this agency is always destructive to both plants and animals. it doesnt give a fig about protection at all and develop plans which are all about money money money and destroying nature for money. this is national land and should be accountable to 328 million americans. we are not all there in montana but that is our land and the protection you give it is substandards. you blithely kill and destroy vegetation and animals for no good reason. money is not a good reason because they are not making more land in these united states and destroying what we all own is not kosher. it is not fair. it is not equitable in any way shape or form. this land is not montanas, it is not the neighbors of the land. it belongs to 328 million americans and your proposal is not a sound one for protection of this land. the lynx of course must be fully protected, as well as every other animal that lives on this site and the birds and every other animals that needs this home. i reject your plan as destructive and i reject your management as destructive. we need new management at the usfs which protects and preserves instead of plans that destroy it all for money. we dont know whose pocket it is vanishing into, but it certainly is vanishing. the general public isnt getting the money from this destruction. we ask for an investigation of the horror that goes on at this branch in montana to see why we cant get protection as the first priority for our national land. the general public wants protection. this comment is for the public record please receipt. jean public jeanpublic1@gmail.com

AND YOUR LINKS DO NOT WORK CORRECTLY. CAN YOU GET PEOPLE TO WORK ON THE COMPUTERS WHO CAN MAKE THEM WORK PROPERLY.
