Subject: Mendenhall Glacier plans must be sustainable
Date: Wednesday, March 11, 2020 11:47:38 AM

Greetings:

Any new Forest Service plan for the Mendenhall Glacier Recreation Area should specify that there will be absolutely no expanded bus parking near the visitor center and no vehicle access close to the existing facilities. It should have remote parking for cars and buses during the summer with an ELECTRIC shuttle system to move people to the facilities.

The Forest Service must manage for the future with an eye on climate change, renewable energy and sustainability--all local priorities in Juneau. Also any boats that are allowed on the lake should be electric, NOT diesel.

I rely on you to be responsible stewards of our glacier and our home. Juneau is prioritizing renewable energy and sustainability--you must, too.

Megan
