logging industry and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of the old-growth forest will intensify the effects of climate change. My husband and I had the opportunity to visit Alaska this past May with a cruise/land tour. Part of our trip included a floatplane tour of the Tongass National Forest. The evidence of clearcutting from decades before is pretty apparent by the change in color from the old-growth to the new and quite frankly has already altered the structure of the forest. To open it up again will have catastrophic ramifications for decades to come. Please leave it

Ursula Schneider

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Future generations should have the opportunity to see this wonderful biosphere; without the permanent scars associated with today's logging, mining, oil and gas development scars!!

Lance

Weyeneth

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Respectfully caring for the planet we all live on is a win win!

Patricia Fernandez

I am so sick of our government selling of our beautiful priceless natural resources to the highest bidder!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Meliss

Waterhouse

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. NO to anymore Degradation of this forest. NO to allowing it's destruction!! Save the forest save the planet. Money cannot buy our survival!!

Chris

Nelson

Do not open Tonga's National Forest to logging. I strongly oppose this environmentally irresponsible directive. We desperately need trees and our forests to sequester carbon and support the natural cycle. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jennifer Leblanc

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please retain the Roadless Rule! What has and is happening to the Amazon should be a wake-up! - Don't let it happen here. - Dr. Paul Posnak

Paul

Posnak

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. IT IS PAST TIME TO START RESPECTING THAT WE LIVE WITHIN FINITE RESOURCES ON ONLY THIS PLANET. ARE THE LEADERS CRAZY TO NOT PROTECT AND CONSERVE RESOURCES NATURELE?

Susan Michetti

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This planet is fragile and our only home. Profit is useless if we destroy the earth.

Carolyn Hebert

As an Alaskan I oppose the degradation of the wonderful forest for short term financial gains. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott

Miller

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Destruction of a natural habitat can only result in grave consequences to Mother Earth. Stop this assault. This can only bring great sorrow to all mankind.

Obed

Fernandez

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. NO NO NO!!! Leave the Tongass alone....

Marilyn Brunger

want to destroy as much of our world as possible. They have already allowed shale oil to be spilled in some of our best farmland - the pipeline leaks have already begun, and the damage will weaken our country's food supply for generations. Now they're breaking the law - the NEPA - to try to destroy an irreplaceable forest. They claim it's for the economy, but destroying the Tongass National Forest won't do a thing for our economy. All it will do is line the pockets of certain men who are already rich. Logging, mining, and drilling for oil and gas have permanent, detrimental consequences. The Tongass National Forest is part of how our climate protects itself. Destroying it - and opening it will destroy it - will make our weather even worse. Only 1% of Alaska's economy comes from logging, and hauling even that much to markets uses up oil resources. We don't need to lay waste to every corner of the earth. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting

Tamar Lindsay

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Get rid of the hideous Trump

Laurie

North

Have you read anything about climate change and the need for more forests?? The AMazon is being destroyed with impunity - surely we don't need to do the same as the ignorant Brazilian government. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mary

Needham

The Climate crisis is the greatest challenge facing us and governments, corporations and communities need to do all we can to mitigate the devastating impacts. Forests are critical carbon sinks. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

ELEANOR KINNEY

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Begging for sanity to prevail. As humans we are responsible for protecting our land, our water, our air not defacing and destroying what cannot be replaced.

Victoria Cox Eastep

The Tonga's National FOREST is too important to the world's environmental to be put in jeopardy! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Susan Salter

Please ponder the significance of the Tongass National Forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please Please Please protect the forest!

Lisa

Fahey

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This cannot be allowed to happen!

John Knutsson

Please don't cave to special interests groups and instead, work to protect all Americans' land. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bettina Rosmarino

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is the most environmentally destructive administration we have ever had. Current circumstances demand that other governmental agencies step up to counter this disaster and do the right thing. Please do the job your department was created to perform and protect our limited and disappearing natural resources.

Bonnie Rhoads

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our forests are necessary for carbon sequestration.

Patricia Sims

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PROTECT IT, PROTECT IT, PROTECT IT!!! I've been there. HAVE YOU? Do you have ANY idea what you're about to do? I CHALLENGE you to go visit and spend a little time there before you take any action. WILL YOU, or will you blindly move forward against the will of the people? MILLIONS feel the same way I do!!

Floyd

Dix

PLEASE CARE. THIS IS IMPORTANT. WE MUST SAVE WHATS LEFT. OUR WILDLIFE HAS NO VOICE BUT WE DO AND PLEASE STOP THIS CRUELTY ON ANIMALS AS WELL AS TO PROTECT THAT LAND. THE DETRIMENTAL CONSEQUENCES ARE TO HIGH OF A COST TO PROCEED. SO PLEASE DON'T. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. THANK YOU FOR YOUR TIME. LETS LISTEN TO EVERY ONE WHO IS SPEAKING UP. WE CANT TURN BACK. MELINDA LAMBERT

Melinda Lambert

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. LOGGING IN A RAINFOREST????????????????????? STOP, STOP, STOP!!! I don't understand the ignorance involved here! STOP NOW. The Tongass National Forest MUST BE PROTECTED....MUST BE PROTECTED!

Irene Martone

Robert McBride PhD

Just protect it!

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PLEASE LEAVE THE FOREST ALONE...IT SERVES TO KEEP THIS PLANET ALIVE....THANK YOU

Paul

Maysonave

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's (AKA the orange menace) directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott

Sesher

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The American Public is sick and tired of Trump allowing his cronies to monetize everything that is good about this country for their own personal gain.

Kathleen SEWRIGHT

We have one chance to get this right, because once it's gone, it 's gone. Not worth short-term gains.

Jennifer Hawkins

Good golly, let's leave the wilderness alone! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Marielle Marne

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Finally, the area is of vital importance to the native peoples of the region, whose opinions, input and rights have been marginalized, at best, since first contact with European colonists.

Steve

Kragon

Because every remaining old growth region we've got is more important to the health of our world than EVER before, the Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Aleks

Kosowicz

The Tongass National Forest is the world's largest intact temperate rainforest--for that fact alone it is worth saving and preserving. To open this forest to logging, mining, or oil and gas is unconscionable. This thoughtless, profit-driven action will have permanent, detrimental consequences. Every bad environmental decision promises to boost something in this case Alaska's economy. In fact, only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Pam

Elders

There's nothing more important for the future of the world, for our children and future generations, than protecting what precious remnants of wilderness we have left. Please protect the Tongass National Forest! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. Lamee

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent destructive consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Judith Vogelsang

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do NOT open the Tongass.

R

B

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

A P

Koedt

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas will have permanent and extremely detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only one percent comes from the logging industry. This isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Barnett

Magically beautiful Tongass National Forest is of global importance, and allowing logging, mining, or oil and gas will have tragic permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

mark

Walker

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change."CAN YOU ASK FOR A MEETING WITH PRESIDENT TRUMP AND EXPLAIN SOME OF THE FOREST COULD BE USED BY LOGGING BUT EXPLAIN HOW A FOREST ACTS AND HELPS PEOPLE TO BREATHE FRESH AIR AND PROVIDES A PLACE FOR WILDLIFE AND TOURISM WHICH PROVIDES WORK FOR LOCAL PEOPLE AND EXPLAIN TO HIM HOW HE IS INTERESTED IN BOTH WORK AND THE CLIMATE, AND SEE IF YOU GET ANY REACTION FROM THE WHITE HOUSE I

Noel

Martin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no just reason to destroy this carbon storage facility, provided by nature. Greed should not be the reason for our extinction.

David

Mucklow

Are you aware of the global significance of the Tongass National Forest? Do you care that opening it to logging, mining, or oil and gas has permanent, detrimental consequences? You are charged with the stewardship of America's wildlife and forests; NOT its sales agent. You know that despoiling these lands will not boost Alaska's economy. You know that only 1% comes from the logging industry. You know it isn't worth permanent consequences. Yet you bend to Trump. Why? You know that Trump's directive violates the process of the National Environmental Policy Act. NEPA was passed to ensure that major decisions affecting the environment are fact-based, considered alternatives, made with public opinion in mind. You know that loss of old-growth forest will intensify the effects of climate change. You know better.

C

Saul

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. THIS IS JUST STEALING PUBLIC PROPERTY BUT THE TRUMP ADMINISTRATION ARE CORPORATE GANGSTERS WHO STOLE 30 PERCENT OF ALL FEDERAL TAX CORPORATE REVENUE. THE FOREST SERVICE IS CORRUPT. THEY WORK FOR AN INDUSTRY THAT CAN'T MAKE ITS OWN PRODUCT. THEY CAN'T GROW TREES SO THEY BRIBE THE FOREST SERVICE TO CLEAR-CUT AN IRREPLACEABLE ECOSYSTEM BECAUSE THEY'RE PARASITES. EVERYTHING THEY

Robert Hyer II

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This and many other natural areas are way too fragile to use in economic recovery plans for North America. Native lands must remain protected and any global needs are beyond the last natural areas in North America to contribute a deforestation and frac/mining business plan for US natural resources or gross national product. These areas are critical ecosystems, which are exclusively for environmental stewardship and represent habitat for the last traces of native plants, trees, animals, and including water systems! There is no way I can consider human impact on this Forest to include timber harvesting and roads. Very inappropriate actions, which look closer to global terrorism in North America. Stop this violence against

Roseanne Andrade

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We all know that life on Earth is fabulously interconnected and we are still discovering that even further day by day, case in point is climate change. But there are numerous other factors and examples and when faced with long term consequences vs. short term gain, then we must act for the long term. **DO NOT OPEN THE TONGASS TO LOGGING OR MINING!**

Rich

Toyon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. Toni

Garmon

consideration have come together in this decision to decimate the Tongass National Forest, which is of national and global importance. Anybody with commonsense and compassion knows that opening it to logging, mining, or oil and gas exploration will create permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. What few individuals in the logging industry will benefit is the question; and who is in their deep pockets? There are many more sustainable, reasonable ways to boost the economy of Alaska or our nation. As keepers of the public's resources, I fully expect alternatives to be seriously taken into consideration by the Department of Agriculture. Go walk around the Tongass with scientists who have studied it for decades before making any decisions that will ruin the forest and its ecosystems. Go into the Tongass with the indigenous peoples and

Deirdre McCullough

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy when only 1% comes from the logging industry. This isn't worth permanent consequences. The Administration's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are: fact-based; consider alternatives; and, are made with public opinion in mind. Additionally, the loss of old-growth forest will intensify the effects of climate change.

Leon

Van Steen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect our land!!!!

Suzy

Levine

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our forests are not replaceable. We must do all that we can do to protect our natural resources. Thank you for caring,

Patricia Dawson

Bill Thielen

Dear Secretary Perdue, Please protect
this unspoiled land — the Tongess and
for now for the world to come. Sincerely,
Bill Thielen, San Rafael, CA.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. **IMPEACH DONALD TRUMP AND THIS THREAT GOES AWAY**

Lawrence Held

I am an Oregon grandfather who wants to preserve the Tongass national Forest as a legacy for my children and grandchildren--and yours--and for kids and grandkids everywhere. The Tongass is our heritage and must be preserved. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have been to Alaska on vacation and witnessed first hand the massive Clearcutting in the Tonga's, on which we the Taxpayers LOSE Money so Japan can buy Cheap Lumber for Papermaking!! These Clearcuts ruin the Tourism Industry which employs more people than the Logging Industry!!

Robert Dries

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We humans with our insatiable greed are eating the earth alive. Business is a tumor, profit is a malignancy that fattens a few greedheads. Devastation is the ruined wasteland that is left. Fuck big business and their stench for trying to make the earth dead. I don't feel polite here, stay out of Tongass, Sonny, and keep your lunchhooks away from the snap program. I'm sure La Trump loves you. but you are violating the rest of us while smiling. Leave Tongass alone, do

Jim

Perry

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Madeline Bassin

Let's see, I know, how about a Trump golf course, multiplex hotel. Why not? He could hold the climate talks there while the trees are being cut. Maybe use the trees in his multiplex. What a great business, capitalist idea! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lorraine Panciera

Please protect the Tongass National Forest!! It is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must band together to protect old forests, especially old-growth. If we don't, we may be guaranteeing our extinction.

Pamela Chambers

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I refuse to stand by, shut up or not be heard. I vehemently oppose Trump's attack on MY Tongass National Forest. It belongs to me, & the American people, as well as indigenous people, in perpetuity. Trump has no right to touch the heritage of the American people, or the lungs of the planet. This stops NOW!

Elizabeth Blythe

It is time to put away the administration's shortsightedness and do the right thing. You are well-aware - or at least you should be - that the Tongass National Forest is of global importance, and that opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The President's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jim

Carley

Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Please keep checks and balances operating in our wild spaces. We need each animal to play their part. Thanks so much. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Stephanie Sekellic

days covering thousands of miles with my 14 year old son. I spent thousands of dollars on the trip. I would not have spent that money to visit the remnants of a forest after the trees were cut down. The economy of Alaska will be severely damaged by lumbering in the National Forest. Opening the Tongrass National Forest to rape by the logging industry is a give-away project to a small few. That timber belongs to me and other Americans including my sons, the children of my older sons, and Americans not yet born. Giving away public property for private gain is wrong on many levels. You have no right. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. As a Christian assigned by God to defend the Earth, I am appalled. Trump's directive violates

Bret Pritchett

Ariel

Capps

I do not know the full story or the full decision but I do know that the stripping if this Forrest should not happen. And who ever is going to allow it, I want to stop.

Save the Tongass Forest lands! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Maryanne MacLeod

logging should be strongly rejected for numerous reasons. First of all, at a time when countless animal species are going extinct or being threatened by habitat loss and climate change, this would clearly put numerous species that are dependent upon the Tongass at higher risk of extinction. Secondly, as forests are being decimated around the planet, logging the Tongass or opening it up to mining and related exploitation will multiply the effects of global climate change which we are currently witnessing and paying the human and economic price for. Thirdly, the resources within the intact Tongass are relied upon by the native communities within the region and should be left intact. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's

Daniel Wend

ON!!! HOW CAN ONE INSANE PSEUDO PRESIDENT HAVE THE AUTHORITY...NOT TO MENTION THE NERVE... TO COMMANDEER WHAT BELONGS TO ALL THE CITIZENS OF THE UNITED STATES. DON'T LET HIM DO ANY MORE DAMAGE THAN HE ALREADY HAS!! HE'S TRYING TO MAKE AS MUCH MONEY AND DO AS MUCH DAMAGE AS HE CAN BEFORE HE'S IMPEACHED. SO YOU CAN STOP HIM COLD...AND FOR GOD'S SAKE... AND OURS...TAKE THE NUCLEAR CODES AWAY BEFORE HE EXACTS HIS ULTIMATE REVENGE FOR A NATIONAL MAJORITY WHO DIDN'T VOTE FOR HIM AND WOULD LOVE TO SEE HIM GOOD & GONE!!!!!!@@ The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change.

Cindy

McCarthy

Rod

Knight

Opening up the Tongass National Forest to logging, mining, and oil and gas exploration is a Lose-Lose situation. The Tongass is the largest temperate rain forest on earth, and we as a nation have recognized its importance. We should not change this position. It will harm the environment and its creatures in a very direct way, and in the long run, it is well known that the loss of old-growth forest will intensify the effects of climate change. To weaken the protection of the Tongass will harm our reputation as a world leader in conservation.

It's time, for once, to do the right thing for the environment instead of exploiting our natural places for profit. These lands belong to us, the American people. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mirinda Kossoff

National Forest. Simply: As the forest around the world are logged off, civilization is threatened by global warming. Forests are vital to all life in earth. They make an exchange by taking out CO2 out of the air and exchanges it with O2, which is vital to all life. It takes 200-300 years to grow these "air cleaners" to do the job of keeping our air breathable. The US has already destroyed our forests in the northwest and the northeast. We cannot afford to lose anymore old growth forests in the US. As a matter of fact, every country in the world must protect their old growth forests, plant new indigenous trees in order to save our global environment. That means the US, too. I agree with the below letter. Sylvia Zingeser Northwest back packer The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and

Sylvia Zingeser

There are things more important than money and climate change is one of them. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change.

Kurt

Janz

importance, and opening it to logging, mining, or oil and gas drilling will have permanent, detrimental consequences. This latest attack on wildlife and forests will have minimal benefit for Alaska's economy. The Tongass needs to be preserved for the sake of wildlife, as a valuable carbon sink, and as a wilderness area for people from around the world to experience and enjoy. This forest needs to be protected in perpetuity. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Trump administration's complete disregard for the environment and climate change is totally reprehensible. Our protected lands and forests were designated for protection after careful consideration and must not be violated to satisfy corporate greed or the whims of President Trump. Hands off!

Hannah Mitchell

importance to humanity, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences for my children, and theirs, and so on. This is a recurring concern for the Tongass - and all temperate and tropical rainforests, alike. The air we breathe, the water we drink, relies on these forests staying as intact as possible. Brazil's administration allowed for catastrophic devastation of their rainforests - also a global resource. It's crucial we don't make the same mistake. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's your decision - but I'm letting you know that my input

Sara

Prout

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is unfortunate that not only are the Trumpies ignorant of the law, do not care about the law, and do not possess a love of justice.

Gary

Cook

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. These actions, if carried out, are unconscionable and should cease as of this moment. The directives of the NEPA should be followed and not be detailed by nonscientific greed based decisions.

Tani

Watkins

Please leave our forests alone. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Peter

Tafari

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Think about or children

Tim

Bishop

I've been lucky enough to visit the Tongass National Forest, and there's nothing like it. It's of both global and personal importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences that can not be revoked. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ann

Seligman

Instead of the Republican party thoroughly ruining the environment for future generations how about you jackasses do something right for a change! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Glenn Novak

Politics aside... that's not so easy in this environment, but I believe that the long term ramifications of opening up this forest is the wrong move for all of us. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Chris

Adirente

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect one of the last iconic wilderness areas. Future generations will look upon our decisions today. Alaska does not need timber from the Tongass to strengthen its economy. Leaving the Tongass intact will strengthen Alaska's economy as future peoples will want to see and experience this amazing area.

Scott

Bowling

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Science has established that the fossil fuel industry production through 2030 would need to be reduced by nearly 50% to meet the goals of the Paris Agreement. There is no rationale reason to destroy this natural reserve.

David Doering

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Read this again; the economy argument is not only misleading, it is dead wrong. Consider the tourist sector in Alaska. Just as importantly, Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. So, on one hand, The loss of old-growth forest will intensify the effects of climate change; secondly the economic argument is bogus on its face; Thirdly, the process has been undermined. You need to deny opening up Tongass National Forest on all three grounds.

Theron P. Snell

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. These effects will severely damage agriculture all over the US through flooding, drought and temperature fluctuations. We have already seen the harm done to crops this year and it will only get worse if we don't address climate change. As Secretary of Agriculture, you should already know this, the vast majority of Americans understand there is a real problem, that oil and gas are the problem and forests, especially old-growth forests are the

Shirley Jolliff

The Tongass National Forest is incredibly beautiful. Ferns, grasses, fungi all growing on fallen trees under enormous living trees is breathtaking. Please protect this beauty for future generations. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mary and Ne Witherspoon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop giving away our national heritage for short term private sector profits.

Russell de Grove

It's outrageous to me that The Tongass National Forest, one of our country's greatest natural treasures, would be up for grabs when so much of wildlife and forests are already gone in the contiguous United States. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an important decision. Shall we start trying to save the planet or continue its massacre?

Ann

Barnett

WE MUST PROTECT EARTH'S TREASURES WHILE WE STILL CAN!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Gary

Shamshoian

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is clearly short-sighted, counterproductive, illegal, and particularly unethical to open the Tongass National Forest to industries that will permanently harm this vital resource and life-giving gift from the Creator.

Rabbi Simkh Weintraub

Our forests are the worlds lungs. We humans must value this living system and protect it for future generations. Corporate profit is a very poor value when the health of our planet is at stake. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nancy

Woodward

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is just amazing to think that this beautiful boreal forest is under attack for development. The flora and fauna of this forest were there long before human beings were. Human beings do not need to destroy any more wilderness. We NEVER get back what has been destroyed. Please do your job and protect the Tongass National Forest.

Mindy Newby

Please consider the following: I've just learned that "humanity has wiped out 60% of mammals, birds, fish and reptiles since 1970, leading the world's foremost experts to warn that the annihilation of wildlife is now an emergency that threatens civilisation." Do we really want to open protected areas to further environmental exploitation and degradation? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kurt

Asplund

importance, and opening it to logging, mining, and/or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy. Because only 1% comes from the logging industry, these actions are not worth the permanent consequences all will experience. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change and we will see how this affects us, and the world in negative ways. Please, listen to those who have brought the opposite view from our current administration. There needs to be a way to move forward and not continue the "old" ways to do things that continue to destroy our environment. Thank you for considering this opinion and choose life over death.

Juliana de Tarnowsky

No, this must not pass in the name of all who care for the earth and the generations to come. Please be thoughtful about this decision. The time for short-term gain and short-sighted decision making is over. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change and only add to the suffering of humanity in a world where the beauty and vital importance of living ecosystems are not honored and preserved.

frances tani hasegawa

The Tongass National Forest is of vital global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth reaping devastating, permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please act accordingly. We CANNOT afford to destroy more natural habitat~!!!

Gail

Camhi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. How many temperate rainforests are there in the world? We can't afford to destroy this one.

Kathy Schleicher

be opened to logging, mining, or oil and gas. These activities ruin natural has permanent, habitat for animals & do nothing to improve the environment for humans. This move will aid big business & be detrimental to the health of the forest. If this continues there will be no way to cool our country & the world. The outdoors cannot cool off with air conditioning. Forests are the air conditioners of the outdoors. Will fracking & drilling & cutting down trees really improve Alaska's economy? Don't you think that tourism would create more jobs? I believe that the main natural treasures in Alaska are the untouched environment. Just 1 look at pictures of a forest destroyed by drilling, fracking, & lumbering would leave any citizen aghast unless they were executives in these industries. Those wonderful rivers filled with salmon & other fish will disappear. Living in North Florida I have seen dead rivers & changes in the Incredible Wakulla Springs. The presidential directive is contrary to the National Environmental Policy Act. NEPA

Mary

Shannahan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.fredrica waldman

Fredrica Wal Waldman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not destroy our precious planet and wildlife. Please allow us to take care of our planet.

Angelana Avila

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am deeply concerned that NEPA guidelines are not being followed and that American governmental policy is being guided by greed and ignorance, or denial, of the climate emergency that faces our world. The Tongass National Forest is just one case in point. Please protect the Tongass National Forest from this kind of attack.

Cynthia Stamy

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. One million species are the verge of extinction. We need to do everything we can to protect the species that call our corner of the planet home. Please protect the Tongass National Forest!

Natalie Chapin

Beth

Brombach

We will be judged by our greed and apathy, if we allow this national treasure to be destroyed for selfish interests. Why is this even being considered??????

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The negative consequences of destruction of Alaskan forests must be considered. This includes the irreparable harm to biodiversity and the loss of carbon sequestration capability of our diminishing forests.

Ronald Whitmore

The news about yet another destructive action and without regard for the environmental impact in the Tongass National Forest is devastating to me. I can't believe how irresponsible opening up areas like these are! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Very disappointing!

Paul

Crosson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Anyone making decisions about this extraordinary resource should be required to go there....walk in this place.....breathe the air....listen and see the life you will effect. I believe we are "caretakers", not "takers". Once gone it will not return!

Sandra Kutarnia

The proposed logging, mining and oil and gas development in the Tongass National Forest is deeply upsetting because it will cause permanent destruction to the entire region and surroundings. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth these consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Meg

Chrisler

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the false notion that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Wilbert Aronow

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Apparently Trump does not care what his children, grandchildren, and other members of his family under the age of 18, will not have in their futures. Sincerely, Kay E. Althouse

Kay

Althouse

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The National Forests belong to ALL Americans, not to those who want to destroy them for their personal enrichment. This ecosystem supports plant and animal life in what is the largest intact temperate rainforest in the world. This ancient forest produces oxygen and stores earth warming carbon dioxide. We should not be destroying our treasure for greedy speculators.

Marie Long

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. You need to look down the road to our future rather than a small amount of profit now. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sheryl Burrows

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Given the minor role that logging plays in the Alaskan economy, there will be little benefit to it. However, it will have a major negative impact on the existing biodiversity that Alaska has been blessed with.

Thomas Leathem

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Call the growing evidence of damage to our environment what you will, if "climate change" doesn't fit your political agenda--though Oxford dictionary called "climate emergency" the word of 2019, indicating that the damage is recognized by English speakers as something more than change: an emergency. Evidence that we must protect our national forest. Please be a leader and look at the evidence, and act to protect our country: Do NOT open the

Martha Lerski

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to be protecting more of our natural resources, not destroying the precious little we have left.

Jon

Purvis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The loss of forest covered land will also endanger the soil on which it stands, making the land vulnerable to erosion that will eventually reach the ocean and endanger fishing off the coast-- a major source of jobs for Alaska. Please do NOT permit logging, mining or oil and gas extraction within the Tongass National Forest.

Eileen

Coffee

next hundred generations will never see them, and if we don't change our insane values, Americans may NEVER see them again! Is the payoff really worth depriving the present and all future generations of their pristine beauty, not to mention their enormous capacity to clean and oxygenate our polluted atmosphere. Folks! It's time to step it up big time if we're going to save Home Sweet Home Planet Earth! And it starts with maintaining a sense of urgency (time is critical!) And it will take each and every one of us to do ALL we can to reverse Global Warming. Consequently, we will need to....one by one....DO ALL WE CAN TO LOSE NOT ONE OF THE OLD GROWTH TREES. The next step would be to stop throwing up strip malls and huge complexes that destroy trees and shrubs needed to produce oxygen for the ever increasing population. To do otherwise is a form of slow suicide! If we all don't ditch the laissez faire attitude and get busy doing our part, then in a very short time it will be too late to reverse and WE WILL CEASE TO EXIST!!!! The

Lynn

Lawler

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This ecosystem belongs to the planet which is losing its natural resources at a dramatically rapid rate. The U S has had the generosity to npreserve this ecosystem. Please do not destroy that world wide benefit. The minor incopme that come from opening up this ecosystem does not justify its probable lon g term destruction. The rest of the world is watching this possibilty and it sets a huge negative impact on other countries that are all too willing to

David

Monk

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. WHEN THIS IS DESTROYED WHAT WILL WE HAVE? TOILET PAPER ? THIS IS OUR LAND AND WE WANT IT PROTECTED FOREVER. PLEASE. EDWARD AND GAIL TEMPLE

Edward And Temple

The forests belong to and critically benefit all of us as well as its inhabitants. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Swain

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This forest has a very important! It far outweighs the terrible consequences that will come as a result! Look at what is happening ALL around the world because of the "Violations" done to it by humanity! President Trump needs to respect the rules of the NEPA Act that was created WAY before he became president. Please listen to the GreenPeace People! Thanking for taking the time to read my personal message, Cathy Dykema

Cathy Dykema

Please, please leave it alone. Americans can consume less. We do not need to consume this forest.

Jonet Sudduth

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

John

Schoenbeck

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protect this vitally important forest for the health of our planet. There are other ways to achieve economic stability without destroying the wild places that provide habitat for animals, clean air for all and beauty. Our world would be a poorer place without wild areas. Please, please, please protect the Tongass National Forest. Thank you.

Lorraine Skala

NThe Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Fred

Morris

Carrie Lyen

We cannot afford to lose any more old-growth forest. There just isn't enough left. Our thinking has to shift toward alternatives to finite resources - we need to use renewable, unlimited resources such as solar, hydro electric. Plus we can now start to use alternatives to wood for construction- such as materials made from recycled plastics. Please protect our public lands from this overdevelopment!

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have got to come to a point where we stop prostituting & destroying the Earth for profit or any other reason. Either that or we will soon have no Earth to live on!

Linda

Parker-Braxton

I worked for the USFS in the Tongass Nat'l Forest during the summer of 1967 and am very familiar with the area, it's beauty and importance as is, and the need to protect it from economic exploitation. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Robert Sullivan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must protect what we have to have more in the future.

Heather Bordner

The Tongass National Forest in my home state of Alaska, is of global importance, particularly in its' ability to sequester carbon from the atmosphere, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The scarification of the forest floors and the compaction of soils by heavy equipment, severely limit the forests ability to regenerate itself. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Michael Salzmann

It is so sad that the Tongass National Forest is always under threat. It is our greatest natural resource left, and all extractive industries should leave it alone for the sake of all Americans. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ainslie

Gilligan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our future depends on these forests.

Pamela Voller

The Tongass National Forest is of profound global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent destructive consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of irreplaceable old-growth forest will intensify the effects of climate change.

James Houston

accelerating efforts of the present administration to undercut regulations protecting our natural environmental treasures. I write specifically about the Tongass National Forest, which is a significant intact temperate rainforest. At a time when the forests of the world are being wantonly destroyed for the sake of the short-term profits of a few corporate interests, it is a disgrace to propose opening Tongass to logging, mining, or oil and gas development, all of which have already permanently damaged large parts of the North American continent. It has been established beyond question that the loss of old-growth forest exacerbates the detrimental effects of climate change. The present proposals from the current administration pose serious threats to the forest and the wildlife it supports; they are being presented under the pretense of helping Alaska's economy, even though it is not disputed that only 1% comes from the logging industry. The state and the nation stand to lose much, much more. It should also concern you that the

Alice

Donohue

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This action is madness! The entire world will be impacted by this foolish decision. Please do not vote for this action.

Donna Shavlik

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The USA has very little pristine wilderness and a great deal of managed forest lands, much of it held in private. As a nation, we have no need for the timber, oil and gas reserves of the Tongass, so it is absurd to destroy them now. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott

Lowe

Please, please save our national wilderness heritage for future generations! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Christopher Richards

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We all know Trump is unfit for the White House and he is going to be impeached. He has made it his business to weaken any and all protections for the environment in order to more enrich himself and his cronies. No action to open this or any other valueable environmental asset under Trumps law. We are in a climate emergency we must protect these lands.

Lisa

Warnes

There are certain areas that should be protected: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Aurora

Polletta-Green

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If every Alaskan resident already has a guaranteed check from the Alaskan energy revenues, then why do we need to "boost" Alaska's economy? If we have a surplus of carbon energy sources already in the US, then why do we need to increase carbon based energy production within the US? If we have all sorts of alternative and recycled materials resources available now, then why do we need to increase logging and mining in this reserved tract of land in

Patrick Herndon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Think of your children and grandchildren! Open your mind and heart!

H Starr Carpozi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Without forests we wouldn't have the oxygen supply we need for us to breathe! And Tongass National Forest must be protected for its wildlife. Opening it to logging, mining and oil and gas exploration would destroy it! ~ Rev. Robert Traupman

Robert Traupman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Drumpf's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Leslie

Grant

The Tongass National Forest does not belong to a few profiteers, it belongs to all of us and all life forms and is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Peter

Nilsson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect America's last wild places. No resource extraction can justify destroying Tongass

Mike

Stevens

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We cannot withstand much more of this administrations total disregard for our wilderness and wildlife. We desperately need our government representatives (YOU) to prevent these atrocities from coming to life.

Nancy Watson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth such drastic permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

d

carr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. That one president can have such devastating effects on our national heritage and environment is unprecedented and horrible! Stop the destruction!

Julie

Roller

I write to you in deference to your position and out of care for this world we all live in. I am horrified at the damaging prospect of logging proposals for the Tongass National Forest. This area is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences not only to the forest and people who live there, but also for the rest of the world. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent negative consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's time to take the environment and climate change seriously and show this by protecting the forest. Thank you for your consideration.

Julian

Dowding

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As one of your constituents, I hope you will do all you can to protect the Tongass National Forest from this short-sighted and profit-driven attack.

Gene Ammarell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Your planed ruining of this forest and the environment is a slap in the face of everyone in the military who fought to protect this country. You should be ashamed of your self.

Jan

Christensen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Additionally, Alaska will lose out on tourist dollars if this area is opened to industry. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please ensure that the Tongass National Forest is preserved and protected for future generations. Public lands should not be open for mining or oil and gas, but should serve as protected areas for wildlife.

Amy

Orange

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our descendents must be left a planet that is worth living on. I have given many inventions that have improved life, things like a radar display system that has reduced the probability of collisions at sea and in the air by many orders of magnitude. Isn't that worth something for the future.?

Robert Riggs

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As the effects of the climate emergency become more evident everyday, industry must not be the only guiding factor in decisions by our government, since the results to the economy are fleeting and the destruction is permanent. As a cost evaluation, it makes no sense. Short term gains for long term destruction is not a good model.

Clare

Piaget

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I believe Trump's decision is made because he claims he doesn't believe in climate change but 500 science Professors have made it known that they think Trump's view is wrong. This is why I think Trump is a denier is because he can just destroy our National Parks and the Tongass National Forest even though it is vitally important to so much of our world because it helps to soak up the carbon out of the air. Trump cares nothing about preserving things only in how much

Mary

Reilly

Please pay attention before it is too late!
The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nancy Hale

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once these natural areas are destroyed, they are gone forever. Please use your power as Secretary of Agriculture to protect this valuable resource.

Jane

Whiteside

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As a retired Forest Service employee who worked in the NEPA arena and to me it is critical that the government follows the directives and processes within the scope of NEPA. Not doing so would be a violation of the law.

Stephen Couche

Christine Tarn

Destroying nature is destroying life !

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Don't let this travesty happen. You must stand up to Trump and his destructive policies before it's too late. Do the right thing, and say NO to logging, mining or any other means of destroying our valuable forests.

Denise Featherstone

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump does not care about animals or wildlife..

Anne

Baldwin

Time to do the right thing and leave the Tongass National Forest alone - as is and how your good intended. As everyone knows - The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Once again - Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

STEVE RIDLEY

As a physician I recognize the inestimable value of wild places to human health and environmental health. As such I implore you to protect this pivotal space, The Tongas National Forest and deny development. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jane

Simonsen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is a crime against nature that will hurt us all and cannot be fixed later, WTF?

laureen picciani

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The loss of such a wonderful natural portion of the United States would be devastating for all Americans! Please save Tongrass National Forest!

Mary Beth Melton

Dear Mr. Perdue: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Although I am a Trump supporter, I continue to be very concerned about his administration's stance regarding conservation and wildlife. Thank you for your consideration, Karen M Thomas

Karen Thomas

Hello Sonny! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. DJT's directive violates the process of the National Environmental Policy Act (NEPA). NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Just remember that the 12-acre swath of trees called Arlington Woods, near a steep ravine downhill from Arlington House, at sacred Arlington National Cemetery is also old-growth forest. Would you approve to have those gifts of nature destroyed??!!

Grant

Holly

The U.S. and the planet are rapidly running out of wild untouched spaces, this being one. We're killing Planet Earth!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bill

Staton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Tourism is much more important and sustainable part of the Alaskan economy and tourists do not want to come and see a clear cut forest. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change because these trees serve as an important carbon sink. If this intact forest is logged or destroyed it will change the character of this area forever. Please protect the precious Tongass National Forest for the next generation to enjoy.

Landis

Van Alen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Pamella Parks

Profits are not more important than the environment! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Preserve our forests for future generations and the health of our grandchildren and their children.

Carol

Houston

I believe that Americans support preserving our nation's precious environment for future generations -- they don't want to give it industry! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jana

Perinchief

The Tongass National Forest is of GLOBAL importance, and opening it to logging, mining, or oil and gas development has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of IRREPLACEABLE old-growth forest will intensify the effects of climate change.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Don't be an Ass. Conserve Tongass!

Ted

Stein

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once done, this forest will never return to what it had been.

Leila

Hover

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump consistently lies, ignores scientific facts, climate change, rate of extinction and is a direct threat to the planet and everything that lives. Please take all measures to stop this short sighted, dangerous policy.

Lynn

Strange

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We MUST stop the destruction of our earth before it becomes irreversible.

Julie

Lynch

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please take time to self reflect on your humanity as we are destroying our earth. We need to protect our forest, rain forests and beautiful animals therefore caring for our beautiful earth!!!!

Paola

Gallego

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our planet can not afford to lose any more forests. We must stop this destruction TODAY if we are to stop the worst ravages of climate change. We must NOT put corporate profits ahead of a healthy future for the entire world!

Anne

Pope

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Global warming fossil fuels must stay in the ground to save us from the 6th great mass extinction of life on earth! We must only use lower cost solar and wind energy in the future. We must plant new forests, switch to sustainable plant based farming and restore estuaries that save carbon in the ground as well. This is urgent!

Joel

Carlson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Saving our forests and facilitating their growth is one of the most important things we can do to mitigate the effects of the climate emergency.

Gaia

Mika

Today every tree has significance. To have such a rare forest within our borders should be a precious treasure that we nurture for the world and the generations to come. To corrupt this unique area in pursuit of money grubbing corporations that are unable to move into the future is completely reprehensible! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Deborah Schillo

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There are just some places that can never be repaired or replaced and this is one of those places. Regardless of why this administration feels the need to destroy so much of our public land is without the care and consideration for what will be destroyed. I prayerfully urge you to cancel all proposed actions in these pristine forests. We are so adept at destroying and exploiting those that cannot speak for themselves from humans to animals to the environment.

Linda

Shirey

depletion cannot increase for ever. You know that. In your heart you know that. Look out over clear-cuts or mining operations and tell me it doesn't make your heart ache. There is land that was forested that can be re-planted. Spare the Tongass. I love it's damp wildness. What is the right thing to do? Right, not cheapest. I offer my support to bolster your courage. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Tim

Waddy

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Benjamin Hart

Benjamin Hart

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I studied environmental education at the University of Wisconsin - Stevens Point and am knowledgeable on how important forests like the Tongass are to the overall ecosystem of an area and I implore you to put the future of our species over any short-term benefits you may receive personally. You are part of the most corrupt administration that has ever existed and the eyes of a nation are watching. Show the world that you were willing to stand up for what was right, in

Nick

Hyer

Why must you deprive our nation of the last of our remaining frontier, by destroying rainforest , depriving endangered wildlife of the wilderness the must have to servive for just 1% of Alaska's budget. I have a very special place in my heart for a land I visited for the first time in the early 60's when I drove the Alaska Highway before it was paved and have visited the state many times since. I promised myself to drive it again and did so two years ago---I'm thankful that I didn't wait for it will never be the same if this plan to attack our I wilderness is approved. I ask you to consider it carefully for we will not be able to ever get it back. Maryann Pierleoni

Maryann Pierleoni

the Tongass last year on our visit to Alaska. This is a national treasure for all Americans and tourists from all nations to enjoy. To destroy it for the short term profits for greedy corporations is criminal - typical of most actions of this most corrupt and destructive administration. Trump and his enablers (including you) will rightfully be judged harshly for actions like these. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nora

Lewis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an irreplaceable valuable resource. Please don't allow its destruction.

Robin

Gotfrid

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. To think your actions will decimate this world as we know it ; and NEED it. Please let that sink in and direct your decision. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

A. E. Peterson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I support this.

Eric

Stordahl

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Earth's forests are the lungs of the planet. With all the clear-cutting and burning around the globe, we must do everything we can to save what we can...and that includes Tongass.

J

McDaniels

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I vehemently disagree with the current Administration's unrelenting attacks on our national forests and public lands. I do NOT agree with allowing any destruction of public lands, to profit individuals and contribute to global warming and climate change. The science simply does not support the President's position!

Donna Moultrup

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. DO NOT ACCEPT Trump's word as Truth. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Battaglia

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Dlon't follow that fake potus down the toliet, friends, let him float away by himself.

Kent

Mollohan

We need to keep this national treasure-- protect it! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Helen Findley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop the rape of our forests now. Later will be far too late!

Dr. Andrew Hansen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For the sake of our planet and our future on this planet, please protect the Tongass National Forest!

Esther Johnson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Further, opening the forest up to logging, mining, or oil and gas, will result in permanent damage to the environment, and will result in near irreversable damage lasting hundreds of years. Please stop this nonsensical project . Sincerely, Dr. Buddy Brownstein

Buddy Brownstein

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. It also would add significantly to environmental degradation and pollution. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Arthur Coates

The value of the Tongass National Forest exists in the life it holds as an ancient living forest ecosystem. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Irene

Blomberg

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Trump Administration behavior with respect to public lands can only be described as evil. The darkness it casts upon our world is appalling. There is a special place for people who participate in this evil. Choose wisely your path.

Dennis Rogers

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Schettler

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PROTECT THIS FOREST. JUST DO IT!

Alexia

Kartis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This will truly be a crime against the humanity of the future. Please come to your senses and look at the bigger picture before you destroy something that cannot be replaced.

Sara Schultz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save the Tongass. Save the old growth forest! No new roads!

Pat

Dietch

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Let's face it: the destruction to the environment and rare wildlife as well as cultural heritage is unacceptable under any circumstances, but especially now when the loss of each tree decreases our chances of stopping the destruction. Protect the Tongass National Forest and show that you understand what your office is about!

Bob

Lehr

This urgent! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Julie Bridget Armstrong

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Mother Nature created all these beautiful forests for many reasons. And not one of them was for Mankind to tear them down so that a very few could pad their pockets at the expense of their countrymen and neighbors. Please rethink what it is you are doing. At least for the sake of your children's future and their children's children.

Carol

Montgomery

Dear Sonny Perdue ~ Come on ! do the right thing; make choices that preserves what little wildlife we have left. Be a model and encouragement to other people who are in positions of power to make decisions such as you. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Sage Hamilton, Boulder, Colorado, 80304

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I implore you to consider the impact of turning a blind eye to the devastation that is certain to be the result of opening the Tongass National Forest to logging and other actions destructive to the health of a forest that is critical in reducing the impact of climate change in the U.S. and beyond.

Elizabeth Agnew

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Are we ever going to stop destroying all that we have been given! It will be shameful, for us if we finish destroying the places we still have but if it is up to Trump, he has already made such a mess of our country and continues to do so! If we allow thousands of species be gone forever that's a horrible legacy for us! We have children etc. And I want to show my children's children these beautiful places

Sammiya Panciocco

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is clearly a no brainer!!

Rob

Abady

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. DESTROYING AN ANCIENT WILDLIFE PRESERVE SO A FEW MEN CAN GET RICHER IS AN OBSCENITY!!!! STOP IT NOW!!!!!!!!!!!!!!!!!!!!!! HISTORY WILL JUDGE YOU THE RAPISTS OF THE LAST OF THE BOUNTY OF NATURE. IS THAT WHAT YOU WANT FOR YOUR LEGACY? IS THAT WHAT YOU WANT FOR YOUR CHILDREN AND FUTURE GENERATIONS???? IF YOU DO, THEN YOU SHOULD BURN IN HELL FOR ETERNITY. Mark Chapman

Mark Chapman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our environment needs this forest more than the resources that companies will strip from it while destroying it!

John

Almli

Agreed!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Megan Thornton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My state of Minnesota protects wolves and forests because we recognize the importance of preserving and protecting our environment including water, wildlife, forests, and all our environment. The Tongass National Forest should protect the environment as well as the animals and forests also.

Louise Sundin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please take action against this horrible, destructive plan. The world is on a very dangerous course right now, do the right thing and protect what little intact wildlife we have left on this planet.

Kirsten Gard

allowed to destroy all the remaining natural areas in our country and around the world. The Tongass National Forest Roadless Rule was implemented to preserve this delicate and important area. The destruction that would be done would take too long, if ever, to repair and is not worth the effort. Please leave this area alone and continue to protect it. And DO NOT go around the laws that are in place to protect such areas. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate

Susie

Baker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't violate one of the few natural places remaining

margaret scripp

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Only ignorant Donald Trump and his greedy followers can think this is a good thing to do. We need to plant trees not cut down old-growth forests.

Mary

Vorachek

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save this NATIONAL TREASURE from the privatizers! This land belongs to all the people of the USA not to the 2% wealthiest in the country!

Nancy M. Caswell

Please remain protective of the precious Tongass area! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mick

Bussel

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the pretext that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The 2001 Roadless Rule was put in place to ban all forms of development and destruction and protect the integrity of this unique critical ecosystem. The proposed rollback on the Roadless Rule would give way for destructive logging and mining, causing a permanent loss to valuable ecosystems and further exacerbating climate change.

Felicity

Devlin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas drilling has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's mean-spirited directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please withdraw this fatally flawed rule immediately. Thank you.

Rev. Allan B. Jones

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Every forest is a home for animals, birds and trees. Do not destroy it! Please help us to protect the environment for the future generations!
Sincerely, Anastasia Ananina

Anastasia Ananina

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The salmon resources of the Tongass are irreplaceable and must be protected. Logging here will be in direct conflict with salmon along with other fish and wildlife resources.

John Hamilton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump will be gone, but we need the Tongass to remain!

Julie

Trowbridge

Please do the right thing! All eyes are upon you. Let's do this right. You'll NEVER regret doing the right thing. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thanks so much!

Susan Norton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I completely denounce the entire Republican Party and their disgusting gas lighting and denial of the truth. Truly their greed has turned into insanity.

Nina

French

I wish to point out that the Tongass National Forest in Alaska, is of global importance, and opening it to logging, mining, or oil and gas will have permanent, detrimental consequences to humans. Forests, especially old-growth forest, are the lungs of our planet, and as the recent fires in the Amazon rain forest have shown, our oxygen-generating capabilities are being seriously imperilled! This latest attack on wildlife and forests, made under the guise that this will boost Alaska's economy (when only 1% comes from the logging industry), isn't worth the permanent consequences. President Trump's directive violates the process of the National Environmental Policy Act. The NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion and health in mind. The loss of old-growth forests will intensify, and amplify, the effects of climate change, and lower the quality of life, not just for the animals that live there, but for all of us on earth.

al

aubin

national pride and a way of life to the natives who were a very important God given natural care takers of the the Tongass National Forest and not takers who were in natural harmony with this State region and important to us all at that. is Also, in no doubts whatsoever of great global importance to the fragile wildlife, sportsman's value(s) for the long term , and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and the fragile forests in no doubts has been virtually raped by greed with utter destruction of the hills and mountains alone. Sad ! Furthermore,, since President Nixon opening what turned out the opposite of what the native peoples were lead to believe then has been made under the guise that this will boost Alaska's economy, when mathematically only about 1% comes from the logging industry, and isn't worth permanent consequences. It is another and sad example the pockets of a few will take away from others for their gain and when

Stephen S. Karnes

Can Highway to visit Alaska which had just achieved statehood. We camped at Mt Denali and visited Valdez. The glaciers were amazing and I was impressed by the miles of permafrost. Nearing 60 years later all this has changed some of it drastically ruined by oil spills and melting glaciers. There is still beauty there and it MUST be preserved, not just because it is beautiful but because it is essential to survival of the living earth and the human race. We don't need all that destroyed when there is plenty of energy and human ingenuity to create a livable environment. Bethel Evans The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions

Bethel Evans

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and is NOT worth permanent consequences. Trump is an idiot and his directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are FACT-BASED, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do the right thing. Thank you.

Donna Flowers

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. America should be setting an example for preservation of natural forests. Paper and lumber industries should replant the acres that they have already destroyed.

Beth Voorhees

Please keep the survival of the earth in mind. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Naomi

Rose

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the specious guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I think it's sickening that big business regularly tries to ram through the degradation of our national natural treasures in order to financially benefit a few in industry while degrading our environmental treasures. Shameful! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Hoyler

Please do not weaken protections for the Tongass National Forest. It is hugely helpful in our struggle to stabilize the climate. Therefore, the Tongass National Forest matters to the whole world. Though harming the forest might create a few jobs, the world would pay a very high price for those jobs if we do not prevent runaway climate change. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Again, the loss of old-growth forest will intensify the effects of climate change.

Barbara Bazyn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. **DON'T LET CORPORATE GREED DESTROY OUR PUBLIC LANDS!! PROTECT TONGASS NATIONAL FOREST NOW!!!**

Mary

Scottini

Sherrill

Futrell

Trump is trying to violate NEPA. Don't let him do it. It belongs to us, not him. The loss of old-growth forest will intensify the effects of climate change.

Once we lose it, it's gone forever. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jon

Hammari

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are all connected directly to nature. We have the environmental quality we all enjoy because of natural buffers like the Tongass maintaining a necessary balance. It is a fools errand to destroy this keystone of the environment at a time when nature's balance is in the crosshairs. STOP THIS INSANITY NOW!

Jerome Kalinoski

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. I am slowly pushing my chin up so that my mouth closes. The Tongass —please leave the 2001 Roadless Rule in place and say NO to forest destruction for corrupt intentions and corporate profit. Isn't all this evident as soon as the Tongass National Forest is mentioned?

Helen Pierce

Once you destroy a place you can't just undo the damage. I've been to The Tongass National Forest. It is, by so many measures, of global importance, and opening it to logging, mining, or oil and gas has PERMANENT DETRIMENTAL CONSEQUENCES. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's already late. Let's not make it TOO LATE. We need to wake up now. Please!

Suzanne Levere

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's stupid and suicidal to cut down our forests for short term gain. A bit like a wounded jackal snapping at its own entrails while running away. A lot like ripping out your own lungs.

j

hester

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My husband and I demand that Tongass be protected and preserved. Our concern is the world our children and grandchildren will live in if our forests are damaged. Trump has already done too much for corporations who want our public lands. Please save Tongass for us citizens who care about our environment. Sandra and Bob

Sandra Stricker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The 2001 Roadless Rule was put in place to ban all forms of development and destruction and protect the integrity of this unique critical ecosystem. The proposed rollback on the Roadless Rule would give way for destructive logging and mining, all part of a broad attack on ecosystems and the climate throughout the country.

Laura R. Goldstein

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must put the interests of the people and environment over corporate greed.

Bob

Schulof

Natural habitats evolve naturally over hundreds of years and, if destroyed, will take hundreds of years to be recreated. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Anne

Jones

740The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Joy

Gibat

The Tongass National Forest is of global importance: opening it to logging, mining, or oil and gas would have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, but only 1% comes from the logging industry. That is not worth the resulting permanent negative consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

N

Houghton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This seems to be yet another example of lack of foresight. We are planning for the present day without considering how a WRONG decision (if it is made against the environment yet again) will be a serious detriment to the future of the Tongass National Forest.

Barbara Bartlett

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. As a Sister of St Francis, I am very concerned about how we treat the environment. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sarah

Kohles

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Other industries crucial to Alaska, such as tourism and fishing will be impacted for a long time. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kathleen Sensenig

importance for its carbon dioxide absorbing ability and beauty. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences that will last for hundreds of centuries. Because of the extreme cold in this area, trees grow at a very slow rate and the chance they will reclaim the disturbed areas could be nearly nonexistent. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The highest rate of Alaska's economy comes from tourism, and tourists don't want to see chain saws, holes in the earth, or drilling structures. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If you care about the future of our planet and your grandchildren, you

Linda

Rossin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We cannot afford to see the Tongas National Forest degraded and compromised. Please have the courage to protect it.

Cate

Cabot

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need you to protect our environment and public lands. Please do so.

Judy

Knight

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongass National Forest must be protected. This must not happen. It is wrong!!

MARGE FEAR

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. What is needed are more trees and forests to put them in. With new materials in the building industry, we do not need more logging of forests. And especially not in the dense Tongass Forest which is a huge contributor to CO2 take down. It's a win steady merely leaving the forest in tact. Be an advocate in supporting the new generation of building materials which will be a welcome to fire prone areas. Be best, as Milania states..do best for the most.

Andrea Lehman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. From an ecological and commonsense angle, the flawed and perverse logic of this administration makes absolutely no sense. Please do not allow this environmental boondoggle to be passed as it will surely have extremely negative repercussions for years to come.

Robert Lindberg

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The old growth forest provides critical habitat for birds and other animals and constitute a unique ecosystem and aspect of American heritage. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sue

Josmore

Why is it that you think you/your agency can violate the National Environmental Policy Act? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is the property of the American citizens and most American citizens support keeping the forest intact as a national asset. If, for some reason, you cannot support this request, as a citizen I'd like to know your reasons.

John

Rath

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent consequences that are actually HARMING our Earth. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Therefore, I implore you, as your constituent, to please do your part to protect the Tongass National Forest before it's too late.

Mary

Wilbert

The Tongass National Forest is of GLOBAL importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences for all people on earth. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent destruction to our air and environment. What do you think a road into a wilderness area does??? It opens it to commercial gain for private companies, that's what. And it allows hunters, poachers, and other people bent on destruction into the wilderness- f o r e v e r. It's on you, Sonny- on your shoulders- and your family will remember your decision. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Candace Volz

The Tongass National Forest. It is magnificent, and is of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I hold that natural lands such as the Tongass belong to all of us, and are a critical inheritance for those who come after us. No small group of us, here on this land for only a short period of time, has the right to deny all future generations the beauty and appropriate use of such resources. It is important that we stop the degradation of the lands we hold in trust. They are not ours to do

Margaret Clark

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is extremely sad and disturbing that president Trump has filled positions such as yours with people hostile to environmental protections and in bed with fossil fuel industries. I don't know where you fall on that continuum but you have an opportunity to stand up and do the right thing and protect a vital old growth forest that cannot be replaced by the next administration if this one lets it be destroyed.

John

Mills

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The longer we delay meaningful action to address the growing Climate Emergency, the exponentially more difficult it becomes to reverse the damage to our fragile world. We have been poor stewards. We simply cannot afford to lose these great forests that act as a carbon sink and help the earth.

Susan McRae

The destruction of Tongass National Forest puts the earth further at risk. It should NOT be opened up to development. Harvesting old growth forests that help protect us from greenhouse gasses--makes zero sense and would have permanent consequences. Climate change will only be exacerbated if this is done. Trump's directive trashes the National Environmental Policy Act (NEPA). Complying with NEP is our only hope to slow the devastation caused by dirty power & greenhouse gasses. Destroying forests that mitigate pollution should not be allowed. Please make sure that major decisions concerning potential risks to the environment are made ONLY after extensive fact-based research, that all alternatives have been thoroughly explored, and are made with public opinion in mind. Please stand for the land!

Paula

Manley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I took my kids to Alaska in 2001 because I feared that the glaciers would be gone by the time they grew up. Now my grandkids may lose the chance to see the forests because a bunch of old white guys are so greedy. When it's too late they will figure out that money can't buy everything.

Janet

McConaughey

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Hold forest and wildlife protection above corporate greed!!

Renee Sutherland

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please hold forest and wildlife protection above corporate greed. Thank you.

Lynn

Graham

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to protect the Tongass National Forest from Trump and his cronies who want to destroy it by opening it up to logging and mining.

Carol

McMahon

The Tongass National Forest is amazing and is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Beth

Renwick

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. TO LOG OR MINE THE TONGASS IS OBSCENE. THIS UNSPOILED FOREST IS NO PLACE FOR THIS KIND OF DEVELOPMENT. THIS IS THE LAST INTACT TEMPERATE RAINFOREST AND IT SHOULD REMAIN AS IT IS!!!

Cynthia Young

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PLEASE PLEASE SAVE SOMETHING FOR YOUR CHILDREN

Darryl Wrona

Please keep the Tongass wild. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sinclair

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The depths to which this nation has sunk when it comes to the care of creation is despicable. People in power care ONLY about money and seeing to it that their constituency can do whatever they please when it comes to fossil fuels and the denigration of our parks and sacred lands. Be assured that the day WILL COME when you will have to answer to a Higher Power who is on the side of justice, equity and the saving of the planet. You are on the wrong side of

Robert Albers

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The very concept of national lands centrally involves protecting these assets for the future of our country and now more than ever as resources helping to curtail climate change. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

J. Inslee

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not let this happen!

William and Buenau

Stop trashing our great natural resources which are also national and planetary treasures, especially in this age of political stagnation on THE MOST PRESSING ISSUE of humanity's history!!! YOU MUST NOT RUIN this region FOR MORE OBSCENE PROFITS for your 1% corporate buddies!!!! The Tongass is NOT YOURS to SELL to the highest bidder!!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Christine Hicks

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Consider leaving some of the old growth forest for our great grandchildren to wander around in. Cutting roads destroys the wildness. So a few rich get richer and the rest of us lose this priceless earth gem. What did God say about being good stewards of this Earth we were given?

Gilbert Pomeroy

It hurts my heart to know the great power one man can wield to destroy beautiful, ancient, natural areas without the least concern for the consequences. Please use your power to protect the Tongass. Do the right and ethical thing. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

George and Jaros

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have hiked and backpacked through Alaska's primitive forests and icefields. I have hiked all over this beautiful world of ours, and there is NO OTHER more pristine and important forest than our own TONGASS. IT MUST REMAIN UNTOUCHED!!!! It cannot suffer the same fate as all of the rest of the 98% of global forests and timberlands. Our planet needs this biosphere if we are to survive. Protect the Tongass FOREVER and in perpetuity, or we are all in peril of

LINDA NORRIS

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Brian

Harper

LEAVE THE TONGASS ALONE! As a National Forest it is supposed to be, MUST be, protected! It is PRICELESS! It is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

E. Whitlow.

Alaskan Native people & animals Need this forest to stay as it is to balance the atrocities done by all the previous drilling and pipellines. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

D. Chang

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We also need forests so that we can breathe. Forests actually emit oxygen in the air...worldwide. And when we cut them down the CO2 that they have been absorbing is then emitted back into the environment...the air.

Susan

Terry

catch up with science and make the necessary changes to protect the environment. I don't know what you all are thinking? We are already seeing massive destruction from fire, water and wind. What do you think is going to happen if we continue down the path of doing the same old thing? We have to make major shifts away from fossil fuels! We have to encourage and maintain the ecological balance. Where does this leave our children if we don't? Where do you think we will be able to take them to be safe? What kind of jobs are we going to have left once the planet overheats? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting

Janice

Ledebur

The Tongass National Forest the US's largest intact temperate rainforest. With climate change being an urgent problem, we can't touch it and destroy it by putting in more roads and opening it to logging, mining, or oil and gas exploration. Only 1% of the Alaskan economy comes from the logging industry.....it isn't worth the permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. You must protect the Tongass for future generations!!!! Do not destroy it!!!!

Janet

Bird

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for reading this.

Suzanne M.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need trees in the world. We can't stop the deforestation of the Amazon rain forest, but we sure can stop the destructive deforestation of Alaska.

Cherie Taylor

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. National forests belong to the people, not corporations.

Connie Jahrmarkt

The Tongass National Forest is doing fine without the interference of humans. Mining, extracting oil or natural gas would do harm, rather than improve the Tongass. Greed only damages the earth, it does not help it. AND, humans already have enough oil and gas without damaging the Tongass. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Charles Wolfe

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This valuable national forest needs to be preserved and protected from greedy money-profitting companies so that future generations of Americans can enjoy its beauty.

Mike

Lesley

The national forests belong to ALL The people, not just The rich or corporations. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Rebecca Kelley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify effects of climate change. Please let's make an effort to save the Tongass National Forest .

Margot Wombacher

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave the Tongass forest untouched. Save something for the future.

Jim

Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. The loss of old-growth forest will intensify the effects of climate change. PLEASE STOP stripping our world of the ability to heal itself!!!

Aideen Vega-Van Auken

40 years ago. Logging was legal. Somehow the state has survived 20 years without it, and always will. The real impact of Tongass logging is to the fisheries, where runoff from clearcutting damages critical salmon spawning habitat. With ocean warming and hydroelectric dams on the west coast already severely impacting wild salmon spawning grounds, we need to leave Alaska's wild salmon fishery as it is, an amazing self-policing fisheries industry doing a great job. This mentions "wolves and grizzly bears." If there are wolves, I'd be surprised, and most of the bears are black bears. If I remember correctly, the only brown (grizzly relatives) bears are on Admiralty Island -- there is a whole lot more to the Tongass than that one island. It stretches from the southernmost city, Ketchikan, through the Inside Passage, up to the northern panhandle -- it's HUGE, as Trump would say. But it can still be lost. I grew up in Michigan, where people thought the virgin white pine forest could never be logged, but it's all gone now from

Laura Zahn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Climate disruption is all around us. Wake up and protect our remaining forests. Save our way of life and perhaps life itself.

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. There IS no living - or lives - or economy - or government - of ANY kind without an environment in which to put all of it! Environmental protections have got to stand tall over everything else. We can't even breathe without the presence of trees - especially the Ancient Ones - and not only for what they do for us. It is because they ARE. Ancient trees have lived through our entire history of human civilization. They have watched over us and guarded us. Unless you help to stop the momentum toward irreversible destruction, you will go down in history as having stood useless at the helm of betrayal. As M. M. Ilden has said, "...We all owe our lives to the trees." Trump's directive violates the process of the National Environmental Policy Act. NEPA

Angela T. Cannavo

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dominic Yanke

the impeachment hearings thus far, it is too easy to become cynical and discouraged, that there are still any people out there who have an intact, honest conscience, that will step out from the fray, be bigger than they were before, as big as this moment in history demands, to defend and protect that which is beyond us, vital to us, essential, the best of us -- like our Constitution. Like one of our last wild national treasures: The Tongass National Forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. My parents lived in Alaska for more than 20 years. There is NO compromise worth scarring - neigh, permanently destroying this area - with easy-money, no-liability-for-externalities schemes. It is criminal that a gallon of gas costs less than a latte. You

Pamela Erickson

That should be it, that should be the message. "Protect the Tongass National Forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Andrew Nisbet

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This has to stop, these lands are pristine and untouched by human growth, it's meant to stay natural to sustain the wildlife and some critters—birds are only found there. It's all about money and destroying our world, animals going extinct all because of greed—if this is allowed it will continue to all of our treasured lands and wildlife, we will see nothing but devastation, our grandkids won't understand or be able to appreciate what our world used to be, and

Gertrude Turley

Tongass National Forest is of global importance, opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests is made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. In contrast, one of every ten Alaskan jobs is in the tourism industry, which brings more than \$2 billion into the state each year. It makes no sense to risk this immense economic benefit for the sake of one far smaller which will be exhausted in a matter of years never to be replaced in our lifetimes. This smacks of favoritism and corruption. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dylan

Kane

Cynthia Warner

The Tongass National Forest is the world's largest temperate rainforest. Opening it to logging, mining, or oil and gas will have permanent detrimental consequences. Making this attack on Tongass forest under the guise that it will boost Alaska's economy, is not worth the permanent consequences which will result. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Gala

Autumn

You are not doing your job. You are supposed to protect our public lands!!!! Please let us leave something for our children. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kyle

May

We need to make decisions to assist the fight against climate change and the protection of our natural environment. This is one of them. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please stop this plan to allow logging, mining and oil and gas development in Tongass National Forest. The planet needs forests to offset the damage produced from use of fossil fuels. People are getting tired of this administration catering to the fossil fuel industries. Stop this before the damage done to the planet is beyond repair.

Janet

Yasenchak-Votta

In the name of all that is good and all that is peaceful on this earth. I believe, as a human being, as a person who is not of hate or of indifference, I believe that we need to end these acts of greed and remember what provides us the oxygen for us to breath, prolong life and a functioning planet. In the name of totality, not only stop this crisis but also fix the mentality of defacing our planet. We do not have twenty years to fix what we can fix now. In the name of totality beyond all diets and presuptions of higher powers. In the name of totality make things right again. In the name of totality I demand our planet to be respected and protected. - A human being

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must expand and ensure protection of our forests if we are to thrive and survive in this era of rapid climate change. Do not dare to undermine us further by opening our forest to logging and other development.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are stewards of the planet, but right now, someone is not seeing it their responsibilities to take care of our precious planet and that inhabits it. Every thing has a purpose until man came along. It is still in our hands. Act now!

Johnie Matthews

Please heed public opinion and protect the Tongass! The destruction of this forest is not worth the short-term profit. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please save and protect our wildlife areas. They belong to all of us, not to be given away to private industry. Do the right thing and protect the Tongass!

Normayne Day

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change We cannot tolerate continued interference in our pristine parks for greed and profit-enough is enough-Pur EPA isnot protecting but harmong lands. Stop this destruction. Care..

Jane

Bodine

Trump is nothing more than a self centered, tupae wearing, ass clown with no sense of remorse. I tell you what, if Donald smoked on the herb, things would be going a lot mire differently in a more positive light. If Donald Trump puffed on a blunt every now n then, well then maybe the real crooks who run wall streeet, and those who keep Trump in office would be facing a little bitter sweet jail time. Personally I support no party, for I am my own person and I do not jump when I'm told to. I do stuff my way on my own terms n conditions. Anyway; this is another major rainforest that has meaning, and for Trump and his chumps to tear it down and profit pff of it just cuts it for me. I really hope more awake people see what is really going on behind the massive nylon curtain that is being forced over the heads of the sheeoplr. Yea most of today's society are "sheeople rather than people! They'll listen to whatever the dumbbed down mddia tells them. I am hoping for progress and change, which is sadly far from the current future

Avery

Duda

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Don't allow destruction of Tongass as is happening (for other reasons) in the Amazon in South America. These forests are rare resources that play significant roles in addressing and modifying global climate change. We must not allow their destruction for petty current profits.

J

Lemley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Surely there are tourism-related initiatives taking advantage of the preserved Tongass National Forest that would be of equal, or more, economic impact? Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alison

Bateman-House

We must not allow the destruction of a pristine, climatically important wilderness in our own country. You, as an American citizen and person in power, must not let this happen. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Hayden Foy

As a resident of over-drilled western Colorado I understand how the Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Your children will curse your memory if you represent corporate raiders over people and all life on the planet. We who live where they drill know the truth!

Pj

Breslin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I urge you to protect this natural national treasure.

Carol

Marcar

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Corporate greed has no place anywhere near this national treasure!

Michael Raymond

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.*****

***THE PROTECTION OF THE TONGASS NATIONAL FOREST MUST BE CONTINUED. I AM A HIKER, BACKPACKER AND I KNOW THAT THESE FRAGILE ENVIRONMENTS MUST BE MADE A PRIORITY. OUR EARTH AND ALL CREATURES GREAT AND SMALL SHOULD BENEFIT FROM OUR KNOWLEDGE, NOT BE DESTROYED BY GREED. thank you, karin smith-spanier

Karin Smith-Spanier

Sarah

Dowell

Dr. Mr Perdue, Please do not lift restrictions on the Tongass National Forest in Alaska. We, and the creatures living there, need all the wild spaces we can conserve.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no current need for opening the Tongass to exploitation beyond the greedy cash grab by a few individuals claiming economic necessity. An old story heard over and over again, coming from people who only value money.

Dennis Humes

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have lived in Juneau, Alaska for several years now. These trees make up an irreplaceable part of the community, and make it the incredible place that it is. Alaskans need the Tongass to remain standing, and so does the rest of the world.

Eva

Peterson

Michele Pfiester

A true Republican would conserve our natural resources, not foolishly destroy them for outdated fossil fuels and inflation of corporate bottom lines. Sham Republicans lurk everywhere we turn these days, worshipping the short-term dollar. Where's the true, long-term cost-benefit analysis? Our children will pay. Shame.

Please don't turn Alaskan forests ugly like in Washington state!!! It's a crime to cut down old growth trees. Think about long term income with tourists vs a few lumber jobs now. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Melissa Kohler

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please DONT DESTROY IT <3
!!!!!!!!!!!!!!

paloma angulo

Elizabeth Levy

The Tongass National Forest is of GLOBAL importance! If we want the human species to continue to survive on Earth, we need to do everything in our power to slow down and reverse catastrophic global climate change. Opening the Tongass National Forest to logging, mining, or oil and gas has permanent, detrimental consequences, both locally and globally. Alaska's economy is not going to benefit from such a stupid plan. Please, do the right thing, and PROTECT THE TONGASS NATIONAL FOREST!

I oppose the rape of the Tongass National Forest and all lands held in the public trust. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

larry

Gimbel

You would help to further rape our country? And for money? How shameful! Do not allow this to happen. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

John Voehringer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. drumpf's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sonny, didn't you get the memo? Resign and GTFO!

Brad

Miller

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We already know the current administration ignores scientific reason, and prefers to react to moneyed interests. I know Donald Trump doesn't give a fig about anything from which he cannot profit, but a LOT of the rest of us US citizens wish to have unspoiled areas left after he's out of office. There is NO WAY mining, logging or drilling will not destroy large areas of national forest; anyone who says differently is lying (like "clean coal"). Please do the right thing

David

Arnold

Opening up the Tongass National Forest to logging, mining, or oil and gas will have a permanent, detrimental and long lasting negative effect on wildlife and the environment there. It's under the guise of being able to further boost Alaska's economy that there's apparently only 1% that comes from logging. It's under the circumstances that clear cutting old growth forests with one thousand year old trees isn't worth the consequences. Any directive has to be in accord with dictates of the National Environmental Policy Act anyway. Ensuring that major decisions affecting the environment are fact-based, the act mandates that any alternatives are considered and decisions are made based on public opinion.

Robert Hoekstra

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are all One, including the trees !

Steve

Bradley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Roadless Rule was meant to protect unique and critical ecosystems like the Tongass. At this point in time we need to strengthen environmental rules not weaken them.

William Hawkins

As a fourth generation Texan, I am writing with urgency because the Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and is NOT worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

A

Patterson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are already losing the Amazon rainforest - don't add the Tongass to that combustible mix. Is your intent to really kill the earth faster?

Carole Sparks

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once again, short sightedness and greed are threatening the heritage and health of future Americans. Don't let this happen!

Bethanie Gilbert

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to protect this vital region.

Angie

Gregory

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If you are a conservative, then conserve resources for future generations. It is part of your job. At a time when forests are more important than ever, opening more is the wrong thing to do.

Mike

Lopez

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Do we really need to keep on making destruction? How about building around the trees and not on ancient lands that should be protected? Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Maureen Guskiewicz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please consider not allowing natural resource extraction in one of the most pristine locations on the planet. The Tongass National Forest has much more long term value than short term extraction will have, as NOT destroying/polluting the forest will allow it to last indefinitely. Thank you for your time and consideration regarding this extremely important matter.

Keith

Blaylock

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PS: This is part of our history When it is gone it will be gone forever!

Dr. Robert R Walling

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Not only will the old growth forests be damaged, there are medicinal plants that will perish and are used by the Natives for a multitude of ways, and the last frontier will have permanent scars. We need the oxygen supplied by these trees, especially with the rain forests in South America being destroyed by humans as well. Please do not let this happen. This is a fight that was already fought and won and should remain a sacred space on this planet not a money

Lizabeth Linn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I feel it is extremely important that this irreplaceable old growth forest be protected -NOT logged. The health of our planet needs the forest. there is no planet B.

Roberta Farinet

I have recently been to The Tongass National Forest and know first hand it's beauty and global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is old school energy that's being invested in. Please turn this around

Cheryl Mendonsa

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must protect our old growth forests in the United States and around the world.

M Kathleen Maddox

Though you pretend to be moral with your weekly attendance at the Capitol Bible Studies group on Wednesday mornings, you Mr. Perdue are in bed with the devil himself. Trump and his legions are desecrating God's creation at every possible turn and it is outrageously hypocritical of you to serve this human monster in his goal to ruin Planet Earth. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Peter

Sampou

Trump administration doing is tearing down, destroying, selling off or killing the animals and environment we not only love but need to survive. How dare any of you decide to take the greed and hubris in your hearts and impose it on the rest of us! I am disgusted by these actions and insane reasons for destroying this beautiful and vital forest. Shame on you all and may you not be forgiven for taking away my children's future. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate

Christina Frank

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My grandchildren are terrified of the world we are leaving them. They see the constant severe storms, streams without fish, children starving, and ask us what we are doing to fix the planet. They know climate change is real, they know logging will make things worse. We must start doing the morally right things to reverse climate change for the sake of our future generations. Please do what's right.

Sandra Adams

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As a former Alaska resident I am deeply concerned with the rape of our public lands by industrial greed. STOP IT NOW!

Barbara Green

The 2001 Roadless Rule was put in place to ban all forms of development and destruction and protect the integrity of the Tongass National Forest, a unique and critical ecosystem. The proposed rollback on the Roadless Rule would give way for destructive logging and mining, all part of a broad attack on ecosystems and the climate throughout the country. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Cynthia Liepmann

Do you even know what you're doing??
The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Carrie Bautch

I have had the privilege to visit the Tongass on vacation in 3 areas. This pristine area should continue to be set aside as a natural area. It is important to keep it natural for those natives that depend on its resources, for the fishing industry, for the tourist industry and MOST importantly to allow area to provide unrestricted access to all the abundant wildlife that it supports! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Paul

Wnek

You know as well as I that preserving our forests at this time in our history is vital. Making money gutting this forest won't save your kids and grandchildren from the consequences of climate change. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sean

Franulic

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. NATURE THE NATURAL WORLD HER HEALTH AND CONSERVATION PRESERVATION ARE NO LESS IMPORTANT THAN THE SAME FOR HUMAN KIND AND TO ACHIEVE THIS GOAL WHICH MEANS THE TOTAL SURVIVAL OF LIFE ON PLANET EARTH MAN MUST SERVE MOTHER EARTH IN ALL HER WONDEROUS DIVERSITY AND RICHNESS: MANKIND CAN HAVE NO GREATER GOAL OR ACHIEVEMENT.

Ralph

Berney

I have paddled and hiked the Tongass for many years and appreciate one of the most beautiful and pristine places left on earth. The bozos who want to rape and plunder it I doubt have even flown over it. The concept of destroying the Tongass to enrich a few at the expense of so many people and animals and trees is too short sighted to believe. Please don't allow this travesty to happen. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

James Watson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is unthinkable that we should be so disrespectful of nature and our environment.

Sandra Eskin

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongass National Forest is a vital part of America's heritage and beauty. The National Parks are financially beneficial for the United States, as they draw in tourism, and overall the Tongass National Forest provides more money for Alaska than the logging industry. This forest is important on both an emotional and practical level, and it will greatly hurt the United States to destroy it. Please listen to the people who care about our country and our

Mathilda Sutton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The short-term profit does not justify any long-term damage to the environment. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I urge you to protect the Tongass National Forest for now, and always.

Ellen

Moderhack

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. STOP THIS!

Judy

Smitha

President Trump's directive on this should be opposed, The Tongass National Forest is of global importance, His opening of it for commercial purposes has permanent, detrimental consequences. Only 1% of Alaska's income is from the logging industry. It isn't worth the permanent consequences. As you know, Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We can't afford that.

Marilyn Seven

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This is a government handout to the logging industry, at the expense of other businesses in the fishing, hunting and tourism businesses. The government should not be subsidizing one type of business at the expense of others. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Thomas Winner

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For the sake of America, please stop this money grab. The consequences are too great to ignore!!! Mark Loughead

Mark

Loughead

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Then when the dummy's done they'll go ah we forgot to build a place that can hold air for everybody and animal's for air and food to grow...

Gerald Kolb

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Fuck trump!!! Leave that shit alone!!!!

Micheal Goodsell

One man -- one criminal President -- should not be allowed to undo all the hard work of years and years and years of environmental efforts by so many people. ESPECIALLY NOT NOW DURING SO MUCH CLIMATE CHANGE. We need these trees... beautiful, historic, oxygen-giving trees. Please do not allow this to happen. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, Sincerely, Ann Doneen

Ann

Doneen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nancy

McPhee

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. How many protected areas are you going to destroy just to put money into the pockets of people who are already wealthy? What will we leave for future generations? You can't take money with you when you die and money has no value to God. STOP THIS MADNESS NOW.

Sara

Guernsey

Please do not open the Tongass National Forest to logging, mining, or fossil fuel development. This forest is of national and global importance, and allowing further development there would have permanent, detrimental consequences to biodiversity and global climate. Any boost to Alaska's economy will be temporary and minimal; the negative consequences will be long-term and irreversible. In particular, the loss of old-growth forest will intensify the effects of climate change, which have been scientifically proven and represent an existential threat to our national security. The president's directive to develop Tongass violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment must be fact-based, must consider alternatives, and must be made with public opinion in mind. Therefore you must withdraw this proposed rule, and any rule that would open Tongass to development. Thank you.

Ulysses Lateiner

clean, and fair, has placed Mr. Perdue into an untoward position of responsibility which is a trait apparently still in the works for him. However, that doesn't mean that the majority of voters who did not vote into office the Trump Administration, isn't watching. You will need to be eternally vigilant, Mr. Perdue, in order to destroy our planet for profit. Some people are concerned for future generations of life. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate

NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave it alone.

Mary Atkinson

Tongass. I strongly believe we should be increasing protections of our environment rather than allowing more natural areas to be developed. As a gardener, I see a link begun with development that leads to losing a healthy balanced environment spreading to all surrounding areas. Living in a city that has increased development, I am seeing firsthand the damage being caused to our local wildlife populations. Everyone keeps saying something to the effect that if we lose our heron or orca population here, there are more roosts and pods in other areas. If we open the Tongass to development, we have huge losses in those roosts and pods in other areas. Developing the Tongass causes a ripple effect that has far reaching implications on a balanced environment and ultimately on our food chain and health. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this

Noreen Fujita-Sacco

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change. Must he destroy everything that's beautiful and absolutely necessary to our environment????? He is an abomination!!!!!!

Antoinette Duersch

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Also these National Forest belong to the People of the United States of America. The American People have not given their permission for you to destroy our forests.

Cathie Donahue

Our environment is rapidly changing. Climate change should be the primary consideration for all decisions going forward. The benefits of opening Tongass National Forest to logging, mining, or oil and gas extraction are few, while the costs are great. We need to stop this reckless, destructive, short-sighted behavior and look ahead twenty years. What will happen when we have climate refugees from all over the world? The Syrian crisis offered a small example, and should terrify everyone. Furthermore, Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Think of the future generations. Think.

The loss of old-growth forest will intensify the effects of climate change. We cannot allow this reckless president to destroy all that we hold sacred. Do what is right for God's sake!

Carol

Kennedy

The Earth needs this forest. It is helping our climate. The animals need this forest. It is their home. Please consider this. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lisa

Frucci

I believe the Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Tom

Ryan

Do you want to be the politician who put greed above our environment? Do you realize we're all connected and if we continue to rape and pillage our natural resources, we're only hurting ourselves and our children? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Robin Shepard

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is one of the most important issues, for us now, and for our future. The Tongass National Forest is a treasure. You are Secretary of Agriculture; please, please protect our National Forests. Thank you. Sincerely,
Ute Wittorf and Stephen Sutton

Ute

Wittorf

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Victoria Peluso

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The old-growth forest in the Tongass is one of few remaining old-growth forests in the world, and we need to preserve it for its historical importance, as well as its importance as habitat. Where else in the world can you see trees 6 feet in diameter? Not in the Pacific Northwest, where we logged such trees a century ago. The Tongass is irreplaceable!

Ila

Fetterly

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As a life-long resident of the Pacific Coast area, I know the benefits of our forests (including the Tongass National Forest), but beyond the life enhancing environment, I now argue for the survival of the forests to help counter climate change.

Karen Hildebrand

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Tourism, fishing provides more economic incentives than a few logging jobs. Protect this forest for all time!

Jay

Kramer

The Tongass National Forest is beautiful, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dale Dewild DeWild

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Local loggers keep the money in Alaska, they employ locals. The big logging companies throw these beautiful trees on a boat overseas. Destroying Tongass will hurt the local fishing industries and for what - a short term economic gain (for who) and destroy something that has taken centuries to build. Trump doesn't care about the environment despite the fact he has a young son and grandchildren who will be hurt in the end. People are up in arms about the Amazon being destroyed, and yet Alaskan government and Trump administration are trying to do the same - attempting to do it quietly but people who care about the environment, wildlife, and the future of Alaska are watching.

Deborah Jefferson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protect life, all life, plant, animal, human and spore.

Cory

Thompson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I can't believe such action was ever thought out. You are not in the environmental protection agency. You are in the environmental destruction agency. With this information I hope you fight for us Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ronie

Banning

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This forest is a treasure cherished by the whole world. To allow and invite its decline with this directive would be an error of the gravest kind ultimately affecting all of humanity.

Jeff

Granger

We have worked to preserve this forest for over thirty years. That is has taken so long to do so considering the consequences of it's destruction We're sincerely hoping you will listen now and achieve positive results. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for your time and consideration.

John Ripley

Once Again the 1% want the rest of Americas resources NO NO NO NO. You do not have the right to sell what belongs to the American People. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dolores Vinson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas exploration and extraction has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry. This is NOT worth permanent consequences for short-term gain. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Karen

Conover

Nor, can they talk? But, can they suffer?
Jeremy Bentham, philosopher, 1748 - 1832. Social responsibility, ecological preservation and evolution of consciousness are the challenges of this age. It is evident that we have not yet fully evolved as a society when the unconscionable practices, cruelty and inhumane suffering of ALL afflicted animals (no matter what the reason), is still a reality in the 21st century. On the contrary, it's despicable! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth

Andrea Schwartz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Yesenia Garcia

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Dianna Brantley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I lived in that forest. If you do this your worse than any terrorist.

paul

koenig

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to stop destroying our planet. If we keep on with directives like this one, we will be living in a wasteland soon enough.

Mary

Haworth

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, which pose a grave risk to our health and the habitability of the planet for future generations.

Dr. Markus Boos

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There really is NOT much time left...

Dan

Dowdall

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protect the Tongass National Forest! Stop the killing of the planet! Protect what little we have for the future generation that haven't been born yet. Protect the climate-critical ecosystem and wildlife! Do Good, not evil.

Bryan Counts

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I hope you will consider how the passage of time increases every value of the Tongass Forest. With the decades failure to protect pristine forests in other places makes the pristine Tongass an increasingly rare repository with multiple precious values to Americans and people the world over. I encourage you to consider the existence value of this land and expanse we call the Tongass National Forest. It is extremely unlikely that I will ever step foot there or get to feel what

Karen Van Atta

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have lost enough from weather disasters and fires this year. Stop raping our national treasures! They are limited indeed.

Karen

McKenzie McAdoo

You know that opening the Tongass National Forest to logging & mining will have detrimental consequences. Yet, in greedy arrogance you would continue with this latest attack on wildlife and forests knowing only 1% comes from the logging industry? Why? Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't let it happen.

Joan

Dubis

You can never undo the damage caused by logging. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Carolyn Barnes

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We the people own the public lands and expect the agencies to abide by the intent of the NEPA process as it is a law of the land. Agencies are not required to follow unlawful directives by a president who shows no respect for the constitution and the will of the people. Time to serve the people and not follow unlawful directives.

Warren Snyder

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Julie

Heleine

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Cameron Lafontaine

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This forest must be saved from the ravage that will occur if the President's intentions are fulfilled. His actions show his ignorance or disdain for our environment.

Rick

Rovak

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Take A Stand for our Earth and the Environment! Future Generations will Thank you for your Courage to do the right thing. You have the Choice, Right or Wrong!

D

Burn

Opening the Tongass National Forest to logging, or mining, oil and gas exploration, will result in permanent, detrimental consequences--on a global scale! The latest plan to open the Forest to such intrusive and destructive human activity is based on the bald-faced lie that it will boost Alaska's economy. In truth, only 1% of the state's economic resources comes from the logging industry, and is in no way worth the permanent negative consequences. Of particular concern is the fact that the loss of any old-growth forest will intensify the effects of climate change. Trump's directive violates the process of the 50-year old National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Please show that the EPA holds forest and wildlife protection above corporate greed, and take action to save the Tongass National Forest.

Michaelene Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I can not give any stronger message than this: Our National Forests and Parks MUST be protected from ventures that are detrimental to their health. These treasures belong to all of us and I protest the use of mining or any other commercial ravaging of resources.

Robin Burkhart

The forest belongs to no one... it must be protected for its general use by organisms on planet earth, including humans.

Campbell Morgan

Everything is going way to fast these days. That take things away from life it self, the beauty & never replace them. Our children & grandchildren won't have nothing to learn about, cause people like Trump take it away, like the statues on history in our states. What's wrong with people., There's future generations ahead & they won't know nothing about life in general. Hell all they know is cell phones, murders, rapes & so on. Just saying. I'm done for now.

Carol

Martin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Think of your children and grandchildren and the next 10 generations. We'll all be gone ~ will the earth be sustained. Stop the selfishness and greed ~ please!

Julie

Polzin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's simple actually, start planting hemp fields. Trump is garbage, impeach ASAP!!!

Isaac

Shockley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. David Hood

David Hood

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This Forest is for our Grandchildren & their children. Please save our forest for them!

Jennifer Morlock

The Tongass National Forest is extremely important as a vast carbon sink in the fight against the climate crisis. In light of the recent scientific findings indicating that carbon in the atmosphere keeps rising and the Greenland ice sheets and glaciers are melting much faster than predicted, how anyone can even consider opening the TNF to harmful mining, logging, and oil and gas drilling, is beyond belief. Once the TNF is gone it is GONE. We need our old growth forests to combat climate change and we need to leave fossil fuels in the ground. Our children are relying on us.

Stuart Heebner

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't let this happen to one of the few places we have left to show our children.

Melissa Henderson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of the old-growth forest will intensify the effects of climate change. Sincerely, Diana Meihofer

DIANA MEIHOFER

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an unbelievably short-sided idea. Please do not ruin Alaska and the world climate for our children and future generations.

Deborah Buchanan

If we chop down all our trees & kill all our animals then what? We are killing the future for our children by not recognizing how severe climate change already is. We must preserve this precious forest! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Barbara McDaniel

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wild-life and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth destructive & permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the Environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of Climate Change !

Leo

Souto

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The forest are the lungs of the earth just as much as we need the rainforest in south america we need to protect all foreats in north America

Joseph Bennett

?PAY ATTENTION:: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jennifer Gervais

The beautiful and wild Tongass National Forest is of global importance and should be preserved. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The argument that this will boost Alaska's economy is false, as only 1% of it comes from the logging industry, and a meager increase isn't worth permanent consequences. Additionally, the proposed directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, which the public majority strongly believes in. Please do the right thing, and reject the directive.

Kristen Endrizzi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please keep the roadless designations. Please ensure the continuation of the fisheries. Protect old growth. Leave the Tongass pristine!
Sincerely, Thor Thompson 10302 14th Ave. NW Seattle, WA 98177

Thor Thompson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This will certainly, permanently compromise our county's wildlife and forests. This is not necessary. It is simply not in the best interests of anyone other than those who directly profit. Do you want this as your legacy for future generations? As a GA voter I ask you not to proceed.

jeff

odum

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't.. protect it please

Toby

Jones

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Elizabeth Pharr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you Helen Pawlak

Helena Pawlak

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is our Tongass and we will not let it be destroyed to oil and gas. It must be saved forever. We need to save our Earth not continue its destruction. We will never cease fighting for the Tongass. You must allow it to be left alone. Do the right thing. Be a part of the solution, not its destruction.

Sylvia Rodriguez

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas extraction has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, although only 1% comes from the logging industry. This isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The Tongass must be protected and preserved for the benefit of wildlife, local communities, and future generations of Americans who deserve to enjoy the beauty and recreational opportunities it provides.

Joyce

Hofmann

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

STUART ENGLAND

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am mostly concerned with new road construction and proper construction of existing or closed / decommissioned ones for self draining contours instead of culverts that blow out. Timber is a renewable resource, lets manage the forests that we have already cut over.

Tamara Shannon

Preserve this natural wonder for your children's children and generations to come. Don't let another part of the world be destroyed by corporate greed. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Anna Schepler

Florence Sheils

The Tongass National Forest - STOP the logging and destruction! The rainforest being kept intact is critical to survival.
Sincerely, Florence Sheils

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Sereina Winters

Enough is enough....put your greed and pride aside. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Emanuel White

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. WE MUST STOP THIS GUY!!!

Janis

Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This pristine area **MUST** be protected! Even Obama knew this!

Elizabeth McPherson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I strongly urge that you reconsider your opening of this forest to commercial interests. Have you ever been up there? It's one of our "Edens". Alaska is not a poor state. This would only really benefit out of state commercial interests in the end. So you want it on your conscience?

Mary

Zippel

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Not only does this effect climate change but destroy millions of species homes.. As if humans hasn't already destroyed others biomes and cause extinction among other species. Also, with all the forest fires going on.. It seems like people would want to protect the amount of trees we could! No trees.. No oxygen.. Which means extinction of humans.. Which means very little carbon dioxide.. Which trees absorb.. It's a cycle. It's basic grade school science!!! He just

Maggie Stamper

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I will not be voting for you in 2020 if you continue to ruin our forests. That is all.

Rhonda Good

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. A

Allen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There shouldn't even be a question on saving the trees we have. Ppl are so dumb especially the ones with \$ and power.

Jerry

Toe

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Don't let Trump ruin any more of our land! This kind of directive is the wrong direction.

Jan

Twyford

Stop. Don't do this. This biodiversity cannot be replaced, and the damage cannot be undone. If it's about the money, then figure something out. If you're afraid of what will happen if you don't, then consider what we'll be left with if you do. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David Scheidler

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I ask you to please stop this terrible mistake. Our planet is in serious trouble and the last thing it needs is any disruption to this precious and crucial old growth forest. Enough! Heed the warnings of scientists and the American people. Thank you.

Pippa

Pearthree

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Chopping down Alaska's forests will only hurt their number one industry, tourism. In fact, I'm thinking of canceling my 2020 tour if your proposed policy goes into effect. I am only one person, yet social media can expand influence far beyond my own personal decision. Choose what is best for the people of Alaska.

Donna Watson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave our Natural lands alone!!!

Karen

Russell

Dear President Trump, I am very concerned about habitat destruction. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Mejia González

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have participated in trying to keep the Tongass protected for many years. I am so angry that it is still necessary and that the Trump administration has run roughshod over every environmental effort we have ever made. Let forests stand to serve their original purpose--functioning, necessary parts of our environment; we don't need to ruin the planet just to make money. It's not ghost bears or big trees, it's our life support systems.

Jane

Clark

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am asking you again to listen to your instincts instead of greedy corrupt traitor traitor traitor trump and leave Tongass National Forest alone--if you dont mind.

cathy

Rupp

This is the biggest raping of nature in 100 years ! STOP now! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Thomas Gannon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effect more than just the animals in that forest. We will be affected too. Please, we need to protect wild life and special places like this forest. If we destroy this place what is next? This forest can't be replanted. There are other options for wood. This forest does not need to be destroyed.

Sam

Smith

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alexandra Lesar

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please reconsider any unnecessary destruction of any national forests, parks or anything that affects the ecosystem. They are all necessary and vital to survival, ours and the wildlife within the area. If they are not willing to replant and help with it's survival after taking from it for their own survival then we don't need it. Precious resources should be protected not destroyed. No I am not someone who believes in the climate change global warming that is

Dentina Ward

Please, it is so crucial to leave our planet alone and not strip it of all its resources for the sake of monetary gains. We do not need the 1% that would boost the Alaskan economy. It is insignificant. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. We need our rain forest !

Linda

Terry

back. The damage will be done, but right now, you have the power to stop it. Please don't allow the Trump administration to put you in the position to destroy this important forest. Keep it protected for your sake and for the sake of our children and the generations yet to come. I know President Trump doesn't think of future generations or anything beyond money, but there are so many things that are more important, and this is one of the most important decisions you will make. I hope you make the right one. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with

Debra Bock

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and u forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Darlene Mosley

of the Earth, to take care of it. That means cultivating our resources and protecting them from harm. In turn the planet will take care of us. But if you allow Trump to trample on old growth forests out of greed, we will be punished, not protected. Regardless of your beliefs on Climate Change, please think about the beauty in this world that is worth fighting for. What a shame that taking care of the only world, the only home that we know can support our existence, is such a controversial issue. Leave old growth forests alone. They are critical for filtering the water we drink, holding down the soil which also filters water, harboring animal life which supports the ecosystem, which supports us humans, and is a great beauty that we can enjoy for hundreds of generations (if we don't destroy it like rotten children pulling up their parents garden). If you view this planet as God's garden, then for goodness sake, take better care of it! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions

Anne Leppold

Our forests and natural landscapes are unique and full of life. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David

Green

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Though the above paragraphs were crafted for my use, I completely agree with their content. If I recall, the farther north forests are located the longer it takes to reach the size for profitable commercial lumber. Will it not take centuries to replace this timber if plundered? How many, yes count them, individuals will profit from this loss? I guess you have to count the taxpayers of Alaska, but perhaps they should be taxed for the damage they do to the climate

Judith

Litt

Christopher Holman

Stop allowing private companies to take advantage of the illiterate disgrace holding the office of president and defend our god damn environment. It's ridiculous we even have to have this conversation at this point, and be assured eventually we, as a people, will get tired of this.

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Pollution, and the thinning of the ozone layer, isn't simply letting the gases of pollution escape. As the Earth turns, the pollution encounters trees that put oxygen back into the air. The latest 3D modelling provides different materials to build with. The elements of the earth need to remain in/on it to perform the reparations they were created for. Oil for cooling. Minerals to leach into water for our food supply. Critters to balance organic cleansing, and population

Matthew Peck

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change mothafucka.

Fuck

You

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This will be detrimental to future generations and the environment.

Joan

Binkley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please think of the consequences before you take action!

Renee Noehre

I am opposed to opening the Tongass National Forest to the permanent devastation that is caused by logging, mining and oil and gas exploitation. Preservation of old growth forests such as the Tongass is essential for the protection of wildlife, attempting to mitigate climate change, and for our own quality of life. Economic gain from logging, mining and oil and gas extraction would be for a slim minority, not the general population, and the permanent damage caused by these industries would be detrimental globally. The Trump administration's directive to ignore long standing exploitation restrictions in the Tongass National Forest is a ruthless attack on biodiversity which is critical to our own quality of life and long term survival. Please, Secretary Perdue, say NO to misguided directives to allow irreversible and unnecessary destruction in the Tongass National Forest.

Stacey Cochran

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bessie Brogdon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. STOP DESTROYING AMERICA!!!

James Webster

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Once these forests are decimated, the ecosystem within the forest and surrounding areas are affected in negative ways. Mining and oil drilling causes air and water pollution and the land cannot recover what took hundreds of years to create. The state of Alaska has also had issues with the trash left around from the Oil companies that drilled and transported oil from that state before. They were not made to clean it up when they moved on. This had been documented in a book named "Midnight Wilderness- Journeys in Alaska's Arctic National Wildlife Refuge" by Debbie S. Miller. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based,

Joyce

Depew

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and that is not worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act (NEPA). The NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. This is not being done. The loss of old-growth forest will intensify the effects of climate change. It endangers wildlife and people who depend on it for food. This is far more important than allowing corporations to make more money. The Tongass is the world's largest intact temperate rainforest. It must be protected.

Debra Diegoli

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. OHAND STOP TRYNA FUCK OUR PLANET DUMBASS BOY!!!!

Jimmy

Malone

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Gott stop these motherfuckers now

Ryan

Villone

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. P.S. You're fired!

Cameron Barros

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. To 'have dominion over the earth' means that we are obligated to protect it - we have no right to destroy it. Sincerely, John J. Carroll

Carroll

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please, do the right thing.

Hannah Wiles

The Tongass National Forest is important to all of us. Logging, mining, or oil and gas have no place there. This directive violates the process of the National Environmental Policy Act. NEPA makes sure that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ruth

Lee

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are literally made of the same stuff our precious planet is made of. Whether or not we understand the significance of each ecological nuance of the Earth, be assured, it exists for an essential purpose. While our individual rights are sacred, there is no individual outside of the collective. To harm any part of the Earth is the same as harming ourselves. To love the Earth is to love ourselves and each other. It is to love God.

Julie

Wolf

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Think of the future. Think of the Indigenous People.

Jordan Wright

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not let this happen.

Linda

Welke

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. People have been fighting to protect this treasured irreplaceable forest for many years. I know. And yet, greedy special interests keep coming back to attack and destroy it. Our government must not help these special interests in their quest to destroy the Tongass. We must move to permanently protect the Tongass National Forest as the important environmental treasure that it is, especially when the impacts of climate change are already upon us.

Eric

Speed

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I've been there and it truly is a beautiful place that needs to be preserved! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mike

Eastman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jennifer Williams

Opening the Tongass National Forest-- which is to say old growth forest--to logging and mining would be unconscionable. And at a time of climate crisis our survival depends in part on creating more forests, while destroying more will contribute to our potential demise. The Tongass is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. It is short-sighted and irresponsible to put small economic concerns ahead of our prospects for survival on this planet. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

john

lent

The Tongass National Forest must be protected! It is the last intact rainforest in the world and a major carbon sink. We are in the midst of a climate emergency and it is criminally negligent for your department to open it to logging, mining, or oil and gas. This will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Stop choosing profit over our environment's health. You are endangering our safety. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Please reject these directives.

Katrina Taylor

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is unconscionable to damage our precious, fragile environment for the sake of mindless greed. We must do everything possible to protect our world, not cruelly exploit it. Our children, grandchildren, and further posterity need and deserve it.

Sherry Ash

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I strongly oppose privatization and land trades in the Tongass. Please maintain the current prohibition on adding roads, mining, fossil fuel operations, logging, grazing and other commercial activities. Our planet is in a climate crisis. The Tongass has large tracts of old growth forest, which sequester more carbon and provide more ecosystem services than younger forests. Clear-cutting trees would release significant amounts of carbon into the

Chris Cusack

Andrew Murrain

lord knows we must save the trees

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jose

Zamora

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Countries have been upset with Brazil's actions on their forests. Why is no one talking about Trump's actions on our forests? Double standard?

Ruth

Flemming

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. WE can not let him do this - impeach, remove and JAIL this administration - they are all corrupt crooks!!!!

Janet

Potter

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have already been killing the world in new ways each day and now we have to go out and attack the last of these places on the planet ?

Justice

Sales

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Andrew Thorpe

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PROTECT OUR EARTH!

Whitney Garcia

IF YOU CANT SEE HOW FUCKED UP IT IS
TO DESTROY THE ANIMALS AND THE
FORRESTS, YOUR A FUCKEN JERKOFF...
NUFF SAID.

Christopher Pleis

Please read this because we are running out of time really quick and we need to act soon. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. IF WE DONT ACT NOW IT WILL BE TOO LATE. LET OUR CHILDREN AND THEIR CHILDREN BE ABLE TO EXPERIENCE A HEALTHY LIFE WITH FLOURISHING HEALTHY FOREST.

Kai

Melton

I m from a logging area and it ruins Nature in its cycle of life.The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Claire

Josten

I would like you to stop any destruction of this forest. The Tongass National Forest is of global importance, it helps sequester large amounts of GHG and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sue

Fox

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trees are important yo, leave them alone bud.

Justin

Bangtson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. By legalizing hemp we could end the attack on all of the world's forests. With an efficiency rate almost 1000% more of what wood is hemp would produce so much more money for you and your friends in the timber industry if they sold their wood plots and started using previously excavated land for hemp farms.

Sean

Booth

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Just because Greta Thunberg has joined the ranks of those tRUMP loves to hate because of her selection as Time magazine's Person of the Year does not make our global environmental crisis go away. We MUST do all we can to protect our environment. tRUMP's policies negatively affect the ENTIRE planet. DO NOT ALLOW THIS ECOSYSTEM'S DESTRUCTION TO BE THE EARTH'S LAST STRAW.

Sue

Diyg

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is URGENT and CRITICAL. We care and we are WATCHING.

Catherine Perry

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Soroudi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Why, why?

Barbara to Roberts

Please do not open the Tongass National Forest to logging. National forests were so designated precisely to preserve the trees and the natural environment of their protected acreage. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Respectfully Robert Lager

Robert Lager

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave the forest alone! Dr. Sam Manning

Sam

Manning

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This willful destruction of our natural resources and our wildlife must be stopped! Please stand up against this proposal!

William Alberts

Time to help already established businesses instead of ruining an entire ecosystem. It's been proven that if we farmed hemp, it'd be the best replacement for paper and could be used for over 75 other products. That would allow the USA to farm trees for lumber products instead of paper. Less water needed to process would benefit everyone in the US! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Joe

Petroski

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. PLEASE PLEASE TAKE THIS SERIOUSLY WE THE PEOPLE ARE BEGGING YOU Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kaylin

Stultz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This is the most selfish thing I have ever heard of! There are animals that live there and depend on that forest and to take away their home is selfish not to mention we need trees and forest to keep our oxygen on this earth you heartless if you don't think about the animals and the earth! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Danielle Chant

Don't be such greedy fuckheads. Stop destroying our fucking planet, you cunts.

Madelyn Bott

By letting Trump hand it over to loggers, it will hurt the forest so much. We need the trees for oxygen. We're already down so many trees, we don't need to lose more. And so many animals will lose their homes and could even be killed if loggers are allowed to freely use the forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Sirius

McLellan

The loss of old-growth forest will intensify the effects of climate change. We stand with science and scientists for the protection of all Creation

Ted And Frai Essex

Justin

Leiter

Our environment can't handle many more devastating blows. We're in a time where we have to think about how to lessen our impact and create a stronger symbiotic human-nature relationship. It's the only way we'll outlive this planet. You know this better than I. What if loggers plant two trees per tree they cut down? And then they eventually only cut what they plant as so to leave the old growth as it is.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify climate change. Too many of our National Forest and Parks are being destroyed by Big Business bringing about Climate change and extinction of many animals. It is our Moral Duty to stop this NOW.

The loss of old-growth forest will intensify the effects of climate change. "God loves the birds and invented trees. Man lived the birds and invented cages." What will result in this as we continue to take down the birds' natural home? For what shall it profit a man, if he shall gain the whole world, and lose his own soul?

Jovi

Pasay

Are you fucking kidding me right now??
How many more environmental things
are you going to fuck over before we get
you the hell outta office?! Stop fucking
nature, you prick. We only have one
Earth, and regardless of your thoughts on
global warming, I think it would be rather
tragic to have a world with no more
green spaces in it. You should try visiting
one for a change. More breathtaking
than a golf course...

Cecily

Gatewood

than half of Alaska's irreplaceable Tongass National Forest to logging. The Tongass National Forest is of global importance. The loss of old-growth forest will intensify the effects of climate change. Opening it to logging, mining, oil & gas as Trump proposes would have permanent, irreversible consequences on all life in the forest. Cutting it down would deprive animals moving northward to escape warming ecosystem no place to escape. At 17 Million acres, Tongass is the largest remaining temperate rainforest on earth, and America's largest National Forest, The Tongass is home to bears, wolves, eagles, & deer; orcas & salmon live in the waters that surround it. Many Alaskan Native communities today- those who led the fight to save it & stewarded the forest would face irreplaceable damage to their way of life if Trump's reckless resource grab moves forward. Created in 2001, the Roadless Rule which applies in the Tongass, keeps roads out. Trump would override it to do this. I understand Trump is specifically armtwisting the US Forest Service to

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. DO IT NOW!

Amparo Sánchez

I truly agree with this. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't help to destroy the only planet we have. Come up with less destructive solutions.

Jared

Schultz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. All humanity does is strip mine the earth of her animals and resources. Isn't it about time we stop.

Stacy

Miller

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Money doesn't last forever. We only get one Earth to love and cherish, and be taken care of by.

Emily

Rufflo

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Allana Finn

Allana Finn

Stop this this is not the way a president should be when it comes to wildlife and their habitat let's save God's creatures and their habitat for the logging construction and trump and please help them the wildlife animals have done nothing wrong and done nothing to anyone so they don't deserve to have the habitat destroyed by logging and trump. There is only one president in my heart of this country it is not trump the president of this country and earth is god and lord jesus christ is the president and he will have say so about logging getting stopped and save wildlife animals and creatures that he put here to be saved

Patricia Alden

The Tongass National Forest is of global importance! Opening it up to logging, mining, or oil and gas will have permanent, and detrimental consequences! This latest attack on wildlife and forests is made under the guise that it will boost Alaska's economy! Only 1% comes from the logging industry, it's not worth permanent consequences! Our future generations are at risk if this is allowed to happen! Trump's directive violates the process of the National Environmental Policy Act! NEPA ensures that major decisions affecting the environment are based on fact, not hot air! Let's consider alternatives, keeping public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. And leave our future generations to clean up this mess! ??

Susan

Fischer

The Tongass National Forest is of global importance! Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests comes under the guise that this will boost Alaska's economy. In fact, just 1% comes from the logging industry and certainly cannot justify causing irreversible consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives. It ordains they be made with public opinion in mind. Here by contrast, the loss of old-growth forest will intensify the effects of climate change. A great majority of the public opposes this senseless idea.

Rosi

Meza-Steel

Dear President Trump, The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Your planned directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please reconsider your directive and leave this forest intact and protected from logging and destruction! Sincerely,
Tom Shea, MD

Thomas Shea

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please save our forest for our grandchildren to enjoy!

The loss of old-growth forest will intensify the effects of climate change. tell him to take down the trees in his own yard and leave it barren like the presidency!!

john

Tsarnas

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. On a personal note I grew up in Alaska and have experienced its unparalleled beauty. Allowing Donald Trump to sell it off piece by piece for his buddies profit would be no different than a French PM selling someone permission to loot the Louvre in Paris.

Ann

Pierce

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no act to ensure that if major forests get cut down to replenish and regrow the forests environment, instead loggers, miners, and whoever's else is involved move on to the next forest. then the next forest. This vicious cycle needs to be stopped. I'm signing this petition to help the Trump Administration understand that these values are running out of space and time. Not once has there been talk on regrowing forestry where they once cut

Natasha Orr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. michele yates

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My guess is that people who support the loss of old-growth forests have not spent any time in them. Or in nature, in general. I encourage you to take a visit. Surely then you'll be unable to use your considerable power for the destruction of such important gifts and responsibilities. Protect the Tongass National Forest!

Amy

Dwyer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife for the sake of development and "progress" isn't worth the permanent consequences. Keep our wild lands wild! This directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mike

Novotny

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that it will boost Alaska's economy, when, in actuality, only 1 percent of Alaska's income comes from the logging industry. That simply isn't worth the devastating, permanent consequences. Trump's directive violates the process of the National Environmental Policy Act (NEPA). NEPA ensures that major decisions affecting the environment are based on fact, and consider alternatives and public opinion. Trump's intended actions do none of these things. In addition to its effects on wildlife and air quality, this loss of old-growth forest will intensify the effects of climate change. I beg you to say no to Trump and do all you can to protect the Tongass National Forest. Sincerely,
Carol Jaskulke

Carol Jaskulke

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please stop this before he does any more damage to our home, our planet.

Rachel Patzer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change and destroy trees that have lived longer than any of us. Selfish greed has been Amerikkka's primary reason for existence since it was founded. If we don't stop the avaricious destruction by the few, our planet will die as a whole.

Larissa Evans

Clear cutting only leads to destruction of of a natural habitat for plants and animals and ultimately, humanity. Please reconsider this. It's not too late yet. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Craven, unabashed greed cannot be allowed to dominate America any more than it already has. We have almost nothing left. Our current president's continued debasement of his office must stop. It must stop now.

Devin

Perkins

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save our ecosystem and help save the planet. This president thinks all things are for sale, including the constitution. He needs to go back to his business and run that into the ground again.

Linda Duhaime

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Let's not put money above the health and security of our planet. Thank you so much.

Susan Field

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The destruction of habitat, interruption of millenia old migration routes & the all encompassing environmental degradation, will result in disaster locally, & will only further global environmental harm. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For God's sake, only 1% of existing forests are old growth! How can you be willing to destroy them & permanently alter this ecosystem for a few short term profits for the logging industry????

Constance Hicks

STOP actively destroying OUR environment, wildlife & entire ECOSYSTEMS for profit. Period. FULL STOP. WE THE PEOPLE. ????

Tracy Carver

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. ThTrump leave the forest alone and get back into the Paris agreement. The loss of old-growth forest will intensify the effects of climate change.

Sandra Allgeyer

Susan

Allred

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent. Please don't do this.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There are two essential things in life that we simply cannot do without; 1 a livable climate, 2 humane treatment for all. Protect our national parks, protect our world, protect our children.... Period. Sincerely. Sarah Hughes

Sarah Hughes

Annette Newman

Why on God's green earth would you EVER support anything that goes against nature? What supernatural resource do you go to for your oxygen? Did you get beat up by a tree in childhood? Do you not have a family or hope for the future? Do you think it possible that you could be that one person who stands by your principles and not your pocketbook?

Vilas

Keith

Keep America great! Don't open Tongass National Forest to logging, mining, oil, or gas extraction. Please protect it for the people of this nation, not the corporations.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. No, no, no!

Glenn Wingate

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to be protecting the bit of wildlife we have left, not destroying it. We are killing ourselves along with this entire planet with ridiculous actions like this. We must love this Earth. It is all we have.

Stephanie Mena

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David DeMichele

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is simply not acceptable. We must protect all forested areas that remain, because they don't just come back.

Jake

Girard

Leave the Tonga National Forest in its natural state. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Geraldine January

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Aurora

Parker-Holloway

National parks and land were not set aside for private industries to make a profit. To open them up for sale goes against their very purpose. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Barbara Henry

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop terrorizing our fragile balance. We have lost so many forests already with Brazil's massive burning, excessive logging, natural disasters, insects infestations!!! When will it end?

Diane Graybeal

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We've worked for years to protect the land in Alaska, and that's what makes Alaska special. I was born and raised there and it would break my heart to see it destroyed. Once it is destroyed there is NO replacing it. We can't go back. The resources within it are finite, where as the joy and wonder it can bring to the world by being left alone is infinite. Please don't let profit come before people, or at least let us vote. Don't violate NEPA.

Riley sessions

of pristine, wild, roadless late-successional Temperate Rainforest in the world, and Temperate Rainforests are a rare and endangered ecosystem on a global scale (they only exist in narrow bands along the north Pacific Coast, parts of northeastern Asia, South America, and Australia and New Zealand. Saving what's left of the world's intact Rainforests is vital as a buffer against global climate change. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. A far greater economic gain could be made from a sustainable tourism economy and sustainable small-scale fishing, hunting, and recreation, than what would be gained from a few timber sales that would deplete the last roadless Ancient forest in a short span of time. For communities who live near the Tongass,

Timothy Comrie

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Come On.. We have taken so much land.. Leave this for THEM ! thank you Ramona R.

Ramona Raines

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop letting this angry cheeto do whatever he wants.

Lennart Carlson

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The northwestern timber states of Oregon, Washington, Idaho have been stripped of their old growth forests. Alaska's timber stands are rich in wood, minerals. oil, gas, mining, logging and natural habitats for the many species of wildlife which call Alaska their homes. How long will it take for all these locations to rebound from spoiling the lands, waters, habitats and animal species thriving at this time in this state. What profit is expected to be earned by

Sonia

Klalus

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We understand the value of this forest and do not want it damaged, deforested, harmed in any way. Leave the land and the trees as God made them. Every piece of valuable resource should not be killed/plundered for a profit. I do not want to live in an asphalt or concrete jungle. I want to feel the joy of sitting under a tree, listening to the wind blow thru the branches, make memories. Don't turn it into a for-profit venture. Leave God alone. Thank you.

BETTYE MORGAN

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Fuck Donald Trump.

Rex Destiny Roskos

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Christy Bull

Audri Ingram

Please don't do this. We are killing our beautiful planet. Alaska is the last frontier. It is rugged, raw and beautiful. The way nature is meant to be. The only people this will effect positively are the 1%. It will be harmful to the tourism, the ecosystem, the climate and the co,mon folks who rely on that forest for food. To do this would be a heartless act against nature and the American people.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. Stop changing the earth let it grow before we destroy our world for good. Buy land and plant trees don't destroy a home of many animals

Kailee

Pinkerton

advances on taking and exploiting one of nature's natural wonders and Alaska's largest temperate forest. The forest serves as a home to over 70,000 people in the region and home to wolves, grizzly bears, salmon, and much more. Allowing the President to give this ecologically important area to logging companies will only spread disaster as the beautiful biodiversity will be diminished, habitat destruction and fragmentation will occur, and also bringing about potentially irreverible and detrimental consequences! Don't let God's creation be destroyed by the ignorance and greed of big corporations and manipulated by politics and economics. It was placed there for a reason and so it shall stay. Let the life forms that don't have a human voice to speak in defense remain and be protected. Protecting this rare, old growth forest can help to preserve ecological integrity and even be a step in preventing the onset of climate change. Please leave something for future generations of people to benefit and enjoy. A wise man is a blessed man. You

Jaden Matthews Johnson

Angela Perry I hope you lose 2020. Don't ruin the green.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Save the Forests. I support Trump in many ways. But this I don't like. This isn't just our world. Earth belongs to anything living. We are merely but a speck on the timeline. I mean, you guys in Alaska even going to see the money for your state being mined and logged for profit? It's the last frontier. Let's not turn that into a history lesson. -Kc from Mi

I just completed an 8-week study in environmental justice and am alarmed by what we are doing to harm all of creation. Please read the non-political, non-partisan science that says we are in trouble. As a grandmother, I send this and dedicate my efforts to my grandchildren ... , The Tonga's National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Victoria Millward

already almost void of old growth forest as we speak. These forest do no grow back overnight, it literally takes thousands of years without any human intervention for it to be possible. Hardwoods and other slow growing trees rely on treefall (of faster growing trees) before they ever reach the canopy and fully mature. The interactions between plant and animal species in these forests are unknownly diverse. It's a whole world on its own, a microcosmos if you will. It's like the human brain, a miracle of nature and logging it simply means killing it. Please find it in your heart to see the value of this forest, a value that can not be monetized. There are so many timber production sites where the old growth has been cut down long time ago. It does not grow back. There already is so little left. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only

Wouter Lammens

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change. Trump isn't helping here. Grow a forest somewhere else and then cut that one down.

Abner

Williamson

Hello, The National Forests have such a hard balancing act to do. Between logging request, grazing request, and conservation, it's impossible to make everyone happy. And I just wanted to say that I do understand that. However, I do believe allowing Tongass to be given over to Logging from conservation is a poor idea. And I don't mean that EVERY forest should be for conservation, America needs wood. But the Tongass is such an important piece of land in regards to its ecosystem that it needs protection. Not only that, but Logging in Tongass in the past has actually lost money! That is incredibly troubling to me to think that we might loss some of this beauty and the ecosystem may be jeopardized and that at the end of the day, we may not even gain any economic benefit from this process. Thank you for listening to my concerns.

Evan Wehmeyer

Shanoah Turner

Please don't do this. I'm asking as a Trump supporter. I grew up in Alaska, and while my brother and mother still live there (also Trump supporters) the thought of doing this is gut wrenching. The wildlife and forests is what makes Alaska "ALASKA". Please dont take that away!! This is SO IMPORTANT.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change.

Haley

Freshwater

Michelle Proehl

We as humans do not have a given right to destroy this planet. So many species of wildlife have suffered the consequences of human destruction to the point of being endangered or extinct. It's time to start putting things back together instead of taking more.

I visited the Tonga's this September on a cruise to Alaska. Our stop in Juneau afforded me an opportunity to see a totem pole display in a state park on the southern edge of the Tongass. The ship then cruised north parallel to the magnificent forest. It's beauty can not be destroyed to profit already wealthy men. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Harvey Burkhour

When I was a teenager I spent 5 days in the Tonga's and it changed my life in such a positive way. It would be a terrible terrible shame on your life to destroy such a national and global treasure. Don't shame yourself please! Protect the Tongas. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Rowan Roderick-jones

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is a disaster in the making. Please don't allow this! Thank you.

Gretchen Rollins

Kiva

Rasool

Money doesn't make up for smarts. Did he forget we need trees to breathe? We learned that in junior high science class. Leave that forest alone. Not to mention all of the wildlife you are about to exterminate. Wow! It boggles the mind.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We shouldn't be using Old forest Lumber for house building or furniture or anything else when we are full of building material alternatives

Douglas Donley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump is obsessed with the idea and with the accomplishment of destruction. Although he is too cowardly to do anything meaningful personally, he has no compunction concerning others to do his dirty work. Donald J. Trump is a useless, sad, sad and lonely little man with no friends or companions who unconditionally choose to be with him. Donald J. Trump is the archetypal irrational narcissistic being.

Jacob R. Raitt

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. These decisions are irreversible and not to be made for short term gains and political agendas.

Tori

Kitchens

Maya Allcott

Continuing to destroy pristine habitat for short term profit is beyond absurd- it is blind greed and folly. Have you no shame? What will your grandchildren think of you? This land is not ours. It is theirs. Stay out of the TONGASS!!!!!!
Despairing, Maya Allcott Dexter Oregon

Clark

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lauren Douglas

BEAUTIFUL LAND!!! Don't sell out this time!! THIS WORLD WAS MADE FOR PEOPLE, WILDLIFE AND NATURE , TO LIVE SIDE BY SIDE IN HARMONY!!! YOU CAN ONLY DESTROY SO MUCH OF THE WAY THE WORLD WAS MEANT TO BE, BEFORE WHAT YOU HAVE DONE BACKFIRES ON YOU! !! IT WILL THEN BE TOO LATE TO FIX THE PROBLEMS THAT WILL COME FROM STRIPPING THIS LAND!! On top of that, I JUST CAN'T SUPPORT A PRESIDENT, WHO LOOKS ONLY AT THE MONETARY SIDE OF ALMOST EVERY SITUATION!!! I know that YOU have NOT figured this out YET , BUT THERE ARE OTHER SITUATIONS THAT ARE JUST AS IMPORTANT AS THE MONETARY SIDE!! STOP!! BEFORE YOU MAKE AN IRREVERSABLE MISTAKE!!Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Debby Schwencer

Since the "roadless rule" was initially passed, and subsequently upheld in court, the relatively minor timber and mining industries of Alaska have sought to overturn it. Yet, in an age of declining global environmental health, the Tongass National Forest is more than just the largest intact temperate rainforest on Earth; it is a relatively pristine wilderness, which supports a massive ecosystem that must be protected. Our land is vast and resources are plenty, but responsible stewardship is required, and the destruction of such an ecosystem for the sake of lining industrialists' pockets is hardly that.

Christopher Tripp

Stop destroying our natural resources!
We need the Tongass and every other
rain forest and tree. Stop clear cutting
Stop waste Use renewable reusable
products. Our ability to have air to
breathe is more important than bottom
line profit. Make your millions saving the
earth not destroying it!!! Suzanne
St.Pierre-Donovan

Ryan

Bentley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest assault on wildlife and forests has been made under the guise that this will boost Alaska's economy, when data indicate that only 1% comes from the logging industry. This policy isn't worth the long-term or permanent consequences of the loss of the previous resource! The President's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

David

Wells

Something I have learned recently through my research is that trees are a simple cost effective solution to limiting the amount of CO2 in the atmosphere. We need to be planting more of them, and we especially do not need to be cutting them down. I have a two year old daughter and a baby on the way, and sometimes I cannot even sleep at night thinking about a dilapidated future world due to human destruction of our resources. I hope this message is heard and considered. We need to preserve what nature and resources we have left and deforestation is a major contributor to the regression of our planet. A 16 year old child named Greta Thunberg whom I am sure you have heard of,taught me that even one voice and one act can spark change and make a difference, which is what inspired me to write this letter. Let's preserve our forests so we can preserve our health and future, so our children can thrive and continue inspiring change. -Anne Franken

Anne Franken

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Geoff

OCONNOR

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. At some point, you and your ilk need to become aware that this is the only planet we have on which to live. You and your family and future generations of your family have to live here and if you keep going down the road of catering to companies whose single goal is to rape the planet and pillage its resources, then your family will pay the price too.

William Tighe

Clifford Stermer

Stop cutting down the fucking forest!
Plant some damn trees and cut em when
they are old enough. Look around you,
there isn't enough room for trees to
create oxygen anymore. Chill out bucky.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Enough with the destruction of our natural resources just because we can. Why don't we find a way to not think only of short term profits and focus on the longer term impact of our actions.

James Bentkowski

The Tongass Forest must be kept as is. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Zey

Chamberlin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kerry

Trim

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. President Trump, I voted for you and plan on voting for you again! Please stop this!

Vicky

DePaolo

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Furthermore the damage it will cause also endangers the future of our children and grandchildren who will be forced to live with the decision made purely for profit reasons with no regard for the world it will create for them to live in which has scientifically been shown to be one of turmoil and violent climates. Please keep in mind that money means nothing to nature and it can not be bought when the time comes that nature strikes back

Jamie

Suits

Monica Neely

Do not increase logging in the Tongass National Forest. We need to preserve the few intact ecosystems we still have to provide for wildlife that has already been pushed out of their native habitats. This region is key to preserving biodiversity, preserving healthy salmon habitat, and sequestering carbon from unprecedented levels of atmospheric CO2. Do not open the Tongass to logging.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't cut the Tongass. There is enough second generation timber to cut throughout the USA.

JOHN

DELUNA

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are the caretakers for what God has given us. It is only by good stewardship that we can guarantee it for future generations. Let us protect what we have been given!!

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We are in a sixth extinction event and can not afford the loss of biomass from logging valuable old-growth forests. Please stand up for the trees. Abigail Dwire, M.S. candidate, Biology

Abbie Dwire

importance, and opening it to logging, mining, or oil and gas has permanent consequences. Our planet needs to keep our trees because of the many benefits it provides for mankind but also all life on Earth. This idea may help Alaska's economy but afterwards, when the damage is done to the rainforest, what will happen then? My thoughts on this is, that one of the most important places on Earth is Alaska. It holds and preserves the trees and fresh water and ice glaciers. All natural resources we humans need to survive in the world. If you decide to cut down trees to build a road for logging, it will just be a little more trees the next time. Little by little, the trees will disappear. Then there won't be a way to stop the extreme climate temperature when the glaciers start melting at a faster rate. You may not think with your heart about these things but money isn't going to save the planet when we are all burning up because we have no more trees. Then it will be Hell on Earth. I vote No to cutting down our rainforest. Why would President Trump want to cut down

Veronica Moore

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. In order to save the planet and put a stop to global warming, we cannot be so careless about the earth and its forests. We need to protect them and plant more trees, or we and our children will all suffer the consequences. Please stop and take a moment to realize what you are doing to our planet.

Destiny Scroggs

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Michael Luzzo

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. President Trump's "Scorched Earth" approach to the environment has got to stop. We must preserve the ecosystems that currently exist and seek alternative sustainable ways to provide the materials necessary to sustain the global community's needs for food, energy, clean water and air, and affordable housing. Destroying the environment to provide these necessities is not acceptable and only provides a means for corporations to make huge

Aaron Hahn

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please please please save these sacred places. Please!!! We beg of you as brothers and sisters on Earth together actively sharing this word. Please remember this is the only planet we have. Let's respect it more. Do better. Be better human beings to one another and the beings who cannot fight for themselves and the spaces they inhabit.

Rose

Mattingly

What's going to happen to the animals that lives there. It's not always about money, and how would Trump like it if the shoe was on the other foot.

What's The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences.

This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences.

Trump's directive violates the process of the National Environmental Policy Act.

NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nancy

Davis

Please do the right thing for generations who follow us and protect what will take borrowed time to replace. Winther

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Adrian LeCornu

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alexis Smith

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. (Idk why anyone would willingly want to do this... They have ways to make crops grow faster to harvest quicker. Even to make them bigger... Why not grow trees for lumber to this same effect and leave the real ones alone... We should be planting forests and making our world inhabitable for our futures to come. Not destroying what so little is left.) Thanks in advance,
CharlescGuire

Charles McGuire

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I ask that you keep this pristine land unscathed from logging, mining, and drilling. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Teresa Folk

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Donald Trump should stop getting to make decisions like this for our country. Can't wait til it's time to vote, hopefully he doesn't somehow win again.

Lydia

Maher

Please don't do this! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect this National Treasure for all of us, now and future generations.

Sharon Bredemeier

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please work to save this rare old growth forest from destruction.

Martha Pott

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alberta Ocasio

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I know that people are going to do what they want to do anyways without any thought for our planet.... But, i hope there is still someone who can change your mind and soften your heart.

Malori Austin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. P.S. Nature can go on without us. But we can't go on without it. Consider the value of your breathing air before you start gutting the sources.

Trevor Oakley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect our forest and the vulnerable species within!

Rin

Blackwell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Alaska's economy is not as important as Alaska's (and the world's) health and stability. Killing the forest to extract a few years worth of profit for a very small minority is not worth the loss of a vital and irreplaceable ecosystem. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Michael Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Shelley Moody

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Clark

Ball

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do the right thing and protect this forest. Sincerely, Kathy Blodgett Roy, Washington Born and raised in Alaska!

Kathy Blodgett

I am disgusted to find out once again that that idiot Donald Trump is willing to do disastrous things to our environment in order to line his own pockets and those of other corporate entities. That area needs to be left alone, no question about it. I am vehemently opposed To opening those lands for any sort of exploitation. I do not want to see any sort of development in that area, It's just another example of runaway greed, greed and attention are the only two things motivating Donald Trump.
Sincerely, Roderick Gillispie II

Roderick II Gillispie

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.; Do not allow such a vibrant, treasured resource to be destroyed. Poorly considered plans will result in very negative consequences for Alaska and the world's climate as a whole.

Bettie Slusser

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is no planet B!!!

Claude Kenneson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do NOT strip the earth of this valuable resource, which is essentially irreplaceable in all its many helpful aspects and its magnificence!!!

Sharon Martin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump's actions sicken me. We must save our environment, and eliminate anything that would destroy the natural habitat. Sincerely, Mary Wood

Mary

Wood

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have plenty of timber available through timber farms elsewhere...it makes no sense to destroy an area like the Tongass for short term economic benefit. Mining and oil/gas extraction have no place at ALL in the Tongass...period. Stop making decisions driven by greed and start thinking about what you're leaving for next generations.

letty

nut

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I do not consent to any climate change unnaturally occurring do to human impact.

Joshua Faver

I'm a Trump supporter but the environment takes precedent over economy. I have young children. They will survive in this world without whatever logging company that goes bankrupt without these trees. They will not survive in this world if we don't put a stop to the uncontrolled exploitation of earth's natural resources. Frankly, I don't care about the logging industry. I don't care about industry in general. Why? Because industry does not care about me. Industry exploits people and seeks only higher profits and lower company costs. If a company needs trees they should try planting some.

Matthew Dewit

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Climate crisis is real. We need to reforest not create a new path to destroying old growth. How about building wind turbines and planting trees in Alaska to boost its economy!

Ruth

Bennett

beautiful animals and wildlife logging there is a huge mistake. The wildlife will lose their foods, shelters and their lives to logging which are not worth the small amount of money that will be made from the oil and logging industries. I see right in my own backyard how the logging to clear the land for unnecessary condos and housing affects our nature, animals and the many trees. It's NOT worth it. The land of Alaska are protected and preserved and should not be touched for any reason. May God guide your choices to do the right thing and choose not to log in our own backyard. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting

Brenda Pillot

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save this needed wildlife!

Aileen VanderSchoor

(Alaska Roadless Rulemaking #54511)
Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protect old-growth forest. We are against the selling of these public resources, since we believe keeping them intact provides more value for all, overall. We prefer to keep the raw, old forest resource as a commodity than log it now. It also provides worldwide positive externalities in bio-dome health that would be short-sighted to sacrifice in order to keep logging profits up. Hope you consider that.

Sebastian Varon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Fuck you Trump!

Jimmy Hasenpusch

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once the forests are gone it will take many lifetimes to replace it. This is a very bad idea and use of our natural resources, just for a few to make more money. Please consider the consequences and stop this plan. Thank you very much for your time.

Sally

Weidemann

Hello, The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do not accelerate the imbalance and subsequent of the eco - life - systems for the sake of money or convenience. Don't sow destruction. Please.

Nadeah Bikawi

National Forest as is; It is crucial because Mother Earth needs all the remaining Forests of the globe to rejuvenate her to better health. These forests are the Lungs of our home 'Earth, that aids all the living creatures to survive. Please do not destroy these natural habitats that are part of the natural ecosystem, just to support a few individuals who are not thinking straight, who are driven by greed wanting to fill their bottomless-pit bank accounts. In the long run, we will be glad we stand and unite together so we're able to drink from a crystal clean glass of refreshing water. Think of the grandchildren that deserve to enjoy living in a healthier atmosphere too... The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the

Vernetta Nay Moberly

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Help Us Save The U.S.A. From This Idiot.

Lisa

Geoghean

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alanna Roman

Please do not allow this terrible attack on one of our last and great national forests in the name of corporate greed! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Floyd

Montgomery

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PROTECT OUR FORRESTS AND WILDLIFE. OUR FUTURE GENERATIONS ARE AT STAKE.. NO ONE SHOULD BE ABLE TO LOG OUT A FORREST ESPECIALLY N ALASKA!!!!!!!

Heather Irvine

roman

agular

please dont destroy anymore. dont let
money buy you, think about other living
things and not just you and your love
ones because something bad could
happen to you too for not doingg the
right/correct thing

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have caused enough damage already. Think about the planet's future and what our progeny will inherit

Sondra Aaron

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am a Trump Supporter, but this decision to demolish part of the Tongass National Forest of Alaska is a DETRIMENTAL & BOGUS one as far as I'm concerned. I sincerely HOPE Trump changes his heart & mind on this one for BOTH GOD & USA COUNTRY!!! Thank you! & Many Blessings!

Sylvia

Byerly

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is insane to be cutting down old growth forests when we are experiencing dramatic climate changes such as melting polar ice caps and record flooding. These forests are essential to maintaining a hospitable climate because they help reduce carbon emissions in the air.

Janice

Cody

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Claire Haney

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. At the very least this deserves study. Once it's gone there is no bringing it back.

Flo

Williams

species that goes extinct due to over logging our beautiful forests, it throws off our eco system. We're pushing out our wildlife with no regards as to what it'll do to our perfect planet and ourselves. With every tree cut down, it brings us one step closer to drying out the natural resources our amazing and miraculous planet provides us. Eventually all of these greedy humans will have logged every tree for profit, over fished every Ocean for their gain and built and built more and more unnecessary buildings to ensure their law, shopping malls to keep us ignorant consumers, and roads to drive the way they want us too and there will be nothing left recognizable of our beautifully lush Earth. The forests are already burning and now you want to take more? Put aside your greed and power hungry egos. Stop to look, stop to see and smell and appreciate what was given to us and do your part to sustain it by preservation. Keep Mother Earth beautiful and teeming with wildlife, the way she was meant to be. Be kind to her or she will not be kind to us!

Jaime

Mandrigues

I agree with everything in Greenpeace's message. I am tired of the current administration's denial of climate change and it's willingness to sell off valuable land and resources for it's short-term monetary profit instead of intelligent long-term preservation and enjoyment. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thump is playing god now. Thinks that he is the one in power. Thump is Satan. God is going to knock his ass down.

Melissa Ahrens

The Tongass National Forest is a precious unspoiled resource. It takes hundreds of years to grow to the beautiful forest we now see. This proposal states that destruction of the Tongass will boost Alaska's economy: I beg to differ. It will provide short-lived profits for a few lumber companies, while destroying the more long-lasting and valuable resource Tongass provides through tourism, fishing and hunting. This directive from the president violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. In addition, the loss of old-growth forest will intensify the effects of climate change. The risks are real. Please do not proceed with logging the Tongass: future generations will thank you.

Sonia

Bayne

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Surely you can find more worthy things to do than destroy this resource. Shame for even considering it!

Rick Kraft

Mitchell Zaragoza Silva

Keep earth blue & green , Sincerely, the Moon

What does it take to get the bilgerant ass out of office? He plays politics like a spoiled child, and is trying , To run the country like a crooked casino. We know that impeachment is possible, but no one has the balls to say so. I am sorry but Trump should never have been allowed out of Vegas, he is gambling with our country and losing so now he is selling off our heirlooms for chump change. I am embarrassed to say that he is the president,and he is turning the rest of the world against us.Traveling this summer, doors were slammed in out faces and attitudes were hostile as soon as they found out that we were Americans.President Trump is a joke and a clown and should have never been given his own car keys much less a country.Save the forest, we need it. We need to find some one to run the country peaceably not some one who treats our country like his private sand box to shit on us all

Joanna Maddox

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There is enough going on to destroy this planet...Don't add this to the list. It has to stop.

Autumn Standley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to protect ... for generations not abuse and use for immediate profit and need.

Denise Javet

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongas National Forest is one of the last intact rainforests, to take that away and just give it to loggers, it isn't a good enough reason. To kill the home of so many different species, where would you leave them? Homeless and left to die because you took their home away. You don't take away human homes, so why take away defenseless species' homes away? Reconsider, not for your sake, but for the respect you should give every living thing.

Destiny Kley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need to preserve what we have of our natural resources. Money is not everything. What will be left for our children and grandchildren. Stop and think.

Norbert Schneider

threat of global warming from humans industrializing and burning fossil fuels and the constant narrative that well be dead in 10 years if we dont stop it. Its the same thing spouted over and over yet never comes to pass. However I believe that heavy industrialization or acts that cause destruction on a global scale even regional should not be overlooked no matter where it is or who does it. Such acts that where done to the rainforest in southamerica should have been taken seriously with no lite yet it was brushed off as nothing. What happened to having to save small pockets even large pockets of such treasures that are of a bygone age. Vasts amount of forests with creatures only found there laid to waste and yet for what. Does anyone do anything about it? Like i said i dont believe in such things as the globe is warming and we are gonna die ten years from now, its always changing getting hotter or colder you name it, but i do beleive we have an impact on this earth and if we let things like this to happen then where do we stop. I say we stop it

Harley

Decker

these places will never recover. Like the National Parks, individuals in charge have an opportunity to save them. As a Veteran who served our country honorably, I can say that the nature of the United States is very much the home many fought to get back to. Don't let America become any more of a wasteland than it is. Protect our country's economy by protecting its natural habitat. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please stop and reconsider how this will change our planet for the future and that of our children.

Tiffany Walerych

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Don't sit back while Trump destroys the planet for his own monetary gains!!!

Kenneth Cardinal

Im a scared conservative!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bridget Baldwin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Murray

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. National forests were created to protect and preserve for future generations. Let's not allow Mr. Trump to destroy Nature for his selfish, shortsighted gains. Sincerely, Cole Salera

Cole

Salera

Please preserve the Tongass National Forest. Its resources and trees are irreplaceable. There are second growth forests that can be used for logging. We cannot replace 1000+ year old trees. The other industries being considered for use on the area are a threat to all ways of life in the forest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jacqueline Lewis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences.

Environmental tourism is an economic force as well. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Helena Morrison

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change. Stop this moron before he can do any more damage to our country and our world,PLEASE!!!!!!!!!!!!!!

Debra Howe

Dear Secretary, I am woefully ignorant on this issue. Yet I don't think clear cutting in general is good. Also I have a very strange possibly misplaced respect for any organism that made it this far evolutionarily. Perhaps I am just becoming a codger who cowers from the fact that the world is inexorably inescapably changing, as is our species. Everything may be transitory in this impermanent world. Yet the conservation and conservatives have this one thing in common. We both hope the things we cherish will last a bit longer. I will be paraphrasing poorly from memory but Ben Franklin said "the world grows great when old men plant trees whose shade they won't sit in". So please leave a few old trees so new life may enjoy their old shade. Thank you.

Robert Faris

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. STOP!!!!

Flora

Trypus

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have a career of land management for thirty years and am aware of the need for selective logging for the survival of new growth forests. But it requires very close on-site supervision by land agents that know the planet, the watershed, and road construction. A complete study is required before boots go on the ground. This is a professional business with placement know-how.

Daniel Johnson

Hands off this forest please. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Karen

Mitchell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Continue to examine our motives, stay informed and speak out when we feel in our hearts this is not the legacy we want for future generations.

Annabelle Kertscher

How can you give away something that does not belong to you? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Haven't we destroyed enough of our earth. The lands God gave us! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Beverly Long

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The loss of old-growth forest will intensify the effects of climate change.

Noemi Rodriguez

the state more revenue, and protect one of the last truly wild places on Earth. Won't this help the economy in Alaska? No. Tourism and commercial fishing are the two biggest industries in the region. Timber accounts for 1 percent. The visitor industry accounted for 23 percent of employment in 2017, according to the Department of Commerce, and nearly one-third of visitor spending in the entire state is done in Southeast Alaska. One in 10 jobs in Alaska is in the tourism industry, according to the state's Resource Development Council. The wild, untamed stretches of Alaska, including those in the Tongass, are a major part of the state's allure. "We have over a million tourists come to Alaska each year, and they're not coming to see clear-cuts," said Dan Cannon, Tongass Forest Program Manager for the Southeast Alaska Conservation Council, a conservation group that opposes the proposal. Salmon populations are expected to suffer, as well: what's dangerous is the resulting soil erosion that pushes new types of sediment into

Stephanie Kelly

Any National Forest qualifies as "The Commons", a public space, set aside for use by THE PUBLIC not the government. It is not the place of a president to treat it as a commodity. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. LEAVE THE FORESTS ALONE!

Diana Brown

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The lumber companies have already hurt more of American forests. No more, please!

Nancy

Canfield

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please. While for many of the people in power this is just business, this is just "how things go", for me and my generation this is the future. This is the state in which my home will be handed down to me. So please - are you creating the Alaska you want to hand down to your children and your grandchildren?

Brenae Reeves

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I've lived here in Southeast Alaska for the majority of my life. The areas that are being pushed to open for logging/mining are essential to our subsistence way of life here. Many people rely on the harvesting of traditional foods that habitat these areas. To open it up would considerably harm the way of life for many of us here in Alaska.

Randi

Braz

years I called it home. Alaska knew oil would run out one day and did nothing to prepare. In addition to the willful blindness to look to the future the state is and has been suffering under global warming for decades. It is December and there is no snow in my hometown of Wasilla. It is raining. The permafrost is melting and villages which had been stable for thousands of years now have to be moved, at great expense, to areas where they will hopefully never sink. Removing more nature is the dumbest idea, it is not necessary, and the whole planet suffers when forests die. Alaska will figure it out. New ideas, new economic opportunities. The old paradigm is on its way out. Look at Geoship, a company using bio-ceramics to build homes that won't mold, are fireproof, and will last hundreds of years before it bio-degrades. There is no need to destroy more forest. Please encourage innovation. Below is the pre-written message of Greenpeace. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil

Vandana Murray

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change.

Pat

Hurley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Darlene Alpaugh

National Forest are places we will never truly recover if they are destroyed, and it's the worst kind of hubris to put the interests of industrial giants over the future of the entire world. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Following through with this directive would prove a weakness of character, a disregard for the democratic process, and apathy toward the well-being of the citizens your office is meant to protect.

Kieran

Paulsen

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must protect these areas for future generations and the health of our planet.

Kim

Schroeder

Sonny Perdue, President Trump is far from living the ideals of the Forest Service; to protect our nations forests and grasslands for future generations. In fact he's the absolute opposite. There is nothing sustainable about this idea. Just because it's in a remote location of AK shouldn't mean it gets the okay due to 'out of sight out of mind' reasoning. - Matt

Matthew English

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. At the very minimum, make yourself look good by acting in a humane and reasonable way. You could be the only soul to escape the damage that will ensue for your fellow trump administration colleagues.

Harriet Hunt

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop ruining our environment for money. We need our forests.

Beth

Buck

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Shari

McRae

I am a life long Alaskan. In my lifetime I've seen a lot of changes. High rises, the pipeline, crime, and so many changes. One thing that shouldn't change, Tongass Forest. It's a rare beauty. It is nature at its finest. People travel there to look at the trees, the majestic trees. Moreover, it's part of Alaskan history. Trees that were here when Captain Cook travelled Alaska. It's part of the indigenous people's heritage. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Friederike Cook

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise of boosting Alaska's economy when only 1% comes from the logging industry, and is NOT worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act, which ensures major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must protect what little natural areas we have left. We do not need any more gas & oil resources; we will only export them. This blatant action against the Tongass NF is a favor to the oil & gas industry. It has nothing to do with national security or the Alaskan peoples well-being. The Tongass NF must be protected.

Edward Churray

canned letter to have any affect on your decisions regarding the Tongrass National Forest because your head is inserted so far up Trump's rump that you haven't seen daylight for some time. None the less I am registering my opinion that this natural preserve must remain as is safe from commercial exploitation. This goes for all such lands that have been protected or should have been protected in the past. I wish to remind you that these parks, preserves and forest are National properties. Not Trump properties, not Republican properties, not Democrat properties, not corporate properties....but National properties. They belong to the Nation, the people, Americans. Keep your greedy hands off. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's

Daniel Hercik

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. BY OPENING THE AREA TO DEVELOPMENT, THE POLLUTION, CONTAMINATION AND DESTRUCTION TO WILDLIFE WILL FOLLOW AND THEN THE AREA WILL BECOME A WASTELAND. WE HAVE SEEN IT BEFORE AND IT IS ALWAYS TRAGIC.

James and Jc Mura Mr. and Mrs.

is in The Tongass National Forest as I worked as a mountain biking guide in Ketchikan, Alaska this past summer. In Ketchikan, tourism is the main driving force of the economy as many cruise ships arrive there everyday. These tourists sign up for all kinds of outdoor activities, like hiking, biking, canoeing, and more in The Tongass National Forest. The era of logging here is in the past and is still seen in areas along where I led my tours. The tourists were routinely disheartened looking at the views of land that had been logged in the past. Old-growth trees are so important to the ecosystem and the health of The Tongass is also important for the majority of the people's jobs in this area. Please do not ruin this Forest and the majority of people's jobs here by using an unsustainable activity that will only increase a small portion of jobs comparatively. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider

Sophia Truempi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop him.

Roxanne Keldahl

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Paul Hitzfelder

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of this national forest would be detrimental to all flora and fauna found in this ecosystem possibly even causing the extinction of entire species of both.

Kyle

Bixby

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Roger Luedeke Sr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This action by the present administration is so extreme regarding NEPA that it shows reckless disregard for the law. Please use your authority to stop this unethical and destructive action.

alida

royse

Mr. Perdue, Just because I'm signing my name to a form letter doesn't mean that I'm any less enraged about this plan to open up the Tongass National Forest. What are you guys thinking? Please read the following: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Eden

Wallace

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Susan Brandt

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have to protect our natural world for our own survival.

Madelyn Scheer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have traveled 48 states and this is one of my favorite spots. It is an invaluable resource that **MUST** not be destroyed. Please do whatever is in your power to stop this madness.

Elizabeth Magee

Diana Zaragosa

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Also Trump. Fuck you.

Holly Kramer

I care deeply about the world I live in and the people that live here. That is all.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Barbara Rueschenberg

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do the right thing. No logging in Tongass National Forest. 1% of Alaska's economy. This is not being a good steward of our natural resources. Thank you.

Cathy Lawson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate catastrophe. For the future of your children and grandchildren and my children and grandchildren, the Tongass National Forest should not have logging, mining or oil/gas exploration.

Karen Sharp

The Tongass National Forest is of GLOBAL importance, and opening it to logging, mining, or oil and gas has permanent, detrimental, and irreversible consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Believe it or not, it is happening!!

Marilyn Britton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is our generation's duty to maintain and protect our natural resources for future generations. It is time to put the common good for our nation's citizens over profit.

Stephanie Kirwin

The wilderness is losing more if this is opened up to logging and mining. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I stand for Trump however Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This may or may not be true however the wild life would suffer more than the economy will gain.

Okemah Wolfe

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. More and more our environment has been compromised; and it's time to take a stand and protect what remains of our precious natural resources. Please ensure that generations to come will have natural areas to enjoy.

Christie Walker

If you allow the tongass to get logged my 7 year old daughter will cry. Do you want that on your hands?

Finnegan Mahoney

This is madness. An amazing landscape and ecosystem, to be trashed with forestry that only grows back over most of a century. In neighboring BC. vast forests were cut, rather short term profits for workers and small municipalities, but mostly for big forestry corporations. Most of the money is long gone from those regions, mills have closed, more to come, disgruntled workers on social assistance, wishing that they could have access to the smaller protected areas. And this will negatively impact your wild sockeye salmon and other fisheries, not to mention many other ecosystem services. Please delay this at least until after the 2020 elections.

Roland Gerard

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Alaska does not deserve the wanton destruction this will cause to its wildlife and environment. And America does not deserve the wanton disregard the current administration is showing for the rule of law, including environmental laws enacted to protect wildlife, natural resources and people. I oppose this decision.

Beth

Stout

Having lived in Sitka, AK for 5 years, and knowing how important the Tongass is to Alaskans, as well as the rest of the world, I strongly disagree with any efforts to invade the forest for energy reasons. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jeanette Rutherford

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. S.T.O.P. this insane assault on OUR environment and destruction of PUBLIC lands for corporate profits!

Lee

Engstrom

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is the U.S.'s largest intact temperate rainforest. The Tongass National Forest MUST be left alone, as it is! It is of critical importance in our planet's battle against our Climate Crisis! ..and the future of your grandchildren and their future generations. The Climate Crisis surely outweighs greed ..in making our decisions. Period!

George Phillips

We need to start preserving our forests, our natural areas, our green spaces NOW while they're still here, or there won't be anything left to help clean our air. This is one of the most beautiful, pristine, untouched forests in the world - we please need to keep it that way. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kim

Schineller

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Forests are the lungs of our planet. They protect our atmosphere; they protect the inhabitants of the earth. They help to keep us healthy. Please do not sacrifice them for the sake of business and profits.

Richard Beercheck

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump doesn't care about anything outside his ivory towers! He knows nothing and cares nothing about the growth or animals that are outside anywhere. All he cares about is HIMSELF!!

Gerry

Williams

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is a holy place, please go see it in person and feel the beauty
Sincerely Carol woodman

Carol

Woodman

David

Williams

Destroying public lands for short term private gains enriches the few while impoverishing the many. Once destroyed, habitats cannot be rebuilt. The seemingly insignificant species we destroy in our greed might have held the key to our own survival. Assaulting nature is assaulting the future of mankind.

The claim that destroying the Tongass for the purpose of boosting Alaska's economy is like saying the America is becoming greater rather than losing its reputation around the world. Trump's plans help the 1% of the richest to gather yet more billions in their larders. It's a SHAM and Mr. Perdue, you are fooling no one except fools! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Barbara Pikus

Globally our forests are under attack by profiteering logging and mining companies. Let us act intelligently locally and save the Tongass National Forest. President Theodore Roosevelt was amazingly far-sighted in his era. Let us try to see into the very near future and honor the needs of the next few generations. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ann

Horan

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. This is not a worthwhile exchange! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jeanne Devine

be measured in money, vast as that sum would be. The infamy of destroying or even despoiling it for short-term money, a "mess of pottage" -- should it occur -- will live larger than that of the attack on Pearl harbor and will wreak more destruction for an incalculably longer time. Nevertheless I fully support the canned message below. Scott A. Weir, PhD (Economics), BA (Physics) Durham, NC The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott A. Weir

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. And the indigenous people that call this are home will be harmed. Trump should start acting like a president for all the people not just the rich ones. We do not need more fossil fuels, we need more renewable energy.

MICHAEL CASO

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an old-growth forest. It contains the largest intact temperate rainforest in the world! It is a pristine and extremely important refuge for fish and wildlife. It is a significant carbon sink and as such is very important as one way to combat climate change if left intact. Why would we destroy this with the construction of roads and expansion of logging, mining, and oil & gas extraction? We must preserve the remaining forest in the Tongass National Forest for the

James Cooper

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. DO NOT CONTRIBUTE TO THE TERRIBLE EFFECTS OF CLIMATE CHANGE BY DAMAGING THIS FORREST. AND WHY, SO LOGGING, MINING AND OIL CAN MAKE MORE MONEY. FOR SHAME!

Queenelle Minet

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Hold forest and wildlife protection above corporate greed. Protect the Tongass National Forest.

Tim

Groeger

protect the Tongass National Forest should be sustained and not bypassed by the Trump administration. Despite their temporary benefits, logging, oil and gas extraction, and mining generally result in lasting damages, and should be very carefully measured against our need for sustainability of our natural resources. In addition, because only 1% of the State's economy is due to the logging industry, it is therefore somewhat misleading to claim that this proposal will boost Alaska's economy in any significant way. The basic fact is, the short term benefits aren't worth the lasting damages that will result. In addition, the National Environmental Policy Act requires such major decisions to be fact-based, and to have alternatives that have been reasonably considered. As well, because public opinion is supposed to be included in the process, President Trump's directive violates the due processes of law. Another serious and important factor that can no longer be ignored is to consider how old-growth forests delay the effects of climate change. These

Rieser

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. P.S.: Forests are essential to carbon sequestration and we have currently no replacement for them. No modern invention has presented any such thing. We are losing forest, not just trees at an alarming rate. Even when replantings happen, they cannot absorb what a true forest absorbs when it is mature. Our temperatures are already way out of control. It is the end of October and in the San Francisco Bay area we're having 90-plus degree

gabrielle dahms

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For once, follow the law and stand up to protect our marvelous natural heritage.

Patricia Rowell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Unlike Trump we cannot do what benefits our personal interests. We must think of generations to come and our children who will live in a world of polluted water and unbreathable air. Mother Earth is real. Her blood is the waters of this planet and her lungs the forests. Trump doesn't care about anyone's future but his own. Our destiny rests in the hands of rational men and women.

Patricia Reynolds

The remaining forests are of global importance, and it is clear to us, not blinded by greed for plunder, that conservation of the life and lungs in the forests, oceans and topsoil we have left is critical to life now and in the next generations. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kathlyn Pihl

Marilynn HeinzeThe Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Marilynn Heinze

The Tongass National Forest is globally important, and opening it to logging, mining, or oil and gas removal has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please hold forest and wildlife protection above corporate greed.

Judith Bentley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have lived my entire life (now 81 years) in the region that holds the great forests along the Pacific Ocean. I know the value - both to people and to our environment - of these forests that include the Tongass. We must preserve this resource.

Karen Hildebrand

Paul

Agrimis

The Tongass National Forest is biological and climate resource of global importance. The proposal for opening portions of it to logging, mining, or oil and gas will have permanent, long-term consequences. The President's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Please withdraw this misguided proposal.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have never been to the Tongass NF, and although I would be overjoyed to do so, I may never get there to seek it. But I want this magnificent, timeless forest and the wildlife it supports to remain in place in the hope that my children and generations to come will be able to visit a pristine wilderness not fouled by roads, mining, logging or other exploitation.

Robin

Roark

Stop the destruction of the Tongass National Forest! The Tongass is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences that are unacceptable. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent adverse consequences. Trump's unwise directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest is totally unacceptable and will intensify the effects of climate change.

Larry

Lambeth

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This needs to stop now.

Paul Wytepek

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Per GreenPeace, Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Thomas Ohns

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop this Insanity. Stop turning Our Country into a Wasteland all for the Greed and Profit of the Corporate Oil Barons.

Kathleen O'Brien

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please listen to the people, for whom you work. Thank you.

Sheila Weigert

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I implore you to protect this priceless resource. Thank you for your time and attention.

Debbie Harmon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must stop destroying our earth. YOU have the power to do so!

Maryann Seitz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We can't be killing more trees and damaging the environment at a time like this when our climate is changing and creating devastating effects. The US and organizations within it should be the ones leading the fight to stop climate change, and one of the most effective ways to do this is to STOP CUTTING DOWN TREES. Not only in this forest, but everywhere and we need to encourage this greater change one step at a time.

Kathryn Andronowitz

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. DON'T "fix it"...it isn't broken!

Dan

Cush

Thursday, 24 October 2019 Hello Mr. Sonny Perdue, The Tongass National Forest is of both American and global importance, and opening the forest land to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Donald Trump's directive violates the process of the National Environmental Policy Act (NEPA). NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of lovely, masterful old-growth forest will intensify the effects of human-induced climate change and climate disruptions. I appreciate your time and attention.

Grant

Holly

Please prevent the development logging, mining, or oil and gas drilling from the Tongass National Forest. Climate change is real and we have to act NOW to save our planet. The animals, forest, fauna must be protected and we as Americans have to be leaders to the world to protect what is left. for the work in prevent and protection of our environment. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ellen

Barton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Disgraceful!

m

Nelson

HANDS OFF! Public Lands belong to ALL of us and are for public use NOT Corporate Profit! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Elaine Becker

It is absurd to think that opening Tongass is in the national interest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kathy

Mallalieu

I fully endorse the message on this email. In short, I ask that you keep corporate and political hands (and all heavy equipment) off of this wilderness area. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you.

Dennis DelDonno

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump only cares about now, with no regard for the future. Everything counts and he is destroying the future.

JEFF

HOLLMAN

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do not sell out our citizens futures for profit!!!

Christina Peterson

It's time to think of the greater good, protect the remaining natural resources we have and stand up to corporate interests. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jennifer Stridinger

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once gone, we'll never get it back! Let's not destroy what God has freely given us!

Dick

Russo

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent negative consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Therefore, hearings must be held before a decision this important can be made.

Lena

Nilsson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas drilling has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. It is the largest US National Forest still intact and we will not give it up now when the consequences are so dire. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Our planet cannot afford profit-driven policies that devastate forests and other ecosystems that suck global warming pollution out of the atmosphere. Trump's attack on the Tongass will do just that. The loss of old-growth forest will intensify the effects of climate change. Thank you for your consideration of this public opinion.

SHEILA COWDEN

There is overwhelming evidence for the need to protect the Tongass National Forest. This forest is of global importance, and opening it to logging and mining will have detrimental consequences. This will NOT "boost the economy" of Alaska, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please protect the Tongass National Forest for YOUR children and grandchildren!

Lindsay Colf

We cannot afford to keep gambling with our own environment. Climate change is evident now more than ever, and it is time for people to make a change to preserve what is still here. Do not allow the Tongass National Forest to be opened to drilling and mining. 1% in economic growth does not seem worth permanently destroying this land and its ecosystems, its animals. It also takes away a place to explore nature for future generations. Please consider the importance of maintaining natural land, and the dire effects that may occur should it not be saved.

Camille Curtis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trees are what make a forest. Forests are very important for the environment . Don't remove the trees.

Sandra Ackler

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We're counting on you to listen to the EXPERTS and STOP this disastrous attack on our planet's resources. Do what's right - NOW!!!

Diane Tabbott

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. What will the world be, without wild life and oxygen producing trees? -- The tree roots even hold the soil, and prevent ground erosion. Humans will lose out big time if they don't start thinking sustainably. It's easy and fast to destroy nature, but to rebuild the wild life habitats, if even possible, takes hundreds of years!

Prima

Boman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I AGREE WITH THIS MESSAGE. STOP THIS INSANITY I AM SICK TO DEATH OF THE DESTRUCTION OF OUR ENVIRONMENTS. STOP IT!, STOP IT!, STOP IT!!!!

Sandra Taylor

Do not allow this yet another violation of environmental protections!!!! Protect the Tongass National Forest! (Alaska Roadless Rulemaking #54511) The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Tani

Martinat

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The American public will NOT allow Trump and his administration to destroy the beautiful Tongass National Forest. HANDS OFF to mining, logging, gas and oil!!

Rhea

Osland

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. WE ARE WATCHING YOU!!!!!!!!!!

Robert Anderson Jr

The Tongass National Forest is of GLOBAL importance! Opening it to logging, mining, or oil and gas will RESULT in permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the GUISE that this will boost Alaska's economy-- when only 1% comes from the logging industry! Trump's directive VIOLATES the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives AND are made with public opinion in mind... ??? As a fellow citizen of the United States of America and our EARTH I PLEAD with you to protect Tongass National Forest in Alaska.

Mary

Millich

First and foremost, I am a Trump supporter . I don't agree with any of his environmental decisions. This is one of them. Leave our natural resources alone. Let other countries ruin their countries for energy. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bernard Rafferty

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Another unwarranted attack on the environment by the Trump administration is another denial of the rights of American citizens to safeguard their homes and livelihoods. Natural resources are not inexhaustible, and neither is the patience of voters. Never has an administration succumbed to the greed epitomized by Donald Trump. Why would you agree to the destruction of so many valuable resources in view of the overwhelming evidence of climate

Henry

Biddle

Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Andrew Butz

I AM A LIFE LONG REPUBLICAN. Must we Republicans destroy the legacy of our country for short term profit? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jonathan Hartman

As someone who has visited the Tongass National Forest, I know firsthand that it is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Joseph Freeman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for your time and consideration.

John

Viacrucis

I will work every day of the rest of my life to expose and depose those supporting the honorific proposal to open up Tongass National Forest. This forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Ben

Zumeta

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PLEASE do NOT allow this horrific plan to go forward. The Tongass National Forest is far too valuable, not just for its beauty, its wildlife, its uniqueness, but it also serves as a carbon sink for the incredible tonnage of destructive carbon that is released every single day on this planet as a by-product of human activity. Without the continued existence of this invaluable carbon sink that is the Tongass National Forest, our planet would accelerate the extinction of

Patty

Ridenour

It is an outrage that you would attempt to destroy an iconic old-growth forest just to prove political power. Shame on all who pretend to work for the American people. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Julie

Walters

We need to put interest of the wildlife and environment before the interest of making money. We can't afford to do more damage in a time where we are in a climate crisis. Please help protect the wildlife and habitat for our generation of today and the future! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Jenny Johnson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. PLEASE, PLEASE LEAVE THE TONGASS NATIONAL FOREST ALONE. PROTECT IT AGAINST THE LIKES OF DONALD TRUMP !!!!!!! Sincerely, Jean Motzer a proud and grateful member of the Colorado Mountain Club

Jean Motzer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please act appropriately for the health of our only Planet !! Thank you.

Laura

Sagen Hughes

The Tongass National Forest is of global importance, and mistakenly opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and IS NOT worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. YOU HAVE THE POWER TO STOP THIS SERIOUS MISTAKE. SAVE THE TONGASS NATIONAL FOREST FOR ALL

Diana Roginski-Harvey

This message is urgent: The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Alice

Dugar

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Also, clean, renewable energy sources are the way of the future, so we shouldn't be exploiting our wild places any more for fossil fuels. We need to protect our ecosystems and our planet as we transition to clean energy!

Laura Strom

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. LANGHAM

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Remember that every day IS earth day and locally IS globally!

Jaye

Mundy

Tongass vs Trump. No second chances. Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Edward Mosimann

The Tongass National Forest is of global importance, just like the Amazon, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, but only 1% of that economy comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, which is already devastating and getting worse all the time.

Sasha

Kay

It makes no logical sense in this time of global warming to even consider logging one of the largest old growth forests in the United States. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lynn Anderson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I urge you to vote no to opening up the Tongass National Forest to corporate logging and mining and instead continue to preserve this iconic forest for generations to come. This forest is more important intact than to be used for short term economic gain.

Christine O'Neil

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. There Must Be No Logging, or Any Other Resource Extraction Activities in the Tongass National Forest. The Roadless Rule is Not To Be Compromised. Sonny Purdue, Must Be In Full Compliance of the Mission of the U.S. Department of Agriculture, because He Swore An Oath to Protect The Constitution of The United States, and To Work in The Best Interests of the American People, to Gain his office as Secretary of the U.S. Department of

Shawn Sargent

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. As a wildlife lover who is extremely concerned about climate change and habitat destruction, I urge you to give this iconic American landscape the protection it deserves.

Madeline Amalphy

Is there no limit to our appetite for natural exploitation and destruction? There is no version of our current rampant and unchecked greed that can survive the coming century. We must change. Each of us individually, yes, but especially those like you in positions of power. You must choose to see a future with a semblance of balance. Or we will be the last generation who remembers life before the great slide into existential species collapse. Your choice makes a difference. Thank you for your consideration.

Luke

Massman-Johnson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protecting our forests is far too important.

Robin

Patten

Stop trump's attacks on the environment! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Debra Cunningham

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Or would you rather go to prison with your master, Trump?

Joan

Lobell

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have read up on the logging industry, we need to preserve our trees more than we need to save jobs for an old industry. Our children's children welfare is at stake - the world's future is more important.

Joanne Wilcox

WILDERNESS!!!! WAKE UP AND TAKE AN ECOLOGY CLASS ON HOW THE EARTH HAS NATURAL LAWS!!!! ONCE ITS CUT IT IS GONE FOREVER< there will never be the same ecosystem again! and not only are you trying to destroy the forest but all creatures that live there will be devastated as well, WE ARE ALL CONNECTED!!!! PROTECT OUR EARTH!!!!!!!!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. TRUMP KNOWS NOTHING

Latifa Ruth Agius

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The American public, Mother Nature and Wildlife will thank you for your support!

Bill

Dinsdale

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Protecting our forests, protects our air & water!

Randi

Langas

Save this forest! It would take centuries to grow new trees. It is important for climate as well. It is senseless and irresponsible to destroy it! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

S

Infahl

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our public lands are dedicated to future generations - IN THEIR ORIGINAL STATE - and should not be used for logging or mining. They play a key role in fighting climate change. EVERYONE should care that these lands are kept the way nature made them.

Genevieve Bullock

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for your time and consideration.

Amy

McQuitty

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I have been there and seen the destruction of clearcut logging on land adjoining the Tongass, and the Tongass treasure must NOT be squandered to enhance the bottom line of a few Corporations!

James Pitre

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Try being a decent human being and take care of the Earth so that flora, fauna and people can survive long after you die.

Sandra Clark

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do the right thing for our grandchildren and all future generations.

Marlene Cross

Trump is an ass. Everything he's done is illegal and/or immoral. And this idea is worse. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Andrea Chisari

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. s You will go down in history as the mad man who killed iconic animals, forests and human beings, in short a MADMAN.

Marguerite Lovett

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on the forests and the water quality, air quality, fish and wildlife, and cultural resources and local, sustainable industries that they support has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent costly consequences - consequences that will harm other vital and sustainable aspects of the state's economy, including fishing, aquaculture, and tourism. Old-growth forests are the lungs of the planet. They safeguard irreplaceable biodiversity, and mitigate the ravages of climate change. They are vital to the preservation of Alaska Native culture and well-being. We can find alternatives to logging, mineral extraction, and oil and gas development - we cannot find alternatives to the benefits provided by old growth forests - forests that once cut can never be replicated. Trump's directive violates the process of the National Environmental

Marie

Sansone

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences -- TO THE WHOLE EARTH. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, WHICH THREATEN THE LIFE-SUPPORT SYSTEM.

Carol

Kuczora

We can't replace these national treasures and it's important to have pristine wild areas left intact for future generations. Please protect The Tongass National Forest as it is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Loretta Gaidys

GREED is not an environmental policy. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Scott

Sheaffer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save the forest and stop the nonsense!

Robert Dunakin

DO THE RIGHT THING! DO WHAT YOU WERE HIRED TO DO! DO WHAT WE THE PEOPLE ARE PAYING YOU TO DO!! PROTECT OUR NATIONAL FORESTS! A L L O F T H E M !!!!!!!!!!! PROTECT OUR ANCIENT AND OLD-GROWTH FORESTS!!! JUST DO IT !!!! FOR THE LOVE OF LIFE !!!!!!!!!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Stephen Bailey

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am intensely interested in your decision to preserve this irreplaceable treasure. Thank you!!

Joan

Savarese

Of late, Trump and big business are ramping up the destruction of vital national treasures. All for GREED. Please protect our country, our wild lands, wildlife, and water ways before they are ruined. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Lynn

Calhoun

considering opening the Tongass National Forest up to resource extraction. This is a VERY VERY BAD IDEA! There are MANY MANY more reasons not to extract the resources from this rare, wild land! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our National Forests belong to ALL US citizens equally. It's NOT OK to allow an already privileged few to take away our natural heritage. This is VERY UN-AMERICAN, especially in light of what 98% of our scientists are telling us -- that

Jayni and Ch Chase

Trump LEAVE The Tongass National Forest ALONE it is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Your directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Linde

Fort

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please! Stop this attack on the planet. She really needs all the help we can give her now. The constant attempts to make money from the current administration at the cost of our only home.

Randall T. Phipps

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The NEPA needs to be respected and followed. Trump has trod upon too much of our democracy and it needs to stop. Have you noticed he will soon be impeached?!? Yes! Do not be so hasty to throw under the preverbal bus yet another precious gem of our ecosystem. Without it more of the plug is being pulled for our Earth to survive. Just because Trump has no respect for nature & the planet does not mean the rest of us are so ... short sighted.

Diane Argenzio

Unbroken forest lands are the lungs of the planet. We are gasping for good air. Unless you're an old geezer who will die soon, it is urgent that you help save the Tongass, which is vital for our air, and for native culture and wildlife. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Austen Stone MPH

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We need every tree possible to help draw down the CO2 that is poisoning our future. Thank you

Judy

Luria

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is immoral and illegal! I am against going into this forest for any reason. Gail Petrucelli

Gail

Petrucelli

Please no. We need our forests and we need to stop logging. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Gabrielle Karras

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. If this is gone, it will be gone forever. We will be living in a desert soon, if we don't preserve the beautiful and green forests that we still have.

Amy

Becker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Save the lungs of North America. Tongass is vital to all of our lives and for the future of our earth. Thank you.

A.R. Puccio

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Wild places should remain wild because when they are converged on then they are forever damaged and no longer the wild place that they should be. These pristine places need to be kept wild and wonderful for our future generations.

Eileen Andric

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you.

Eugene Gorrin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It's high time to stop exploiting the environment and supporting a dangerously corrupt administration. Please stop trying to bring on the death of life as we know it.

Jane

Ross

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I will never support any one who proposes damaging the Tongass National Forest. It is vital that we protect and preserve the forest. There are just some things that are not worth ruining.

alan

mizak

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Is nothing of value in nature or the environment worth saving to trump and his band of thieves. Everything that can be destroyed is a bullseye to this administration.. With no consideration to our children, grandchildren, great grandchildren's futures. This is absolutely disgusting..

Linda

Corbin

Being truly human is taking responsibility. To open up the Tongass to mining and drilling is to be irresponsible because it will severely degrade it as a habitat and support of clean air and water. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stand tall and firm for American values of respect for our wilderness.

Kathleen Trinity

We need to save the forests all over the globe to produce oxygen. At the rate places such as the Amazon forest and many others are being destroyed, mowed down, cleared, burned for farm land, etc. hundreds of thousands of acres of oxygen go up in smoke. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. We don't need the farm land we need oxygen and habitat for birds and wild animals. The attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Pat

Christiansen

Why does Trump want to destroy & kill everything, could it be because of how much he loves America? *LIES* that harm us all! He is there to protect our environment instead he is destroying it! He is a very inhumane person Who cares for nothing & no one but himself & any money he can steal! *BLESSINGS* for all of us together! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Susanne Kiriaty

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please help us save the forest!

Shar

Towner

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please leave the Tongass alone. Keep existing protections for the remaining forest. Already the largest and oldest trees have been logged and taken away. Please leave what is left, to protect endangered wildlife and local subsistence economies.

Debra Marin

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change/ Sorry (for the world) that neither you nor President Trump understand any of the above.

Charlie Donnes

explored the outskirts of the Tongass NF. It was dark and misty and I was enchanted. Experiences like this, into the wild and up close and personal make a person loyal to the land. I want Tongass to be roadless and protected from logging of the old growth. Our country and the entire world need trees more than ever, because of their capacity to take in carbon. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Carolyn Taylor

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. No mining, no logging, no nothing to this national treasure, just stop it!

Kate

Neuschaefer

STOP THE MADNESS!!! I STRONGLY OPPOSE the proposed destruction of the Tongass National forest in any WAY, SHAPE or FORM!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Rita

Larkin

and the US has abdicated its responsibility to lead the world on reducing carbon emissions. We have been a major contributor to carbon pollution and need to both cut emissions and preserve our forests ability to absorb carbon. Fossil fuels need to stay in the ground - we cannot keep developing new carbon sources. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Decisions should be made to benefit the environment that we all

Eleanor Kinney

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for reading this.

Suzanne M.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Let me remind you that there are no empty homes in nature. When you destroy an environment, whether through logging, mining, or landscaping for oil infrastructure, the life that lived there doesn't move on, they die! Quit impacting the environment in such detrimental fashion, and live with nature and wilderness.

Keith

Thompson

Logging the Tongass would seriously damage a unique National treasure. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Roger

Bove

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We all know the impact of climate change - especially on the future generations.

Inca

Ghosh

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am sick of his assaults on my children's future world.

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Patricia Dingleberry

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The National Environmental Policy Act exists to ensure that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind.

Diana Krantz

requesting that the Tongass National Forest as well as the Chugach be kept completely intact and protected with the Roadless Rule unchanged. I am asking this for many reasons and it is of vital importance not to do irreversible harm by widdling down its protections for nothing but short sighted monetary gain. This forest is one of the legacies your children and children's children and future generations will thank you for having the foresight to protect. In the not so distant future, a widely intact large forest wilderness site like the Tongass National Forest will be of incomparably more value than any short term commercial exploitation could ever yield. It will be literally priceless, in its ability to help offset climate change by its carbon sequestration, (old growth is particularly helpful), to create the air we cannot do without, to protect our fresh water supply, therewith also keeping salmon fisheries intact (a huge economic factor all by itself) to provide wildlife, even rare species habitat, and finally, not to be underestimated, a refuge and retreat for

Nadja Payne

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We must PROTECT the environment and ALL wildlife in it! I oppose trump and his policies and hope he's impeached so we can elect a new president that protect the environment!

Nancy Dollard

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is an irrevocable step toward destruction of a national resource which is being made to satisfy politicians, lobbyist, corporate financial gains and the insatiable greed of the logging, mining, oil and gas industries. This attack on our natural resources in one of the most pristine temperate rainforests in the world is a travesty. Please look to your conscience and consider the world you are leaving to your children, grandchildren and their children. It is

Anne Boynton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. For thousands of years, Indigenous people have learned to live in harmony with the natural world, only taking what is necessary and always giving back. This push to destroy these last vestiges of our forests will bring an end to life on Mother Earth. Let's work together to protect the home of all living things.

Henry James Vásquez

What will our legacy to future generations be? What will yours be as Secretary of Agriculture? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Ron

Rzesniowiecki

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongass is America's largest and magnificent old growth forest. We only have a few left. Leave the Tongass alone. Robert Hughes 219-384-5567

Robert Hughes

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It would be a travesty to lose this wild place for the short term gain offered. Once it is gone, you can not replace it or make it wild again. There are so few truly wild places left, the Tongass National Forest is one of them, PLEASE protect it as the national treasure it is.

Lisa

Reutter

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. --- We all understand now that all standing forests, especially old growth, need immediate and long lasting protection! It is science that we need the forests to survive on this planet. I urge you to think about your and our children and grandchildren. Thank you

Patricia Slump

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This is a policy that puts the profit of a few above the good of the planet and all the people on it. The Tongass supports a variety of life human and non human. It must remain in its natural undeveloped state.

Theo

Giesy

We are losing too many places to the greedy personal interests of today's corporates who want to stick with cultivating outdated resources. It's time to step up to the plate, be brave, and grab the bull by the horns and let's change things and make this a better world for all of us including the wildlife which is today, worldwide, at the severe risk of being obliterated forever from this planet. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Deborah Huntington

Do you really want your name to go down in history with this destruction, because you promoted this action at this significant time in our history? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change.

Sally

Mason

WTF, Sonny! Who owns you that you would sell out the Tongass? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Virginia Lee

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I strongly urge the protection of this vitally important forest.

Lois

Pryor

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. In addition to the preservation of the Tongass National Forest, I would also like to see the administration change its position about drilling in the Arctic National Wildlife Refuge. We need to be decreasing our dependence on fossil fuels, not increasing their production. Sincerely, Dr Jeffrey Dial

Jeffrey Dial

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. National Forest lands are meant for ALL the people, NOT specific (financial) interests. Tongass must not be utilized to line already wealthy pockets. Earth Mother I'm sure will let us know soon.

Kt Hut

Fields

about opening the Tonga's National Forest to logging, mining, and oil/gas exploration. As the daughter of a lumberman, I'm well aware of the need to farm forests; I'm also aware of the damage caused by such operations. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and is not worth permanent consequences. The loss of old-growth forests will intensify the effects of climate change and affect humans and animals alike. It will endanger the bio-diversity of the forest and threaten wildlife such as bears and wolves. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. Please halt efforts to attack the Tongans

Joyce

Garrett

We can't keep destroying our forests that are vital to oxygenating our planet. Forests also provide an escape from the chaotic world we live in. As Edward Abbey said "Wilderness is not a luxury, but a necessity of the human spirit." The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Yurie

Namiki

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please act. This is so critical. Thank YOU!

Laurie Jacobson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Trump et al; Keep your grimy, corrupt mitts off Tongass! Reek havoc elsewhere, as you have, and leave Alaska to the wildlife!

Nancy Daly

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The earth, and indeed our survival, depends on trees - old growth forests with intact under-stories. The USFS is a very poor steward for our precious national forests. Forests need to be taken out of the Department of Agriculture and put into a real protection system. The Park Service is not that system. With their policies, as with the USFS, of destroying under-stories they are destroying habitat, biodiversity and drying out our already thirsty forests.

Barbara Crow

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I've been once to Alaska on a tour and we didn't go as far as the Tongass National forest, but just visiting Alaska with its unspoiled areas is a wonder we ought to keep for our children and grandchildren to enjoy just like you and me have enjoyed in our lifetime. Sincerely, Vera Lis 6145 Barrett Ave. El Cerrito, CA 94530

Lis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Stop raping the earth. Take take take Enough!!

Gwen

Cavazos

Dear Secretary Perdue, Haven't we had enough destruction of pristine lands that God created for us to rejuvenate and refresh our spirits from the hardships of life? THE TONGASS IS TOO PRECIOUS TO DESPOIL. Please, please do not allow such a tragedy. The generations to come will dearly need such special places. We must preserve National treasures. They are not for raping and pillaging for corporate profits. STAND BY US, SECRETARY PERDUE. RAISE YOUR SOUL UP AND JUST SAY NO! Sincerely,
Glorianna Light Santa Barbara, CA

Glorianna Light

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Once destroyed the forest will not return to its original state. It is important to protect our national resources and not pillage them for greedy ends.

Margaret Adams

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. These protected lands are worth more whole and undisturbed than the human beings came calculate. Leave these pristine areas an they are.

Margaret Frye

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. TRUMP IS A VERY SICK EXTREMELY UNSTABLE MORON WHO NEVER PASSED SCIENCE IN SCHOOL, BECAUSE HE WAS PARTING TOO MUCH???* ** ALASKA IS THE LAST FRONTIER, CLIMATE CHANGE IS REAL, TRUMP ISN'T!!!* ** 10-24-2019. IMPEACH DONALD J. TRUMP, RUSSIAN ASSET!!!* **

Stephen Hyk

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. All those complicit in earth's destruction should be held accountable for their crimes. The people will come for you, Sonny Perdue, and the entire GOP criminal enterprise who are hellbent on destroying the USA. Why does the GOP and their supporters hate this country so much that they are intentionally and deliberately trying to destroy it? Just curious? Never mind, for you folks on the right, your god is money and power. Enjoy eternal hell.

Robert Jones

US has been losing its forests due to the devastating forest fires in this decade. There are less and less forests remaining in the USA. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Veronica Thompson

Protect the Tongass National Forest from exploitation! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Susan

Selbin

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. To me, as an American citizen it is far more important that we as a nation protect our natural resources than that we make quick money. We as a nation have learned our lesson that destroying our forests and natural beauty does not pay off in the end. Logging and mining are very shortsighted industries that don't take into account the necessity of forest ecosystems in producing a stable climate. Forests protect biodiversity, and biodiversity protects us. Please protect

Jonathan Wilson

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. All I can say is - Really, just stop it already and leave the Tongass alone!

Kimberly O'Connor

As someone who has visited the Tongass National Forest, I strongly object to opening it to logging, mining, or oil and gas exploration. These activities will have permanent detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Charles Macquarie

There is no reason good enough to destroy the Tongass National Forest, or any part of it. It needs to stay intact as a wilderness to help maintain the Earth's natural balance. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Erika

Davis

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. It is UNCONSCIONABLE to destroy any forest on Earth, much less an old-growth forest, which decreases greenhouse gases and supplies life-giving oxygen to the planet!

Irene

Reep

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Far more of Alaska's revenue comes from tourism and fishing, two industries that could be devastated by desolation of the Tongass. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Daniel And J Clark

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Alaska's only been a state since 1959; the Tongass was established long before in 1907 by the last republican president with environmental awareness: Theodore Roosevelt. He had an epiphany that continued overuse of our national treasures would end badly for humans, thus his reason for setting aside special places. And though the Tongass has been logged at times, it's always been done so at substantial losses (1 billion by some estimates) as a gift to industry.

John

Scott

What the hell is wrong with today's republicans? Why do they hate our national forests? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mike

Kelly

The Tongass National Forest is of global importance. Opening it to logging, mining, or oil and gas would cause permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy; however, only 1% comes from the logging industry. It is NOT worth permanent, negative ecological and environmental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, with due consideration of less damaging alternatives, and are made with public opinion in mind. The loss of old-growth forest will absolutely intensify the effects of climate change.

Patricia Judi Judice

California, however I spent almost 4 months last summer living in Alaska teaching and showing children the beauty of nature. Alaska has grown to mean so much to me and after living there I can vouch for its pure magic and unimaginable beauty. Alaska is a special place and I am asking you to please protect it. I want to live in a world where I can show my children and grandchildren the majestic grandeur of an untouched Alaska, not one where I am forced to show them pictures of what once was. If you care, you need to act. Once we act rashly, there will be no going back. Please help. Please. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA

Jade

Gilbert

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do the right thing. Keep America Beautiful. Destroying God's creations can not be replaced. Sincerely, Rebecca Barrow

Rebecca Barrow

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We MUST begin to take care of our Mother Earth. Our planet is already at too much of a risk and we don't need a renegade Administration to help it be destroyed. I beg you to reject any opening to anything that will put this beautiful and Natural National Forest at risk, especially the greed of the wealthy!!! Thank you.

Alta

Bardsley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I fully support protecting Tongass.

fritz

milas

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change and further damage Alaskan fisheries.

Paul

Breitenbach

Greetings and salutations, The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Godspeed,

Terrence Cummings

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you for considering this critical issue.

Tom Schwegler

Please. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Kirk

Girard

Forests as just as important as clean air and water. We cannot survive without forests!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Shoshana Serxner-Merchant

The Tongass National Forest is an important old-growth forest that is of unique value to the world. Opening this irreplaceable resource to logging, mining, or oil and gas will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the claim that this will boost Alaska's economy. Only 1% of Alaska's income is derived from the logging industry, however. Such a small amount isn't worth the permanent consequences that opening the Tongass to logging will bring. The directive allowing the Tongass to be opened to exploitation violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, will consider alternatives, and are made with public opinion in mind. None of these provisions apply in this case. Furthermore, the loss of old-growth forest will intensify the effects of climate change. I implore you to protect this irreplaceable forest and keep the logging restrictions on the Tongass intact.

KATHERINE HEINS

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please, please, this is one of the last untouched forests! Leave it alone.

Sandra Todd

neighbors here in the Bay Area, believe that the Tongass National Forest is of global importance. We feel strongly that opening it to logging, mining, or oil and gas would be a terrible decision, and would have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. What is this Administration thinking? We are incredibly lucky to have this huge intact temperate rainforest -- we should be preserving it! Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Most Americans know this to be true, and the Department of Agriculture would do well to make the right decision for the benefit of all Americans, and

Rania

Bratberg

As a Science Teacher/Environmental Educator, Science/STEM Professional, and an Environmental/Wilderness/Wildlife Advocate, I wholeheartedly insist you protect the Tongass National Forest from destructive procedures (e.g. logging, mining and fossil fuel extraction)!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences! This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act! NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change and be extremely detrimental to wildlife/biodiversity, local communities, and tourism/recreation!!

Brad Snyder

Suzanne Schultz

In this era of environmental crisis, the last thing our country needs to do is destroy native habitat. I urge you to halt industrial rape of these precious public lands in Alaska.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We currently stand at the edge of climate disaster. Please stop raping Earth and its resources and act responsibly to combat the crisis we have created and now must face. We can make a difference but only by acting immediately and in every way possible. Thank you for hearing and doing the will of the people!

Brett

Ludden

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please do your job.

Patti

Elliott

Linda

Burnham Larish

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, environmental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, which isn't true. The president's directive violates the process of the National Environmental Policy Act. This Act ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will accelerate the extinction of many cornerstone species.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We only have this one planet in the entire universe, We need to look after it, for our children and grandchildren, and all their descendants.

Janet

Cottrell

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest unacceptable attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. The Tongass National Forest is our American version of the Amazon rainforest; the Tongass National Forest is the largest temperate rainforest and we MUST continue to protect it. The detrimental and irreparable negative impacts from logging, mining, cutting roads into the forest, or engaging in any oil or gas exploration or drilling will be severe. These negative impacts will destroy the integrity and power of this

B

Barron

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Dear God, think of the world you'll be leaving your children and grandchildren. Do you think they won't know that greed has ruined their future.

Judith

May

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy when only 1% comes from the logging industry and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of the old-growth forest will intensify the effects of climate change. I sincerely pray that you will find an alternative to destroying public land that was placed in the people's hands as a gift to the people. It is meant to be protected. Not strip-mined and logged to death, extracting oil with no plan of restoring the land to its once pristine beauty. Man's greed, the never-ending pursuit of money is what is leading the charge. It will devastate the native tribes up there that holds that land sacred. Many people visit this land

Peggy

Van Sickle

Ansel Adams said - I'll paraphrase here - that it is frightening that we have to defend our wilderness from our government. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Joseph Wiesner

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The Tonga's is pristine and most of the wood will be sold abroad. Keep its treasured status for future generations and it will absorb tons of CO2. Do not open it up for logging and facilitate other opportunities for Alaskans other than fossil fuels and treasured forests. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Carol

Weingeist

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. ****THE CESSATION OF THE PROCUREMENT AND USE OF ALL DIRTY ENERGIES AND FOSSIL FUELS IS LONG OVERDUE, AS IS THE TRANSITION TO GREEN, CLEAN, RENEWABLE, SUSTAINABLE ENERGY SOURCES, TECHNOLOGIES, AND MATERIALS.**

Jason

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Do the right thing, protect the one of a kind, irreplaceable, natural wonders of the world! It is extremely short sighted to open this pristine wilderness to any sort of desecration. Thank you.

Douglas Stainbrook

The Tongass National Forest is a world treasure. Opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry. Some American values are more vital than a temporary economic benefit. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Roger Akeley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent consequences that will ensue from these actions. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This proposed action and the inevitable consequences are highly detrimental while benefiting nobody and destroying so much. I am gravely concerned by these actions and total disregard for the environment and impacted wildlife. We only have one planet and these actions jeopardize humankind and our world.

Gina

Neuhalfen

full time student at the University of Arizona, but more importantly, I am a concerned citizen of the United States for the United States, but also for our world. I have grown up in consistent turmoil, from the recession to the Iraq War, 9/11 to consistent mass shootings, my generation has seen and experienced way more than we should have as children. The rise of anxiety and depression isn't out of the blue and is far beyond just the rise of social media. Yet, knowing this, what gives me the most angst is the fact that right now when I should be studying, I have to fight for our earth because she can't fight for herself. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA

Grace

Perillo

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. If we see clear cutting, we will never forget. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Karen Dahmer

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Alaskans and loggers themselves do not support opening up the forest. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change, causing a double whammy to Alaska's delicate ecosystem already suffering disproportionately from climate change. It is our moral duty to protect this forest for the sake of generations to come.

Leana Zang-Rosetti

spirits. Government service can be trying and hopefully, you are weathering the work and any attendant stress. In regards to the Tongass National Forest, you are no doubt aware that it is of global importance, and that opening it to logging, mining, or oil and gas exploration will cause permanent detrimental consequences. This latest action against wildlife and forests was made under the theory that this will boost Alaska's economy when only 1% comes from the logging industry and is not worth the resulting permanent consequences. As you are aware, the President's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of the old-growth forest intensifies the effects of climate change. I urge you to consider what I pointed out above and act per the law as well as bring this to the President's attention. Be well and enjoy the upcoming holiday.

Clark

Stillman

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Many people don't realize that this forest has a tangible connection to every state- over 200 species of birds, from EVERY STATE spend part of their lives summering and mating in the Alaskan wilderness. Allowing the Tongass to be robbed of its natural resources would be a man-made national tragedy and disaster. Our last, largest, intact temperate forest with its unparalleled wildlife is a national treasure. We must protect and preserve it for future

Susan McMurtrie

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave the forests, they protect the planet!!

Janet

Ellis

I have lived in Alaska and value the protected lands there. I want my children and grandkids to know that there are places not subject to profit or people. Our country has so much; we do not really need more. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I am currently in my mid 20s, and I have many friends around that age. I have cousins who are in elementary school, and several of my friends have kids of their own. Climate change is already wreaking havoc on our world, and we will undoubtedly live to see its calamitous, irreversible impacts — rising temperatures and sea levels, the agricultural and economic destruction they will cause, and the societal breakdowns that will inevitably follow —

Kevin

Chiu

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas explorations has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Armando Lopez

This should matter much more to people that aren't liberal by nature, but people are dumb and easily persuaded by conservative talking heads. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Nick

Lovro

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. National Forests, Parks and other reserves are not "owned" by government to do with as it pleases-- most particularly, not to loot the resources within. They are held in trust for the future of both the people and the health of the planet, and those who live within and depend upon healthy ecosystems. Tongass National Forest is to remain protected, as are ALL of our reserves.

Trina

Semorile

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Judith

Miller

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please also take into consideration that we are not in a shortage situation when it comes to logging or oil to risk damaging this ecologically sensitive area.

Randy

Ollila

I agree with the message below - but before you get to it - let me put my personal plea. The earth's air quality is getting worse, and the Tongass is part of its lungs. If you want to save the logging industry that is already there, rescind the new tariffs that have hurt sales to China. And remember the people who live around the Tongass who depend on it for food. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Amanda Martin

I routinely travel to Alaska. Some day I hope to see the Tongass National Forest. But I won't be able to do so if it gets destroyed. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas will have permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry. There can be no justification for such an attack on forests and wildlife. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, and that they consider alternatives. The loss of old-growth forest will intensify the effects of climate change. Yours sincerely, Laura Cooley NE Seattle, Washington

Laura Cooley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Climate change is real, and you're killing us.

Michael Janover

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. This area needs to be protected at all costs not destroyed for money alone. The water and air quality should be considered instead. Thank you.

Edith

Chapman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please don't open this forest. It's necessary for indigenous peoples and wildlife.

Sally

Winchester

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. HOW LONG are these attacks on this AMAZING and SPECIAL PLACE going to continue? It MUST BE PROTECTED!

Bob

Miller

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Secretary Perdue, MY NAME IS ALAN SOLOMON. I LIVE IN SOUTHERN CALIFORNIA. What is this I hear that you are in favor of the loss of OLD GROWTH FOREST LIKE THE TONGASS NATIONAL FOREST?? I COMPLETELY AGREE WITH AND STRONGLY SUPPORT THE ABOVE STATEMENT/PETITION TODAY AND FOR MANY YEARS AND GENERATIONS TO COME. I oppose logging and mining and fossil fuel exploration and drilling in the TONGASS NATIONAL FOREST. I SUPPORT

Alan

Solomon

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. So stop any attempt of destruction: For the sake of the Forest, for the sake of all its inhabitants, and for the sake of your own reputation.

Barbara Schwarz

This will not be accepted!!! The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Christopher McAuley

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Sincerely, Cindy Stein 647 Flaming Star Ave Thousand Oaks, Ca 91360

Cindy Stein

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Thank you

Rick

Wood Jr

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Our great grandchildren need to have a place to see what the natural world once looked like. An important place to study a naturally renewable and truly unique example as our gift to future generations

Richard Hoglund

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Yet, all of the action alternatives in the Draft Environmental Impact Statement allow more roadbuilding and logging across the Tongass National Forest. Logging roads and timber operations cost tens of millions of taxpayer dollars every year, with zero return on investment. Meanwhile, these destructive activities degrade the naturally sustainable wealth of salmon, wildlife watching, tourism opportunities and protection of fragile ecosystems. As

Anita

Sutton

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Leave it alone. We humans need not despoil one of the last wild places on earth. The greed crazed primates who lick their chops in anticipation of the profit to be made there, anywhere, need to have their faces slapped hard and shut down. Do not, may not, can not touch this area, for the sake of sanity and wisdom. Thank you.

Jim

Perry

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

In your support of Trump's insane and harmful acts including this one of violating and destroying the Tongass is a crime. You and everyone of Trump's sycophants will all be remembered by all of us out here. We will not forget and I'm positive you and all the others will pay for your crimes. You're despicable for going along with his latest assault on our environment.

Cinda Johansen

While Amazon rainforest is burning it is alarming that there is plans to destroy more rainforests like Tongass — the world's largest intact temperate rainforest. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Mari

Antjarvi

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and is NOT worth permanent consequences. Pres. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I strongly urge you to OPPOSE opening any part of the Tongass National Forest to logging, mining, or oil and gas. I strongly urge you to fully protect the Tongass National Forest. Protect the Environment NOT Profits.

Art

Hanson

I am deeply concerned by this latest decision to allow logging in a climate-critical ecosystem. Why is there such a willingness to ignore long term negative consequences? The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Florence Germain

My personal message: "Dear Sonny Perdue, As someone who loves and enjoys nature I am heart broken over this, that such a pristine wilderness area could be so quickly and heartlessly cut down. To think of the lives of so many animals ruined or killed. To think of the lives of living plants lost for logging. Please realize this is not a good plan! Don't let such a place be torn to shreds!" The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

The loss of old-growth forest will intensify the effects of climate change. AGNESE LANEVE

Agnese Laneve

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. We have to blend a concern for the present with a concern for the future. Even though we won't be here, hopefully others will.

Elaine Klaassen

I am objecting to opening this wilderness to resource extraction based on two things. 1. As a citizen this land belongs to me as much as the companies that want to log it and I do not want to see it logged and mined. 2. The science tells us that replacement plantings are a poor substitute for the original forest. There is a lack of diversity and the quantity of fauna decline in replacement plantings. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

Bill

Cashman

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth the permanent consequences of climate change - sea level rise that displaces coastal villages, towns and cities; loss of farm land worldwide; and mass extinctions of fish and shellfish from our oceans. President Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Decide this issue with your children and grandchildren in mind.

Quentin Fischer

The Tongass National Forest is of critical of global importance, and opening it to logging, mining, or oil and gas development has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. I don't believe the Alaskan people have made the choice to destroy this forest to make a little profit. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My statement is fact-based. Please listen!

June

Maker

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Other countries and their policies which affect climate change have now become of global interest as whatever destruction or pollution they produce will have an impact on everyone. Please do not allow the Tongass National Forest to be destroyed just for short term monetary gain, when there will be long term, unnecessary and serious damage to our Planet's climate, flora and fauna.

Heidi

Hansford

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. I wanna be sure that we made everything that my/our grandchildren can live in our world.

Elizabeth Decker

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. My family lives in an area surrounded by Doug firs that are regularly harvested and replanted, plot by plot. They make ideal lumber while they take in CO2 and add oxygen to our air every day. America should be replanting our lost forests in every suitable area we can find but we must not invade an old growth forest. That ecosystem is too precious to lose. No amount of oil or whatever resources you want is worth the loss of such an

Margaret Breitwisch

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The loss of old-growth forest will intensify the effects of climate change. Do you want your legacy to be about how YOUR policies speed up the destruction of the earth???

Mary

Brady

and yet we continue to rape the countryside as if it is an endless resource. Diversity is of fundamental importance for the survival of all species, humans included. Trees for watershed and air quality; intact earth that protects the quality of our life sustaining water sources, vegetation and wildlife. We must look to the future and the well being of the next generation—not in simply financial means, although exploitation doesn't provide for the next generation, but also in matters that affect health and support life. We may not like it but climate change is upon us and all will suffer the consequences—many are already. There will be no way to buy our way out of it at some point in the not to distant future. We have decimated so many resources in the past 100 years alone. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's

Deborah Stamp

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences.

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. Please take action. Our environmental impacts & how they effect climate change are real issues that need to be addressed. Instead of moving forward this presidency is taking us backwards a 100 years in the blink of an eye.

Allynne Rinelli

The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. Trump's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change. please stop the miningand the logging ... for the sake of mankind !!!

Joanne Reuter

We need The Tongass National Forest for a climate stable future. The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. The Deranged Orange Traitor-In-Chief's directive violates the process of the National Environmental Policy Act. NEPA ensures that major decisions affecting the environment are fact-based, consider alternatives, and are made with public opinion in mind. The loss of old-growth forest will intensify the effects of climate change.

planet is in peril. Even though I explain that there are two sides to every debate, including climate control, they are capable of understanding that nature is life. All national parks and environmentally protected forests are life to the animals that live within them and to earth people. The world is shrinking, people care less and less about earth, which God gave to us and directed us to care for and protect. My family and I have yet to go to the Tongass national forest or even Alaska. I sincerely hope that when we do make it to Alaska, the untouched beauty of of the state will be there for us to enjoy. I pray that wisdom be imparted to you during your decision making and that you will understand and accept the need we have to love the gift given to mankind. God bless you. As for the legality of your decision, Greenpeace has provided the information below. Thank you for your consideration. Diana Dougherty The Tongass National Forest is of global importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences.

The loss of old-growth forest will intensify the effects of climate change. Save the forest - we can't afford to log the planet, or mine, or drill for oil. We could literally all day from accelerating climate change with projects like logging in our national forests. Plus, forests are just nice to visit (or live in, if you're a wolf or owl or whatever).

Julie

Charles

importance, and opening it to logging, mining, or oil and gas has permanent, detrimental consequences. This latest attack on wildlife and forests has been made under the guise that this will boost Alaska's economy, when only 1% comes from the logging industry, and isn't worth permanent consequences. With the stumpy administration, the Earth is being polluted QUICKLY. We do NOT need more mining. We need renewable energy from the sun, wind and water. With climate change, trees are VALUABLE in protecting the world, and with the FIRES in the Amazon, EVERY tree is so very valuable. Mining in Alaska will dirty the air, water and soil. It's NOT worth losing our valuable resources for LIFE so stumpy can reward a donor with PUBLIC lands. That means the lands have been protected by the PUBLIC! A fraudulent pee-resident has NO CLAIM on our public places for personal enrichment. The world should NOT suffer because a corrupt, STUPID fraud by an bad actor wants to destroy America and hand it over to Russia. Do NOT allow anyone

Martha Wheeler
