Please don't force any more man-made structures, paths, launches, fences, parking, etc, etc, on the area we locals know as 'the glacier.' It's too small, and the impacts are too great. While we can see you wanting to make it nice for tourists, there are other things to be considered. Making the area feel like the Disney of Southeast is unacceptable. Please back away. If you are experiencing too many people in the summer months, make it a visit-by-lottery, or stop when a certain number of busses are full.

Please. No more.

Local for generations.

Cynthia and Michael Dau
