

Dear Reginald & Margaret
in accordance with 36 CFR part 11
I, Lynn Spitaleri Hadlin, hereby object
to the Pacific Connector Pipeline
across the National Forest,

there are so many reasons why this
is wrong - it violates many of your
rules, never put in place to protect
our National interest -
this is being done to benefit a
foreign fossil fuel company
you arrays & mitigation for fire risk
(already greater due to climate change)
pipes leak, break & explode.

Therefore there shouldn't be exemptions

From Mitigation of landslides
Sedimentation & other waterway
degradation.

No protection for endangered species.
We need to protect our forests &
other wildlands, not cause harm
with projects like this.

I request a public meeting (at
several) to discuss potential
revelation of the issues raised in
this objection

May the Stars of Peace and
Hope shine on you and those you
love this Holiday Season

Lynn Spitaleri Hadlin
