

Dear Alice Coulton,

I am a little late at
sending you a card, but
you too are late, as

Stanley for the forests,

repeatedly protect the
forests along the Jordan
cone population; not

addition to your forest
plans. The population
undermines the Forest Service

"survey-measure" project to

protect endangered species - risk
of fire from the LNU pipeline.

It also fails the Aquatic Conservation

Strategy. Consider
Seamount; waterway
degradation.

May the magic of Christmas

fight up your holidays!

Please withdraw the
from the Project, meet
the standards of the
existing land use
management plan.

Deny the Project!

Respectfully,
Dorinda Dean RN, PhD
