Joanie,

Apologies for missing the comment period. January 30 was the date in my calendar.

Thank you for managing the NEPA process for the QMS project area. Especially for organizing the field visit on that lovely day last fall. I learned a lot about this process, and have a healthy respect for the perspective applied by the Sweet Home RD. The reality that this Timber Sale needs to happen in the least contentious fashion resonates, and I trust that all aspects of it's impact are being considered to that end.

From a trail steward and recreational perspective, I have concerns about impact to trail infrastructure and access. These concerns were largely addressed in the field visit. Considering the location of the proposed units, most impacts are mitigated.

From a larger perspective, I am hopeful that some of the KV and K2 funds generated by this sale will assist the Sweet Home in improving recreational experience in your district. Please advise the Oregon Mountain Bike Coalition of these developments.

Thank you for your time, best of luck with this process.

Adam Craig
